Give e-bay a try. I just bought mine there two days ago. Same stuff your selling and I paid $275. Several have sold there around that price in just the last couple of weeks. You can't find them NEW right now. I looked everyone and they are all on back order. Good Luck.

1587. WTB: ICOM PCR-100

Newsgroup: rec.radio.scanner
Date: 2003-03-30 23:58:59 UTC
From: Joe Esposito <joest73@notsohotmail.com>
Message-ID: <g51f8vk0lf9s3krmprqsvu9t55r139u5vq@4ax.com>
Source record: 34002

I am looking for a used ICOM PCR-100. I plan to set up a personal web controlled radio for mostly AM and FM BCB listening.

If your think of selling one, e-mail me at (mwradio at gmx.net) or (joest73 at hotmail.com)

Thanks,

Joe Esposito

1588. Realistic Pro-46

Newsgroup: rec.radio.scanner
Date: 2003-03-31 00:11:23 UTC
From: Jim Cassidy <jimcassidy@wi.rr.com>
Message-ID: <LILha.48231$ZW4.1410179@twister.rdc-kc.rr.com>
Source record: 34003

I have an old realistic Pro-46 hand held scanner with the following frequencies. I have been told that this radio has frequencies that are no longer available after 1994. I bought this radio just before then. Is there any value to this radio because of it's status? What might those frequencies be and what would I hear on them? Any help would be appreciated.

Thanks,

Jim

Frequency Coverage:

```
Ham.....................................29 - 29.7 MHz (in 5 kHz steps)
VHF-Lo..................................29.7 50 MHz (in 5 kHz steps)
Ham.....................................50 - 54 MHz (in 5 kHz steps)
Aircraft.............................108 - 136.975 MHz (in 12.5 kHz steps)
Government...........................137 - 144 MHz (in 5 kHz steps)
Ham.....................................144 - 148 MHz (in 5 kHz steps)
VHF - Hi............................148 - 174 MHz (in 5 kHz steps)
Government.........................406 - 420 MHz (in 12.5 kHz steps)
Ham.................................420 - 450 MHz (in 12.5 kHz steps)
UHF-Lo..............................450 - 470 MHz (in 12.5 kHz steps)
UHF-TV..............................470 - 512 MHz (in 12.5 kHz steps)
UHF-H.....................806.0000 - 823.9375 MHz (in 12.5 kHz steps)
...........................851.0000 - 868.9375 MHz (in 12.5 kHz steps)
...............................896.1125 - - 956 MHz (in 12.5 kHz steps)
```

I am anti-this war and anti rape. I sleep well. Saddam is an evil
bastard and needs his ass kicked. I hope someone close to him takes care
of business. I hope our military does not suffer much in this political
screw-up.

Hi Jim,

What you may be referring to is a modification that can be done to this scanner to allow it to recieve cellular as well as some TV frequencies. It is a simple keyboard mod. No soldering or any of that crap.

Check hear for the instructions.

http://web2.airmail.net/mattj/radio/pro51.htm

Use the same instructions as the PRO-51. I've done it to my PRO-46 and it works.

Don

>> yourself....

--
No, what made you a troll was your inability to control yourself when confronted by trolls. The only person that is responsible for your actions is you, not me nor anyone else using these newsgroups.

It's just so much easier to lash back and then blame the other guy. Hmmmmm, where have I seen that before, the grade school playground and/or usenet news groups.

Trolls live by the 'Mine is bigger than yours game', which you appear to play fairly well. The only way to win the game with trolls is not to play.

It's like my father told me, "Son never get into a battle of wits with an unarmed opponent".

And the order you prefer to see them in would be based upon what? Appears
they are in English, so ordering them that way makes some sense, don't ya
think?

How ignorant!!!!!

Good grief...

Want it in Swahili, perhaps? What language are we speaking here? What language was the original post made in? What language did YOU respond in?

What a troll.

I am smarter than you, na na na na. Get real. Prove it. Besides the grammar, the IQ or smarter than you thing is the dumbest thing I have ever heard and If you make so much money, what the hell are you doing in a newsgroup causing so much trouble? Give a tea party, or maybe even a cotillion. By the way, I had to look that one up, 'cause my IQ hasn't been tested and I am not worried about my IQ like you are. I have seen so many dip shits in my life with the so called high IQ. Can you even wipe your A$$ with that IQ of yours?

And you know for sure when a point hits the mark when the idiot emails you personally and calls you a bitch (guess he/it thinks I am female). Brags about a 160 IQ, well good buddy, a high IQ isn't necessarily a sign of intelligence, certainly in your case. If you want to respond to my post, do it here on the group, do not email me again.

Try this. Stick a toilet plunger up your ass.
Then take a lamp wire and snip it off. Strip the wire so that the wires
are exposed,then separate the wires so they can reach 2 ft. or so away
from eachother..
Plug it in. Immerse your feet in some bath water,or toilet water as you
prefer.
Whistle dixie as you stick one wire under each armpit.
Reception will be astounding.
You can thank me later.
Hope this helps.

Where the hell were they when Clinton unjustly invaded Yugoslavia et al? According to Janeane Garofalo, the comedian, it wasn't "HIP" to protest against Clinton. As many reservations that I have about the loss of our men and women in Iraq, I realize that much of the protests surrounding this situation stem more from a desire to denigrate Bush than to express true outrage.

Regards.

I am trying to connect the bc250d to my computer so that I can enter trunked frequencies more easily. The problem I am having is that I cannot figure out how to remove the cover on the right side of the scanner so that I can connect the small end of the cable. The large end of the cable is already connected to the computer. I've tried using my finger nail and a knife to open the rubber cover on the right side, but have not had any luck. Can anyone help out?

If you want to figure out the average street price of a used scanner, check auction sites like eBay (www.ebay.com). Don't expect a huge value increase - there are plenty of scanners available to receive cellular phone frequencies (the blocked frequencies on newer scanners after 1994) and the Pro-46 may not have some of the features found on later scanners.

Modifications for this scanner, if available, can be found on web sites covering modifications - use a search engine to look for "Pro-46 modifications."

I took a look at e-bay and it shocked me to see this radio going for $100 in some cases. That's all I paid for it 10 years ago.

I just purchased a BC780XLT and I started reading groups like this one to learn more and I saw people talking about radios before 1994. I remember the salesman at the time talking about this being one of the last ones you could buy, but I didn't know what he was talking about until now.

I went to the web site for modification instructions for this radio. Has this always needed modification, or does it do something more right out of the box? He made it sound like it picked up frequencies that would be blocked on future radios.

It sounds like they are blocked on this one as well without the modification. Does that mean pre '94 could be modified and post '94 can not? Just curious. Trying to get into the hobby.

Thanks for all the info,

Jim

In many parts of the country, they can still be used. I'm listening right now to a trunk system with a scanner that does not do trunk tracking - there are only a few frequencies that can be monitored with any scanner. In other locations, another scanner handles trunk tracking while this scanner is used for other frequencies. But I prefer this scanner because it scans faster, which makes it ideal for casual background listening while I'm doing other things.

reference
> the following example from the cold war:

What particular belief does the VOA propagate?
And...after all, what does VOA stand for? Overall, I'd have to say that
their transmissions are fairly generic. Many listen to that outlet.

> The Americans and Russians were the only ones in a race. The American
news
> report said that the Americans won the race, the Russian press said that
the
> the Russians came in second, the Americans came in next to the last.

A point that makes no point IS no point. Nobody needs to listen to any
particular station or nation to know the outcome of the cold war. The wall
came down in Berlin, the Eastern Bloc nations gained their independence, and
the Soviet Union crumbled (or maybe I missed something, and it was just
propaganda?)

> VOA does much the same thing, but by virtue of omission. For instance,
they
> tend to play down poor economic conditions and high unemployment in favor

High unemployment? As compared to...? And there analysis of the conditions
in other countries doesn't sound like propaganda.

> They tout mainly the positive aspects of American life... just a sales
tool.

Oh? And the positive aspects of American life are merely a sales tool?
That's the mentality of the old Soviet Union - ask anyone who served in the
Soviet military during that era - most loathed the party hacks that were, by

law, in their midst, and these party hacks would downplay the "positive aspects" of living in America, claiming it was all propaganda.

Or do you believe as well that the positive aspects of American life are just a sales tol as well?

Hello,

Since I live in Toronto,Ontario what would be a good scanner to buy ?.

What would you people of rec.radio.scanner suggest ?

At Radio Shack they have the BC-245XLT (Trunk Tracking Handheld Scanner)
going for $ 499.99...

At Radioworld the have it going for the price of $449.00 , Also at
Radioworld they have used equipment, So we have the same scanner (BC-245XLT)
going for $335.00.

Which one to buy at Radioworld the "New" or the "Used" ?

Thank-you for the help and the suggestions.

P.S. I use to own the PRO-51, Now I have the DJ-X3.

Stating this as my personal opinion..... no one has a right to tell me what I can listen to. As long as I don't act on that information and keep it to myself... whats the problem?

Stating this more as fact..... As long as you are RECIEVING ONLY, albeit considered illegal, you are not causing any harm unless you utilize that information in a bad way.

Stating this clearly as fact.... Intereference or transmitting on frequencies that a person does not have licensure (or free access like CB, MURS or FRS) is illegal and should be dealt with accordingly.

ALL external radio services are sales tools. They are trying to sell someone
on the benefits of their particular system of government. And all such
stress the more positive aspects of said government, and, to one extent or

another, downplay other systems.

The American/Russian race joke has nothing whatsoever to do with the outcome of the Cold War, it was merely an example of propaganda, how the same thing can be said in more than one way, still be accurate, but yet elicit a different image.

propaganda
n : information that is spread for the purpose of promoting some cause

Also:

SYLLABICATION: prop&#65533;a&#65533;gan&#65533;da
PRONUNCIATION: prp-gnd
NOUN: 1. The systematic propagation of a doctrine or cause or of information reflecting the views and interests of those advocating such a doctrine or cause. 2. Material disseminated by the advocates or opponents of a doctrine or cause

In other words, propaganda does not hold the sinister definition that most people tend to attribute to it. The VOA is every bit as much propaganda as is R. Havana, they are simply propagandizing the American system of government and economy as opposed to the socialist one.

I lost respect for the VOA after listening to many of its English language broadcasts targeted at Eastern Europe (repeated in many languages) towards the end of the cold war (mid 80's). If the VOA were believed, one would expect most Americans to own motor homes, vacation cabins in the mountains, yachts to cruise the Caribbean, and expensive Sport Utility Vehicles to drive. The picture they painted of typical American life was absolutely amazing, and completely false. Yes, other countries did this also, but I somehow expected our propaganda to be a little more truthful.

You must understand - propaganda is propaganda. IT, in and of itself, is a
tool. To only tap lightly with a hammer when your neighbor uses the same
hammer but hits harder only means your neighbor finishes building his house
first.
Ever listen to the propaganda that came out of the old Soviet Union?
During WWII, it was reported to be "illegal" for Americans to listen to VOA
BECAUSE of the propaganda it presented.
This is no longer the 80's. Things change. have you even LISTENED to VOA
lately? it's fairly sanitized and dull...

Rush Limbaugh 3/31/2003: "The world watches in AWE as our American troops uncover Sadaam's WMD!"

That's what Rush would be saying if there were any WMD.

Because Bush would tell our troops where the WMD are and save his sinking crock of crap.

Why don't you read this one and get back to me:

http://www.newyorker.com/fact/content/?030331fa_fact1

Please don't reply with Rush-ims, try to stick to "ideas", or "facts".
I especially don't want to hear "There you go again you liberals are all alike."
It's about as stupid as writing a country music song and actually rhyming "bin Lauden" with "Forgotten."
Holy crap what a dumb thing to do.

-Disneyland patriotism.

Rush-isms? The author of this article is a left-wing conspiracy nut - and if you want to call that a "Rush-ism", note this: he also believes in all kinds of government cover-ups regarding UFOs, Kennedy cover-ups, how Israel bought, lied and stole their way to the nuclear bomb, the fall of the CIA, omits relevant information regarding the Clinton Administration, and, in general, as OTHERS have noted, presents a "selective use - and misuse - of intelligence information"

Other comments regarding this author:

"Seymour Hersh's Target Is Destroyed is: 1.) one-third usable early-1980s history, 2.) one-third irrelevant conjecture, 3.) one-third calculated falsehood."

Regarding "The Samson Option": "If you are looking for an exciting true life spy story then this is not the book for you."
and "In his opinion, the Israeli nuclear program could not have existed without the continuous aid of the U.S." (Like Israel was broke...)

Regarding "Price of Power: Kissinger in the Nixon White House": "Hersh is great at seeking dirt, which is a public service as he uncovers so much of it. Guys like him serve a function only as long as we keep his role in

perspective. He found My-Lai, yes, but does he approve of anything whatsoever? This book is a 500-page indictment of Kissinger that follows no standard other than to show that the guy was really really bad. There is little if any acknowledgment of what Kissinger accomplished, virtually no consistent standards discussed of what would have been better, and no suggestions offered."

Regarding "Against All Enemies:": "Paper will put up with anything that is written on it."

He's listed on conspiracyplanet.com. He fuels the flames on all types of conspiracies, including the M16 nonsense.

As was described on CNN's Wolf Blitzer: "the closest thing American journalism has to a terrorist . because he sets out to do damage and he will do it by whatever innuendo, whatever distortion he can-look, he hasn't written a serious piece since My Lai."

Mr. Hersh has called John Ashcroft "demented" for discussing the confession of John Walker Lindh. Mr Hersh has complained about the treatment of Zacarias Moussaoui, the famous twentieth man, arrested just about a month before 9/11, complaining that the courts were "too conservative". This statement he made even after Moussaoui stood up in court and began " talking about death to the Israelis, death to Americans." Hersh claims, "They truly aren't worried about it, because they would have stopped him." What bilge.

He has stated: "I can tell you right now, the military, below the chairman's level, they don't like it. Smart officers don't like it. There's an awful lot of dissent.... It's not a popular war in the military among certain officers in certain services, which include the Marines...."
Where has anybody heard or seen any proof of such ramblings?

Regarding the current war: "I don't quite know how we're here. I don't know why we're here. I really don't know. "
Well, at least he got THAT part right - he's clueless.

He also rambled, "If you've got a contract for a book on the war and you're covering the war, don't you think that might impact how you would write about the war? No, absolutely not. I don't know. I don't know how we got here. All I know is that we're all going to be real sorry soon...."
He sure IS sorry...

His friend and confident, France's Bernard Kouchner, spews the same bilge and is a Chirac apologist. That the French refer to him as "Collaborateur du New Yorker" speaks volumes to most in and of itself.

Hersh, in an interview, said:

Question: What got you into journalism?
Seymour Hersh: I flunked out of law school.

He thrives on creating controversy, much as other hate-mongers. In comments he's made, he has defended Clinton and his Administration, but out of the other side of his mouth says this: "Clinton has obvious character flaws.

How much do the character flaws weigh on the Presidency? As with Kennedy's sexual obsession, Clinton's flaws with Lewinsky are profound and you can't stop there. There's a grandiosity and lack of reality to the man, which also becomes a serious weakness. So Clinton's a flawed and perhaps a dangerous man. When you have a weakness of this kind, it can become a danger. Take the "retaliatory" bombing raids against suspected terrorists in the Sudan and Afghanistan. Are they really a sign of strength on the part of the Administration, or are they a symptom of a crippled and floundering President?"

So which of his arguments is one to lend credence to?
He prints what he knows will sell - no matter WHO it sells TO. To think of him as anything more, if you will, as an "entertainer" is ludicrous.

Don't bother to mention the awards he's won - the liberal actors et. al. in Hollywood receive awards, too.

And Peter Arnett has won awards. Now, he's about galvanized his position as being persona non grata, and, as giving aid and comfort to the enemy, should be considered a legitimate military target. He was fired from CNN for his bilge, and, as I've told others, it was only a matter of time before he showed his true colors once again - he just couldn't control himself.

Proof of Hersh's willingness to commit libel and print whatever sells for him can be found in
UNITED STATES COURT OF APPEALS

FOR THE FOURTH CIRCUIT

No. 94-2120

RICHARD C. FUISZ,

Plaintiff- Appellant,

v.

SELECTIVE INSURANCE COMPANY OF

AMERICA,

(Note: I won't print the entire boring thing here, just the relevant parts)

On April 17, 1992, Terex Corporation, Terex Equipment Limited and KCS Industries (collectively "Terex"), filed a complaint against Fuisz and Seymour M. Hersh in United States District Court for the District of Columbia alleging claims of libel and slander against both defendants. In its complaint, Terex alleges that Fuisz "embarked on a scheme and plan to injure plaintiffs by publicly disseminating false accusations designed to tarnish their good name and reputation in the business community." Terex further alleges that"[i]n or about 1987,"

First, the complaint relates how
Fuisz endeavored, unsuccessfully, to act as Terex's sales representative in Saudi Arabia. It alleges that Fuisz thereupon "determined to

retaliate against [Terex] for the loss of a business opportunity" and engaged in a "vendetta" against Terex. In furtherance of his scheme, Fuisz is alleged to have contacted journalists to spread false informa-
16
tion as part of a "smear campaign" against Terex, "falsely linking [Terex] to the sale of military equipment, including scud missile launching equipment, to Iraq," and implying that Terex aided Saddam Hussein in firing dozens of scud missiles at Israel and Saudi Arabia.

(here comes the good part)

The complaint chronicles Fuisz's initial efforts to contact congressional committees and "responsible and ethical members of the media" to spread this false information. When nothing was found to support the charges, the complaint describes how Fuisz then turned to less scrupulous journalists who specialized in "sensationalistic exposes" to spread the information and ultimately get it into the general press.

Terex demanded that Fuisz retract the false publications but Fuisz refused to do so. Summarizing Fuisz's deliberate intent to injure Terex, the complaint alleges, "in publishing these false and defamatory statements set forth above, Fuisz was motivated by actual malice and wrongfully and willfully intended to injure plaintiffs."

The conduct which is described in the complaint can only be characterized as deliberate. There is not a single series of "facts and circumstances" in the complaint which, if true, could have been pursued accidentally or recklessly.

In concluding that the complaint also alleges "reckless" conduct - - which Selective Insurance's policy would not exclude- - the majority opinion relies on the single allegation made with respect to each defamatory publication that "Fuisz knew that the statements were false, or published the statements with reckless disregard as to whether they were true or false" (emphasis added). From this the majority concludes that even if "the evidence at trial fails to establish that Fuisz intentionally harmed Terex, the complaint permits Terex nonetheless to prevail on its claims by proving that Fuisz intended no harm, but acted with reckless disregard for the falsity of his statements."

Indeed, if the facts alleged are true, which
we must assume in this analysis, it is impossible that Fuisz acted without intent to injure Terex. Moreover, whether Fuisz spread information knowing it to be false or spread it while recklessly indifferent to its truth is irrelevant to the question of whether the injury caused was deliberately inflicted. On that question, the complaint is not ambiguous. Terex alleges that Fuisz purposely spread false information and
17
that Fuisz did so with the single- minded intent of injuring Terex as a "vendetta" for failing to enter into a business relationship with him. The complaint alleges only one type of conduct - - a vendetta pursued

intentionally to injure - - and it never wavers from the accusation that Fuisz's activities were precalculated, planned, and deliberate, and thus that Fuisz "wrongfully and willfully intended" to injure Terex.
~~~~~~~~~~~~~~~~~~~~~~~~

This is not the first or ONLY time that Hersh has been indicated in libel suits. Seymour M. Hersh was listed as one of the defendants being sued by the Cusack and Cloud Plaintiffs in the ABC Action (and was served in Washington, D.C. on December 8, 1997, at 6:10 p.m.). Hersh made the following public statement on the CNBC Hardball Show (in segment entitled "The Kennedy Legacy", with Host Christopher Matthews) concerning the Cusack/Kennedy Documents:

Quest. by Host "What about the documents which purported to show that she [i.e., Marilyn Monroe] was about to accept a payoff from Kennedy? What do you think of those documents now?"

Ans. by Hersh "As you know... The public is beginning to learn,... it's a close call. I mean, you know, 60 Minutes , you know, did a show the other night [ed. note: 11/23/97]. But for the longest time, they thought that actually that some of the handwritten Kennedy documents might be accurate, so I understand. But the bottom line is, even if some of those documents are real, which is a possibility ... [then Hersh goes on with defamatory statements about Lex Cusack and the documents]."
~~~~~~~~~~~~~~~~~~~~~~~~
There is, more recently, his comments against Perle. While working with his French counterpart, Hersh made libelous statements against Perle regarding a lunch he had with several Saudis. By Hersh's OWN admission, nothing came of the meeting. But, to play the part Hersh plays so well, he indicted Perle on the APPEARANCE of impropriety. This type of "journalism" is bet summed up below:

Regarding Mr. Hersh, Paul A. Rahe, Jay P. Walker Professor of History at the University of Tulsa had this to say:

Years ago, Seymour Hersh scored a journalistic coup when he broke the story of the Mylai Massacre. Since that time, however, his record has been spotty. He has reported many an event that seems never to have transpired. His motto seems to have been the directive issued by the editor in Evelyn Waugh's novel Scoop: "If there is no news, send rumors instead."

Hersh is a favorite with the anti-war cooks. They laud his "journalism", even though he contradicts himself.

Said of Hersh regarding his comments on the first Gulf War: ""Hersh has the safe luxury of armchair quarterbacking the every move of the 24th Infantry during the Gulf War -- 10 years after the fact. We did not have that luxury. We were out there fighting the fourth-largest army in the world, which was armed with biological and chemical weapons ..."

Hersh and his article lack integrity. That's the bottom line. He maligns the characters of 26,000 great young soldiers who conducted a 400-kilometer attack successfully, where thank god we only lost eight killed and 36

wounded.

What he did was recycling charges that were investigated in '91. Here's the front page of the newspaper, Savannah newspaper, in those months.

A total of 2,000 pages of investigative material, hundreds of interviews, there is no truth to this stuff, and this is a nonobjective attack on the character of these great young soldiers.

The two scout platoon leaders involved in both these incidents, they were thoroughly investigated, he went to the same people, cleared two elements of all wrongdoing. They simply did not harm Iraqi soldiers or civilians. The allegations, the bottom line, are not true.

The investigation revealed that the machine gun fire they heard was directed at Iraqi vehicles.

It was not directed at these poor Iraqis, who were treated with enormous compassion and discipline all throughout this battle force.

The incidents did not occur according to exhaustive investigation at the time.

The American people are very proud of their behavior, and they ought to be.

Thank god for the discipline and courage of these 26,000 troops.
~~~~~~

As regards Mr. Hersh the liberal rag where this article was found, :

David Remnick's Military Snafu

New Yorker editor-in-chief David Remnick might want to take a cue from his magazine's famed fact-checking department. When Command Sergeant Major James D. Randolph (retired) got wind of a story that Seymour M. Hersh was writing about his infantry division's actions in the Gulf War, he fired off a letter to Remnick voicing concerns about the article's accuracy. Hersh's account, published last month, accuses the 24th Division of killing POWs, gunning down civilians, and slaughtering a fleeing Iraqi column after the cease-fire was declared. But in his letter, Randolph stresses that, as a noncommissioned officer, he would have known if his troops had acted inappropriately -- and he insists that they did not. In a terse, three-sentence response faxed to Randolph, Remnick guarantees he's read the detailed letter "with due seriousness." Serious or no, he didn't quite manage to get the veteran's title right. Remnick addressed him as Major James D. Randolph -- quite a boost in rank -- and gave the old soldier an even bigger promotion on his fax cover letter, bestowing Randolph with the rank of major general. We were kind enough to point out these slipups to Remnick. "Noted," he replied.

Hersh's lack of professionalism and even the simple idea of using his HEAD was noted here:
~~~~~~

"Indeed, an even more serious incident occurred on Tuesday when the magazine New Yorker published a 4,900-word article by Seymour M. Hersh alleging covert plans by U.S. military specialists - reportedly assisted by Israeli commandos - to seize Pakistan's inventory of nuclear weapons should the Musharraf regime be threatened by a takeover from radical Islamic militants. Mr. Hersh and the magazine editors clearly failed to understand - or, more likely, consciously chose to ignore - that the act itself of publishing those allegations is extremely dangerous. "

"At the very least, the Hersh article poses a threat to the fragile partnership between Washington and Islamabad, provides a powerful propaganda weapon to Osama bin Laden and Pakistani militants, and increases the threat of mission failure and extensive American casualties if such a scenario indeed were to occur. "

A link on his book about Kennedy:
http://www.boston.com/globe/search/stories/books/books97/seymour_hersh.htm

~~~~~~~~~~~~~~~~~~~~~~~~
The bottom line is, you need to do better than one liberal flame by Seymour Hersh.

By all means, we must implore people to abandon facts.

The fact that Rush Limbaugh or anyone else for that matter says stick to the facts, seems to this writer to be good advise.

I can see how those skating on thin ice with their arguments would eschew facts.

sinking
>crock of crap.

Actually, this was a problem the weapons inspectors had
with our intelligence information, too. Our people would
tell them "There! There! Go to that location, we're sure
there are WMD THERE!" and they'd go there and find...
nothing.

We don't know where Saddam has his WMD, if indeed he has
them. It's blind man's bluff. And so far, we haven't
touched anyone yet.

If you do not mind a mild critique...

In a flame war, it's a mistake to try to justify
yourself or give out information on yourself; the
other side can easily twist things to their own
advantage. Take the fight to them and try to force
THEM to prove they know what they're talking about.

Or, more devastatingly, subject them to ridicule
and/or humor. Most flamers react to that the way
vampires do garlic.

Good for you clyde, I'd rather we didn't have to do this either. My
slam at his "anti-war" stance was mostly against his retorick, I am
not pro-war by any length. I'm sure if the UN presented a unified
front your senario would have been true, but France & Germany f**ked
that up. Now we (US UK Aus) have to do the job with a gun & bomb that
the UN could have done with one voice and a solid conviction.

Q- Thank you for staying up all night and cutting and pasting. You must have
invested quite a lot of money in online - subscriptions.
You really need to assign credit to those whom you plagiarize:
http://www.worldpaper.com/
http://www.newyorkmetro.com/nymetro/news/people/columns/intelligencer/3369/
http://www.amazon.com/exec/obidos/tg/detail/-/0671506889/104-0762275-2317537
?vi=glance
and to those who compiled it for you.

Still you successfully pointed out that this person may be capable of
unscrupulous journalistic behavior.
But I didn't ask about that. I asked about the article and the facts as they
are described in it. I asked that you not impart insults or other
"Rush-isms".

You tell us of a man who would rearrange the facts to gain money and fame
and to defame those whom he opposes.
That is an accurate portrayal of "Rush". But I did not ask about Rush.

You did not talk about the article:
http://www.newyorker.com/fact/content/?030331fa_fact1

what you call trolling,many call informed debate

we may not agree with each other and we all on both sides on the Iraq problem go off at the mouth a bit,but its fun and long may it continue.

you say you dont play,so how come you have by responding,let us who like to have a bit of fun go to it,those who dont,simple dont read and dont reply,the vast majority of messages on any usenet group i dont read,even if on topic,i look at the subject and take my pick.

Selling a Icom IC- PCR 1000 , unblocked, with cellular coverage on Ebay.

Near Mint, all manuals and software in English. Original box , cables etc.
Used once to make sure it worked.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3016159811&rd=1

Starting bid $300, No reserve, instant buy at $525.

Thank you.

You don't have a very good memory for someone who claims an IQ of 160. Here is the exact email you sent me.

****

Text Size: S M L XL

The only reason I didnt get a 160 on my IQ score.... I got one answer
wrong. Later I found out that the answer I gave was also correct.

u dont know me bitch
****

Is that the word bitch I see there? Also I would think someone with an IQ of 160 would know how to spell "didnt" as didn't and "dont" correctly as don't.

, i sent you an mp3...

In the second email, and I took the liberty of forwarding it to your ISP along with your first email.

Just curious of this radio has been FCC type accepted?
Motorola GP-68. I think NOT.

A cyber begging page? THAT'S the next big thing?

Sigh... all that time I wasted learning ASP, .Net and Java....

If I had only known that all I had to do was find a vacant offramp off the information superhighway and hold up my virtual "will work for food" sign.

That's it. It's obvious I've been hoodwinked. I'm gonna SUE!

M2CW,

If Math "Experts" are so 'Smart'.
- Why do they say "Pie Are Squared"
- - When it is Common Knowledge that
- - - "Pie are Round and Cake are Square"

Just for the Fun of It...
- WHO ME ?
- - Just another
- - - 'Diet Brain' !

sgly ~ RHF

Trust me. There will be weapons of mass destruction - even if we have to
build them here and fly them over. ;)

What evidence do you have that SC would be involved in banning scanners,
Povl? I would vocally oppose such legislation if made aware of it.

The real question is where were YOU? I didn't see you climbing behind a piece of bark in the bush with ME dodging rounds from an AK-47..

If I have to explain it you wouldn't understand what it was like.

What's a REAL Veteran to do with all of these liberals. I don't give a good dump where anyone else really was, you and they have to live with your own thoughts.

This crap still does not work!!! We got the new patch and it ran for a total of 30sec before it to locked up, Check out:

http://webpages.charter.net/moment/winscan780.htm

And get the real deal on controll software for your BC 780XLT and we are now testing a BC785D so look in to get the lowdown on that as well. We have the patch for WinCrap780 I mean WinShit I mean WinScan780 and we are thinking about just uploading it here. it's a socalled patch not the real socalled software so there is nothing they can do about us uping it to the new group :-)

Q- Thank you for staying up all night and cutting and pasting. You must have invested quite a lot of money in online - subscriptions.
You really need to assign credit to those whom you plagiarize:
http://www.worldpaper.com/
http://www.newyorkmetro.com/nymetro/news/people/columns/intelligencer/3369/
http://www.amazon.com/exec/obidos/tg/detail/-/0671506889/104-0762275-2317537?vi=glance
and to those who compiled it for you.

Still you successfully pointed out that this person may be capable of unscrupulous journalistic behavior.
But I didn't ask about that. I asked about the article and the facts as they are described in it. I asked that you not impart insults or other "Rush-isms".

You tell us of a man who would rearrange the facts to gain money and fame and to defame those whom he opposes.
That is an accurate portrayal of "Rush". But I did not ask about Rush.

You did not talk about the article:

Spring cleaning - SHACK SALE!

March 31, 2003

ORIGINAL POST - Watch For Updates & Additions

*** Communication Specialists TP-154 Repeater Controller ***

Encodes / Decodes PL, DPL and I think inverted PL

Has a courtesy tone

Has an ID'er

Programmable time limits for system and for each tone/code

Lots of other features

Manual with programming, operation and hook up data included

Programmable over the air or via programming jack - uses a touchtone phone.

A great controller for starter / basic systems

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-027S.JPG

*** Asking $165 Shipped - OR OFFER ***

-------- ------------- ----------- -------------- ----------------- --------
-------- -------------

*** Radio Shack PRO-2067 Base / Mobile Scanner ***

500 Channels
Trunk Tracking - Motorola type I, II. I/II Hybrid, LTR, EDACS
SAME Technology for Weather alerting
PC Programmable
Direct keypad frequency input
CTCSS / DPL decode
4 line Alpha display
BNC antenna connector
Plus much much more features

*** Comes with the following: ***
Mounting bracket
Original user manual
Wall wart power pack - for base use
Serial programming cable

Programming software

This scanner has been tested and works just beautifully. Condition is Very good - non-smoker, never mobile. I bought 2 of them, I just need one now... so
one has to go.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-018S.JPG

*** I'm asking $180 Shipped - OR OFFER for the whole setup ready to plug and play... sent 2-3 day priority mail ***

-------- ------------ ----------- ------------- ----------------- -------- -------- -------------

*** Motorola P200 UHF 2 Channel Handheld Radio***

Only problem .. the antenna has some shrink tubing on it because the plastic on the antenna is cracking.

Has been tested - is in good working condition

Physical condition is VERY GOOD with exception to the antenna.

Battery condition is EXCELLENT!

Currently programmed in the 460Mhz area

Easily converts to 6 channel

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-019S.JPG

*** Asking $60.00 or offer - shipped ***

-------- ------------ ----------- ------------- ----------------- -------- -------- -------------

*** Palm IIIx PDA ***

Just your basic Palm PDA

WORKS GREAT!

Maybe it could find a use on APRS or used with a GPS unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-021S.JPG

*** $40.00 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- -------- -------- -------------

*** Kenwood TM-742A Multi Bander Mobile Radio ***

This radio has a problem. I only can get a little blip of the backlight when the power button is pressed. I have not worked on it, I just do not have the time and I do not have a service manual .so I have no clue what the problem is.

Comes with a Kenwood DTMF mic, 2M module and 440 module.

These radios typically go for over $500 when working

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-023S.JPG

*** Asking $250 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Kenwood TS-700SP 2 Meter ALL MODE ***

Built in digital display along with analog dial

10W output - perfect for feeding amplifiers

Comes with the 120V AC cord, manual and the original hand mic.

Works good, however the display flickers once in a while when tuning.
Rocking the tuning dial up and down in freqs clears the problem.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-024S.JPG

*** Asking $150.00 Shipped - Or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Scott Air Pack SCBA unit (Fire Fighters air pack) ***

Comes with carry / storage case, mask, regulator, tank frame and tank . the whole complete unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-025S.JPG

*** Asking $135.00 Shipped or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Setcom 7-PR4SB Headset with Boom Mic ***

I'm not sure what radio it is wired for, but it was used with an HT for auto racing (Pit Crew)

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-030S.JPG

*** Asking $45.00 shipped or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** TX-RX 900MHz Vari-Notch Cavity filters / (Duplexer?) ***

Quantity - 4

Filter Type - Vari-Notch

Model - 15-88-01

Freq - 890 - 960MHz

There is 4 of these filters on a rack mount frame. No interconnecting cables. I was going to send these to TX-RX to have them convert 2 of them to Pass High and make the interconnecting cables - But I went with a different duplexer.

PICTURES AT:

http://www.kmcnet.net/Auction_Stuff/MVC-028S.JPG

http://www.kmcnet.net/Auction_Stuff/MVC-029S.JPG

*** Asking $175 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

There's more to be listed... Keep an eye open for my posts.

I accept Paypal online payments, US Postal Money Orders and TRADES. I don't have any specific list of what I'm looking for in trade.so if you want to offer a trade, send me your "trade list" for what item(s).

Please note, included shipping is for continental US addresses ONLY, Hawaii, Alaska and international addresses, I will calculate the additional shipping needed.

Thanks

Dave Schmidt

wrote:

According to http://www.freedom-to-tinker.com/superdmca.html
it's called the "Theft of Communications Services Act"

It's supposed to be a version of the hated DMCA on steroids --only
it's scope is much broader than the DMCA to include all sorts of
things which appear to be quite legitimate.

Here it is:
==========
ARTICLE 8

THEFT OF COMMUNICATION SERVICES ACT

SECTION 16-11-810. Short title.

This article may be cited as the Theft of Communication Services Act.

SECTION 16-11-815. Definitions.

As used in this article

(1) "Communication device" means

(i) Any type of electronic mechanism, transmission lines, cables,
or connections and appurtenances thereto, instrument, device, machine,
equipment, technology or software which is capable of intercepting,
transmitting, re-transmitting, acquiring, decrypting or receiving any
communication service or the facilitation thereof,

(ii) Any component thereof, including any cable modem, computer
circuit, splitter, connectors, switches, transmission hardware,
security module, point-of-deployment (POD) module, conditional access
card, smart card, software, computer chip, electronic mechanism or any
component, accessory or part of any communication device which is
capable of facilitating the interception, transmission,
re-transmission, decryption, acquisition or reception of any
communication service; and

(iii) Any electronic serial number, mobile identification number,
personal identification number or any communication device that is
capable of acquiring or facilitating the acquisition of a
communication service.

(2) "Communication service" means (i) services provided by or through
the facilities of any cable television system or closed circuit

coaxial cable communication system, and (ii) any transmission service used in connection with any cable television system or similar closed circuit coaxial cable communication system, and (iii) any service lawfully provided for a charge or compensation to facilitate the lawful origination, transmission, emission or reception of signs, signals, data, writings, images and sounds or intelligence of any nature by telephone, including cellular or other wireless telephones, wire, broadband, wireless, radio, electromagnetic, photoelectronic or photo-optical systems networks or facilities; and any service lawfully provided by any radio, telephone, photo-optical, electromagnetic, photoelectronic, fiber optic, satellite, microwave, data transmission, wireless or Internet-based distribution system, network or facility, including, but not limited to, any and all electronic, data, information, video, audio, Internet access, telephonic, microwave and radio communications, transmissions, signals and services, and any such communications, transmissions, signals and services lawfully provided directly or indirectly by or through any of the aforementioned systems, networks or facilities;

(3) "Communication service provider" means (i) any person or entity owning or operating any fiber optic, photo-optical, electromagnetic, photoelectronic, cable television, information, broadband, satellite, Internet-based, telephone, wireless, microwave, data transmission or radio distribution system, network or facility; and (ii) any person or entity providing a communication service, whether directly or indirectly as a reseller including, but not limited to, a cellular, paging or other wireless communications company or other person or entity which, for a fee, supplies the facility, cell site, mobile telephone switching office or other equipment or communication service; and (iii) any person or entity providing any communication service directly or indirectly by or through any such distribution systems, networks or facilities.

(4) "Manufacture, assembly or development of a communication deviceï¿½ means to make, produce, develop or assemble a communication device, or to knowingly assist others in those activities.

(5) "Manufacture, develop or assemble an unlawful access device" means to make, develop, produce or assemble an unlawful access device or modify, alter, program or reprogram any instrument, device, machine, equipment, technology or software so that it is capable of defeating or circumventing any technology, device or software used by the provider, owner or licensee of a communication service, or of any data, audio or video programs or transmissions, to protect any such communication, data, audio or video services, programs or transmissions from unauthorized receipt, interception, acquisition, access, decryption, disclosure, communication, transmission or re-transmission, or to knowingly assist others in those activities.

(6) "Unlawful access device" means any type of instrument, device, machine, equipment, technology or software which is primarily

designed, developed, assembled, manufactured, sold, distributed, possessed, used or offered, promoted or advertised, for the purpose of defeating or circumventing any technology, device or software, or any component or part thereof, used by the provider, owner or licensee of any communication service or of any data, audio or video programs or transmissions, to protect any such communication, data, audio or video services, programs or transmissions from unauthorized receipt, acquisition, interception, access, decryption, disclosure, communication, transmission or re-transmission.

SECTION 16-11-820 Unlawful Communication and Access Devices

It is unlawful for any person knowingly to:

(1) Possess, use, manufacture, make, develop, assemble, sell, distribute, lease, license, transfer, import into this state or offer, promote or advertise for sale, use or distribution any communication device:

(i) For the unauthorized acquisition or theft of any communication service or to receive, intercept, disrupt, transmit, re-transmit, decrypt, acquire or facilitate the receipt, interception, disruption, transmission, re-transmission, decryption or acquisition of any communication service without the express consent or express authorization of the communication service provider; or

(ii) To conceal or assist another to conceal from any communication service provider or from any lawful authority, the existence or place of origin or of destination of any communication; or

(2) Modify, alter, program or reprogram a communication device designed, adapted or used for the purposes prohibited in subsections (1)(i) and (ii) above; or

(3) Possess, use, manufacture, assemble, develop, distribute, import into this state, license, transfer, sell, lease or offer, promote or advertise for sale, use, or distribution, or publish any advertisement for any unlawful access device; or

(4) Possess, use, distribute, sell, give, publish, transfer or offer, promote or advertise for sale, use or distribution any:

(i) Plans or instructions for making or assembling any communication or unlawful access device, under circumstances evidencing an intent to use or employ the communication or unlawful access device, or to allow the same to be used or employed, for a purpose prohibited by this section, or knowing or having reason to believe that the same is intended to be so used, or that the aforesaid plans or instructions are intended to be used for manufacturing or assembling such communication or unlawful access device for a purpose prohibited by this section; or

(ii) Material, including hardware, cables, tools, data, computer software or other information or equipment, knowing that the purchaser or a third person intends to use the material in the manufacture, development or assembly of a communication or unlawful access device for a purpose prohibited by this section, or for use in the manufacture, assembly or development of an unlawful access device.

(5) Obtain or use a communication service without the authorization of, or payment to, the communication service provider;

(6) Make or maintain a connection or connections, whether physical, electrical, mechanical, acoustical or by other means, tamper with or otherwise interfere with any cables, wires, components, modems, lock boxes, pedestals, or other devices or equipment of a communication service provider used for the distribution of a communication service without the express consent or express authorization of the communication service provider;

(7) Obtain a communication service by false pretense or representation with intent to cheat or defraud the communications service provider; or

(8) Assist others in committing any of the acts prohibited by this article.

SECTION 16-11-850. Receipt of signals from air by use of satellite dish or antenna.

Nothing in this article makes it unlawful to receive or capture signals from the air by use of a satellite dish, antenna, or otherwise.

SECTION 16-11-855. Criminal Penalties.

(1) Except for violations of this article as provided for in paragraph (2), any person who violates any section of this article is guilty of a misdemeanor and upon conviction for a first offense shall be fined not more than five hundred dollars and/or imprisoned for not more than thirty days.

(2) An offense under this article is a Class F felony if:

(i) the defendant has been convicted previously on one or more occasions under this article or convicted of any similar crime in this or any Federal or other state jurisdiction; or

(ii) the violation of this article involves at least 5, but not more than 25, communication or unlawful access devices.

Any person convicted under this paragraph (2), shall be fined not more than one thousand dollars and/or imprisoned for not more than five years.

(3) An offense under this article is a Class E felony if:

(i) the defendant has been convicted previously on two or more occasions for offenses under this article or for any similar crime in this or any Federal or other state jurisdiction; or
(ii) the violation of this article involves more than 25 communication or unlawful access devices.

Any person convicted under this paragraph (3), shall be fined not more than five thousand dollars and/or imprisoned for not more than ten years.

(4) For purposes of grading an offense based upon a prior conviction under this article or for any similar crime pursuant to paragraphs (2)(i) and (3)(i), a prior conviction shall consist of convictions upon separate indictments or criminal complaints for offenses under this article or any similar crime in this or any Federal or other state jurisdiction. The entry of a plea of guilty, the forfeiture of any bail or bond posted or the entry of plea of nolo contendre for a violation of this article shall have the same effect as a conviction after trial.

(5) As provided for in paragraphs (2)(i) and (3)(i), in grading an offense under this article based upon a prior conviction, the term "any similar crime" shall include, but not be limited to, offenses involving theft of service or fraud, including violations of the Cable Communications Policy Act of 1984 (Public Law 98-549, 98 Stat. 2779).

(6) Separate offenses. For purposes of all criminal penalties or fines established for violations of this article, the prohibited activity established herein as it applies to each communication or unlawful access device shall be deemed a separate offense. Each day a person is in violation of this article also constitutes a separate offense.

(7) Fines. For purposes of imposing fines upon conviction of a defendant for an offense under this article, all fines shall be imposed as authorized by law for each day a person is in violation of this article and for each communication or unlawful access device involved in the violation.

(8) Restitution. The court shall, in addition to any other sentence authorized by law, sentence a person convicted of violating this article to make restitution as authorized by law.

(9) Forfeiture of communication or unlawful access devices. Upon conviction of any person for any violation under this article, such instrument, apparatus, equipment, device, plan or instructions shall be either destroyed as contraband by the sheriff of the county in which such person was convicted or turned over to the communication service provider in whose service area such instrument, apparatus, device, plan or instruction was seized.

(10) Venue. An offense or violation under subsection (a) of this article may be deemed to have been committed at either place where the defendant manufactures, develops or assembles a communication or

unlawful access device or assists others in doing so, or the places where the communication or unlawful access device is sold or delivered to a purchaser or recipient. It shall be no defense to a violation of subsection (a) of this article that some of the acts constituting the violation occurred outside of the State of South Carolina.

(11) Inferences. In any criminal prosecution under this article or civil action under Section 16-11-856, any of the following shall create an inference that the defendant intended to violate this section:

(a) The presence of an unauthorized connection of any kind between the defendant's property or the premises occupied by the defendant, and any network, system or facility owned or operated by a communication service provider; or

(b) The presence on the defendant's property or the premises occupied by the defendant, or in the defendant's possession or control, of any communication device which is connected in such a manner as would permit the unauthorized receipt, interception, acquisition, decryption, transmission or re-transmission of a communication service; or

(c) The defendant's possession of five (5) or more communication or unlawful access devices for any purpose prohibited by this section; or

(d) The existence on the defendant's property or the premises occupied by the defendant of any connection, wire conductor, microwave antenna, lockbox key, pedestal key, lockbox tool, or any device whatsoever, or connection in any pedestal or lockbox, which is connected in such a manner as would permit the receipt of a communication service without such service being reported for payment to and specifically authorized by the communication service provider; or

(e) The giving of a false name or identity to a communication service provider in order for the communication service provider to provision a communication service to the defendant's property or the premises occupied by the defendant.

Where a communication service provider notifies the owner or the occupant of the premises of the circumstances described in subparagraphs (a) through (e) above and the same circumstances are found to exist within a reasonable time thereafter, an inference shall be created that the defendant or owner and/or occupant of the premises acted willfully in violation of this article.

SECTION 16-11-856 Civil Actions.

(1) Any person aggrieved by a violation of this section may bring a civil action in any court of competent jurisdiction. "Any person aggrieved" shall include any communication service provider. The inferences set forth in Section 16-11-855(11) shall apply in any action under this article. For purposes of establishing liability,

the entry of a plea of guilty, the forfeiture of any bail or bond posted or the entry of plea of nolo contendre for a violation of this article shall have the same effect as a conviction after trial.

(2) The court:

(i) may award declaratory relief and other equitable remedies, including preliminary and final injunctions to prevent or restrain violations of this article, without requiring proof that the plaintiff has suffered, or will suffer, actual damages, irreparable harm or lacks an adequate remedy at law;

(ii) may at any time while an action is pending, order the impounding, on such terms as it deems reasonable, of any communication or unlawful access device that is in the custody or control of the violator and that the court has reasonable cause to believe was involved in the alleged violation of this article;

(iii) may award damages as described in subsection (3) below;

(iv) shall award reasonable attorney fees and costs, including, but not limited to, costs for investigation, testing and expert witness fees, to an aggrieved party who prevails; and

(v) may as part of a final judgment or decree finding a violation of this section, order the remedial modification or destruction of any communication or unlawful access device, or any other devices or equipment involved in the violation, that is in the custody or control of the violator, or has been impounded under subparagraph (ii) above.

(3) Types of damages recoverable. --Damages awarded by a court under this section shall be computed as either of the following:

(i) Upon his election of such damages at any time before final judgment is entered, the complaining party may recover the actual damages suffered by him as a result of the violation of this article and any profits of the violator that are attributable to the violation and are not taken into account in computing the actual damages. Actual damages include the retail value of any communication services illegally available to those persons to whom the violator directly or indirectly provided or distributed any communication or unlawful access devices. In proving actual damages, the complaining party shall be required to prove only that the violator manufactured, distributed or sold any communication or unlawful access devices, but shall not be required to prove that those devices were actually used in violation of this article. In determining the violator's profits, the complaining party shall be required to prove only the violator's gross revenue, and the violator shall be required to prove his deductible expenses and the elements of profit attributable to factors other than the violation; or

(ii) Upon election by the complaining party at any time before final judgment is entered, that party may recover in lieu of actual damages

an award of statutory damages of between $1,500 to $10,000 for each communication or unlawful access device involved in the action, with the amount of statutory damages to be determined by the court, not the jury, as the court considers just.

(4) In any case where the court finds that any of the violations of this article were committed willfully and for purposes of commercial advantage or private financial gain, the court in its discretion may increase the total award of any damages amended under subparagraphs (i) and (ii) above, by an amount of not more than $50,000 for each communication or unlawful access device involved in the action and for each day the defendant was in violation of this article.

SECTION 16-11-860 Severability.

The provisions of this Article 8 are severable. If any part of this Article is declared invalid or unconstitutional, such declaration shall not affect the part that remains.

SECTION 16-11-861.

The provisions of this Article 8 shall not apply to any state or local law enforcement agency, any state or local government agency, municipality, or authority, or any communication service provider, lawfully acting as such in accordance with any other state or federal law.

You know I wondering where those skuds came from that were shot at
Kuwait. Pretty dumb of us to build them and then let them use 'em.
:)

> Q- Thank you for staying up all night and cutting and pasting. You must
have
> invested quite a lot of money in online - subscriptions.

First of all, I did not "stay up all night", or "invest" anything but a
little time.

Second, I don't understand how quoting is considered plagiarism. Everyone
else quotes, it's just a quote. I quote, it's plagiarism. Go figure.

Next, I don't even know what this link is:

> http://www.worldpaper.com/

Next, I didn't know that I was required (as nobody else has been held to
that) to create a bibliography of my sources, but yes - I DID get the info
about "David Remnick's Military Snafu" from the following link:

>
http://www.newyorkmetro.com/nymetro/news/people/columns/intelligencer/3369/

Next...although psrt of my information can be found here:

>
http://www.amazon.com/exec/obidos/tg/detail/-/0671506889/104-0762275-2317537

I did not use this link for it - and don't ask me WHAT link I used - I have
no idea - as I said - I wasn't aware of the bibliographic requirement. So
many post here making ludicrous accusations and are never required to relate
any quotes or reveal the alleged source of their information. Again, I
didn't realize that I was held to a different standard.

> Still you successfully pointed out that this person may be capable of
> unscrupulous journalistic behavior.
> But I didn't ask about that. I asked about the article and the facts as
they
> are described in it. I asked that you not impart insults or other
> "Rush-isms".

I believe my remarks here answered that. To YOU, what he presents are
"facts". I merely pointed out that his "facts" should be taken with a grain
of salt, as, by his own admission on at least ONE occassion, he wanted to
"hit the big one" and "get out" as he was tired of writing.

> You tell us of a man who would rearrange the facts to gain money and fame
> and to defame those whom he opposes.
> That is an accurate portrayal of "Rush". But I did not ask about Rush.

Rush Limbaugh does not present himself as a "journalist" - by his own admission, he's an entertainer. That he makes big money from his entertainment is a testimony to his effectiveness as an entertainer.

> You did not talk about the article:
> http://www.newyorker.com/fact/content/?030331fa_fact1

Umm...okay, if I wasn't plain enough...
I can only take that article with a grain of salt, especially considering Mr. Hersh's lack of credibility - remember, even those that LIKE him say he hasn't really done anything since his Viet Nam piece that got him the Pulitzer. That it was presented in a liberal rag like the New Yorker, that is anti-capitalist (relates to ads that are "decadent consumerism", etc.) and considered a liberal rag even by most New Yorkers, a magazine that spent more time on articles about the "horrors" of the atomic bomb being dropped on Hiroshima, and not even a fraction of as much print on the "horrors" of Pearl Harbor, and has hired other "muck-rakers" to boost their ratings.
To be fair, the New Yorker WAS a great publication, say, 50 years ago, but much of that has changed. Not that everyone doesn't go for ratings, but there should be some standards that they follow in that regard. They STILL have some interesting reading, and it's a shame that they feel it necessary to ruin their publication by giving a forum to such people. Like Peter Arnett, he cannot rest on the laurels of what he accomplished YEARS ago.
As for the specifics of the article itself...doesn't it strike even YOU as odd that Algore criticized the current Administration vis-a-vis Iraq when he supported Clinton's actions there?
Like others that somehow think that they have "expertise" and some other kind of mystical knowledge of what goes on in the Pentagon and other parts of the government, he presents as "fact" second-hand information regarding a "highly classsified" meeting that took place at the Senate Foreign Relations Committee - again, not being cleared for "highly classified" information from the SFRC, where could he get such information? As previously stated, if he can't find it, he'll make it up - whatever sells.
That's not to dispute that the documents in question didn't turn out to be alleged forgeries, but one must try to think beyond what is obvious and ask who may have forged them and to what end? That the "yellow cake" in question comes from "two uranium mines controlled by a French company," may shed some light on that. As the French were already by that time arguing against any action in Iraq, and considering other evidence of France supplying Iraq with banned weapons and technology, one might make the argument that France had something to gain by embarrassing the US and UK.
Before you attack that last statement, let me remind you that this is an extrapolation/assumption on my part and the part of others. At least I PRESENT it as such, and not as "fact", as I am making deductions from observations of available data, as Mr. Hersh does, the only difference being he would present it as "fact".
As for the conclusions of the documents in question being fake, it wouldn't be the first time that a government of ANY country has acted on bad intel.

But as you should know the actions in Iraq were not based on those documents - if true, they would have bolstered the Administrations position, but in and of themselves were not the basis for the decisions made regarding Iraq.
If, indeed these documents WERE designed to embarrass the US/UK, they were successful in that regard. But then Hersh goes on to say:

"The Bush Administration's reliance on the Niger documents may, however, have stemmed from more than bureaucratic carelessness or political overreaching. Forged documents and false accusations have been an element in U.S. and British policy toward Iraq at least since the fall of 1997, after an impasse over U.N. inspections."

Again, he would imply that the Administration was using these documents as some type of primary justification for war with Iraq, and he goes on to make unsubstantiated remarks about such false documents and accusations being an "element of policy" since the fall of 1997.
Caertainly there were desenting voices from France, Russia and China - countries that have, again, supplied Iraq with banned weapons and technology. Their interests in NOT wanting to depose Hussein are obvious. To say that "then as now, the British and the Americans were losing the battle for international public opinion." is once again something that is blatantly not true - the opposition was just supplied by those illegal suppliers to Iraq and radical Muslims in the middle east. Before you debate this, keep in mind that the coalition is growing - not shrinking. Those that oppose the war point to polls in countries that agree with their opposition, but worldwide, on the whole, the actions in Iraq have more support than dissent.
Again, Hersh quotes a "former Clinton Administration official" that told him that London had resorted to, among other things, spreading false information about Iraq. He then goes on to say that "Over the next year, a former American intelligence officer told me, at least one member of the U.N. inspection team who supported the American and British position arranged for dozens of unverified and unverifiable intelligence reports and tips-data known as inactionable intelligence-to be funnelled to MI6 operatives and quietly passed along to newspapers in London and elsewhere."
It goes on, but suffice it to say that he keeps quoting unknown entities to bolster his argument. He goes on with other paranoid ramblings, not even attempting to shed the light on the slightest bit of proof for his allegations. Anyone can make allegations - I, for example, could say that a "source" that was once close to you told me that you like to dress in womens clothing and sniff little boys bicycle seats. Just as there are those that respect your opinion - and you can count me among them, though I may not agree with you on all things, there are those that respect MY opinion, and would be inclined to believe this, regardless of the fact that it's not true. You could do the same of ME, and get the same results. I can't speak for you, but without empirical evidence that such allegations were true, such as, say, a video tape that was confirmed to be authentic, showing you wearing a pink tutu and committing the other aforementioned acts, and even THEN would question the use of presenting such information, I, at least, wouldn't jump right out into any forum that would print what I had to say and call it "facts".

As you know, the events leading up to this moved quite quickly. That the documents were false and thus intelligence bad is nothing new. Information cannot be assimilated instantaneously, which somehow STILL hasn't got through to the journalists who keep asking the same questions of CentCom and the Pentagon, like "when will it be over?" "How long is it going to take?" What should be noted is that the documents WERE funneled out, and taken out of the loop, so to speak.
Again, Hersh says, "A former intelligence officer told me that some questions about the authenticity of the Niger documents were raised inside the government by analysts at the Department of Energy and the State Department's Bureau of Intelligence and Research."
As can be noted by the libel suits Hersh has faced and, indeed is STILL facing, regarding his penchant to take whatever information is presented to him and put them out as "facts", these statements can, again, only be taken with a grain of salt. That he's known to be a magnet for whatever information someone wants to get out only tends to put his credibility in question.
He goes on to rightfully point out that the Administration's decisions regarding Iraq were not based solely on those documents, but then uses his twisted logic to support his argument, and bring the credibility of the FBI into question.
Funny, I don't recall Mr. Hersh doing that under the last Administration.

It's important to keep in mind that we ARE in a state of war. As others have pointed out, this is not the time to disclose such allegations. There will be plenty of time when the smoke clears to analyze all information and propriety. But to continue to do so now only makes the job more difficult than it already is, and bolsters Hussein's megalomaniac delusions.

The UHF GP-68 model is type accepted, so the VHF may well be also. But what does it matter.....??? If you are in the USA, don't bid.

Actually, after looking over the SC legislation, VCR's and music cassette recorders may be more threatened than the scanner. Scanners (and other radio devices - ham radios, CB's, etc) only seem threatened if they have been modified to receive frequencies outside their original design (including cellular phone, television, broadcast radio, and similar frequencies). The legislation excludes reception by air using a dish or antenna, but not modification of such equipment.

Ciao a tutti,
sono un neofita del radioascolto e sto cercando
qualche pubblicazione o sito o altro che possa con un linguaggio da
bambino di sei anni , spiegarmi un po' di cose utili per cominciare a
masticare della materia senza brancolare nel buio, tipo ....
differenza tra uhf, vhf ecc.. ecc... le onde lunghe, medie corte ....
... rtty, usb, lsb ... ecccccccc.....
insomma un po' di tutto senza dare per scontato che uno sia gi&#65533; un
ingeniere informatico.
Mi piacerebbe approfondire un po' le mie scarse conoscenze, cos&#65533; magari
un giorno capir&#65533; anche che cosa sto ascoltando, come e perch&#65533;.
Grazie a tutti coloro che vorranno rispondermi.

```
Ciao - dspg63
```

Well that was extremely interesting, and thanks for taking the time to give
a reasonable representation of your point of view.

I agree with practically everything you say, but I do think that when the
smoke clears, that in as much as things can be proven, the evidence points
to the fact that our government mislead us in this case in order to bolster
support for starting this war.

But I do take exception to your use of the "liberal". It is taking what once was an ordinary word and turning it into a word that describes something unspeakable. Like the word nigger. It is a cheap tactic. Those who do that are doing a disservice in the eyes of many, including many republicans.

On what basis are you saying our posts are spam? We are simply
replying to other posts. I suggest you search the internet and
learn the definition of spam. You are not very bright for someone
who claims an IQ of 160.

>

Don't flatter yourself that I really believed you have an IQ of
160. I said you *claim* to have an IQ of 160, it is evident to the
most casual of observers that you don't. Your IQ is most likely
about half your shoe size.

ok, so i did. sorry...

here's the deal dude, i didnt post any of my messages relating to anything your even talking about, not to mention all the last ten posts that you and Q are posting in here are totaly spam, that's besides the point i was trying to prove.

The thing that's wrong is you and him keep talking as if your opinions are fact, and keep defending them by attacking everyone else... its' just ridiculous. Look, over half of the messages are from you two. Youre just throwing gas into the fire....

Now think about this: I dont have an IQ of 160... I toatly lied to help prove my point that ALL OF THIS IS STUPID and that its all a joke. But you *very* unexpectedly actually believed me about the IQ joke.... in the same email with a file called "youre proving my point.mp3"

Really, have you *ever* heard of sarcasm??

Of course you have, but the question I just asked, that was sarcasm too. Of course I know you've heard of sarcasm... but yet you still dont get the joke. You probably thought the line above was me insulting you... well...

You really are proving my point, and I'm not being sarcastic.

Not only that, but you still are posting around attacking other people's opinions that are different than yours, and I think that's pointless.

For one thing, what value should be placed on an opinion of someone who believes everything they are told??? (like 160 iq, rofl) What would you believe that people people who apear to have clout, talk radio, the news, and politicians tell you??

now... prove the point to yourself. I'm not starting any wars here, I was making light of the situation, that's why I sent you that mp3 about mediocrity, I'm not calling you mediocre dude. Or Q either.

the joke simply went over your heads... so i'll stop now.

besides i have alot of packing to finish.
later

Ah, so now you are an expert on how the universe came to be as
well. You know much more than all the astronomers and physicist
who have studied the universe for hundreds of years.
So please explain to us the mysteries of just how the universe
came to be. I am waiting for this revelation that the astronomers
have been searching for all these years. I am sure they would like
to know as well, it will save them many more years of research.
It is obvious you simply know everything there is to know, so
please enlighten us.
With all your great knowledge I just can't understand why you are
not in charge of the country, in fact, in charge of everything.
Have you written to Washington to tell them just how smart you
are, that you have all the answers to everything, and they should
put you in charge? No, why not? I am sure Bush would gladly step
aside if he only realized that you could solve all the world's
problems with your vast knowledge. I bet your IQ is even higher
than jesseq's. Wow, how privileged we are to be able to exchange
barbs with such an all knowing person. Oh, just had a though,
maybe you really are not a person, maybe you are God him/herself!!!!
Shhhhheeeeeeeessssssssss!!!

You believe in gods. You just lost all credibility of being intelligent. If the Pope believed in his god, he would have gone to Iraq and did exactly as suggested above.

No one in the church government believes in god. If priests did, they would not be molesting little boys, because they would know that god would know this and punish them. They know it is all a bunch of bullshit to make tax free money with. If they believed it, they would not rape little boys.

If the Pope believed in god, he would go to Iraq now.

It doesn't take it out for a while, it would have been permanent. No one in Baghdad would be watching the station either if they used it. They can't use it in Baghdad for many reasons. One is that all the equipment the press is using in Baghdad would get destroyed. Since we still see them live from Baghdad every day (Oh, sorry, YOU won't because CNN and Fox News got kicked out of Baghdad for spouting too much propaganda, yet the BBC was allowed to stay and they are the enemy too.)

The day the e-bomb is used near Baghdad, is the day you no longer get that live image from Baghdad anymore.

In many cases, having the international press in Baghdad is a plus for Iraq.

> Actually, the military admits to having microwave bombs that simulate
> the electronic shock that would be experienced in a nuclear blast. I
> was watching several news channels the other night and all of them
> claimed the US had used one of those bombs near the Ministry of
> Information.

It was tested in 1958 over the Pacific Ocean. And caused damage in Hawaii as well as disrupted communications as far as Australia. There was testing and photographs of the e-bomb in the 1980s, from AVIATION WEEK & AEROSPACE TECHNOLOGY

Yet of course, General Franks claims he has no idea what this is:

WASHINGTON, March 5 (UPI) -- At least three senior defense officials in the last two weeks have denied any
knowledge of the rumored, so-called "E-bomb" -- a device that is reported to deliver a powerful electronic pulse that could fry the circuits of enemy weaponry and computers without directly harming humans.

The latest denial came from U.S. Central Command Chief Gen. Tommy Franks, who would head a possible
war with Iraq where various news reports suggests the weapon could make its debut.

"I can't talk to you about that because I don't know anything about it," Franks said.

Air Force Chief of Staff Gen. John Jumper told reporters in February he knew nothing about the device.
Another senior official said Wednesday that he could offer no details as he had none.

Defense officials, including Defense Secretary Donald Rumsfeld, have confirmed high-powered electronic pulses are unde study, but none has confirmed that such a device has been made into a weapon and is ready for a debut in Iraq.

Really Mr Rumsfeld?
[E-bombs] can unleash in a flash as much electrical powerï¿½2 billion watts or moreï¿½as the Hoover Dam
generates in 24 hours. [And], although the Pentagon prefers not to use [E-bomb] weapons on the battlefield,
"the world intervenes from time to time," - Defense Secretary Donald Rumsfeld.
-Time Magazine, 1-19-03

"Citing unnamed sources, U.S. military officials reported yesterday that a preliminary Iraq battle plan outlined for

President Bush...calls for the most extensive use of electronic warfare in history -- including secret new electromagnetic pulse
weapons to disable Saddam (Hussein)'s entire command and control structure."
-New York Post, 8-14-02

Be assured that we have not used them yet, as the press are still using all their equipment without problem.

It will be obvious when they are used. For one, the young rambo kids in our military that are sending missles into Kuwati malls and dropping bombs on British tanks, would most likely blow out all of our own electronic equipment with the first use.

They weren't scuds. They were chinese silkworm cruise missiles. But of course, just ask the LIBERALS, that makes it OK.

"Poor Saddam, you see, is only defending himself against big bad us. It's all dubyas fault. He just wants the oil."

Gawd, I wish they'd stop. I left my hipwaders and s--tshovel in my other truck.

LOL, Cowboy! He was watching too much basketball! I had to play with my
radios! ;) You little devil you!

It is love...sweet sweet love. Honestly, my "bloke," Matie, is a tad bit poor, himself! But it's better to be poor and in love than rich and depressed! :) I often tease him that I married an older gentleman and I didn't even get anything out of it. Nothing but love, but that is worth all the money in the world to me. :)

This is my simple religion. There is no need for temples; no need for complicated philosophy. Our own brain, our own heart is our temple; the philosophy is kindness. Dalai Lama

> The US government does not jam the external radio broadcasts of any country.

Oh yes they do. The distinctive beep-beep-beep is nothing else but a jamming signal, and sources of these signals have been located to US military sites by such magazines as Monitoring Times and Popular Communications. Sometimes they even use thier own VOA on different frequencies to jam other stations from being heard.

The fact that Radio Marti exists should put a quick end to any fantasies that the US is above this type of activity.

> Americans are free to listen to their propaganda from any source they wish.
> For instance, Radio Havana Cuba is one of the most popular shortwave radio
> services amongst SWL's in the US.

And that is the very station I first heard the US jamming. As soon as the anti-American news story came on, the loud beeping started. I heard it more than once, and always during non-favorable political news stories. They usually leave the guy with his ham radio show on that station alone. That is one of their best programs.
I forget the guy's name. The one that starts out with him calling CQ like a typical ham might, but it is a broadcast program from Radio Havana.

> Just because people in totalitarian countries are not SUPPOSED to listen to
> external radio services, does not mean that they do not.

Unless they are jammed. The fact that the US does it, makes it not to unprobable that Iraq might do it. All governments are protective about what their citizens get to see and hear. Thus why our news of the war is so censored in the US. The BBC shows more, and has more of "the other side" and they are fighting against Iraq too!

> There will always
> be people who are curious, or push the envelope. Be happy you live in a
> country where you do not have to sneak around to listen to what's going on
> in the rest of the world.

I don't live in such a country, I live in the USA. I have to keep searching the web and shortwave to get the news my government is hiding from me. Some websites get shut down or hacked into that have this news, yet none of the American pro-war sites ever seem to get shut down or hacked into. Interesting, isn't it?

The rest of the world is lucky. The subscriptions for Al Jazeera television has skyrocketed in Europe as they look for something other than CNN to get their news from now. They are to come out with an English service soon, but I won't

hold my breath that I will see it on my TV set anytime soon.

Remember, it is a law now that we can't ever show our US soldiers being brought home in the flag draped coffins anymore after Bush #1 got pissed off about it. The reasoning is that if too many Americans see stuff like this, the support for the war may drop. My thinking is that if the only way to get American support for war is by hiding information and the truth from them, then no wonder the rest of the world is against this war and Americans are so for it.

It is because I am working so hard to find news I am not supposed to be seeing, that I understand what the rest of the world understands.

Hey, it is no different that when a jury makes a conviction but was not allowed to hear or see all the evidence, only what the judge wanted them to see and hear, then the news stories about afterwards when they found out everything the rest of us knew and wished they would never have voted guilty.

What a crooked mess-up government.

Regime change and liberation starts at home!

"I watch the Fox
News Channel,
because they're
unbiased and
support the war 100
percent."

Frank, ;)

Unfortunately one thing I never learned in life was how to hurt someone's feelings. I don't do a good job at it. My parents should have worked harder at teaching me to hurt others than love them, as I would have been much better to protect myself against such things as internet "trolls." But, I have to give them credit, love gets me much more than hate. :) So, I've given up my flame war with those that seem to enjoy picking on a girl who is probably half their age!

Their parents should have taught them that gentlemen don't do that to women. If their parents are dead I'm sure they're rolling in their graves! I don't care what I say to them, a gentleman should just tip his hat and keep strolling along.

But, I'm just not skilled at hurting people, obviously. I'll just stick to what I'm used to and keep on LOVING everyone! *SMMMMOOOOOOOCH*

MnMikew, I thought about that myself just today. Gee, how ignorant of me to waste my time arguing with people who sit behind their computers trying to be someone else! After all, these are just words written on a screen. Ah! Words.... Nothing more than little binary digits floating through cyberspace. No ouchies here anymore!

Good way to avoid the statement you will never be able to find fault with, by twisting the subject to language, spelling, using all caps, etc.

Now, back to the excellent statement that was made. People did believe the world was flat based just on what they were told. Like the idiots today who believe in the Big Bang Theory and that the Universe (existence) had a beginning. As if you could create a Universe without there being any existence to create one in. What explosion can occur if there is no Universe (or existence) for it to explode in? Yet, no matter how ridiculous the theory, it must be believed because that is what they told us in school, like the earth being flat centuries ago.

Hey CNN didn't get enough satisfaction for firing Peter Arnett for telling people the truth, now they broadcast a story on him to get people all mad at him and got him fired from NBC. What assholes. I thought we are supposed to be free and have free speech? What a crock of bullshit!

Monitoring TImes and Popular Communications are pretty widely rejected by the experienced SW DX community, like Cumbre DX. They are hotbeds of conspiracy theories and clandestine radio opinions. The best one was the idea that Radio Swan/Radio Americas was not on Swan Island, but somewhere else. Which was funny, since I personally saw the transmitter on Isla de Cisne.

> The fact that Radio Marti exists should put a quick end to any fantasies
that
> the US is above this type of activity.

Radio Mart&#65533; proves nothing. Radio Mart&#65533; is the name of a program service of the USIA, not a separate orgnaization. It operates on what was a US Clear Channel, 1180, which was clear in Cuba per the NARBA agreement that was never rejected although often violated by Cuba (shuch as in the JAmming of WAQI, WQBA and other US Spanish stations that do not even program for Cuba). If anyone should be upset, it is WHAM in Rochester, the NARBA-chartered occupant of 1180 in North America.

Similarly, the SW frequency used by Marti has never been used in Cuba during any momento of the Castro dictatorship.

Funny, but what you are reporting is definitely not what the reliable radio clubs and actual monitoring supports. I know of a number of radi news departments that use Radio Habana as comic fill, and they never have any reports of jamming... even in Miami.

> Unless they are jammed. The fact that the US does it, makes it not to

Please cite some evidence other than your fertile imagination that the US jams any radio broadcasts.

> had a mandate, you'd think he had.

What was the number again? Something around a half a million votes behind Gore? But then they tell you to make sure you go out and vote, because EVERY VOTE COUNTS. Man, half a million people's votes didn't count! Then they say if you don't vote, you don't have the right to complain. So now that people voted for Gore and Browne, do they have the right to complain now?

Two bumper stickers I have seen:

Don't blame me, I voted with the majority.
Don't blame me, my vote didn't count.

> This again? Even Algore's lawyers recounted the votes - SEVERAL times, and
> each time, Algore STILL lost.

How did they keep missing half a million votes that Gore had over Bush? Oh, that's right, the rest of the country doesn't count, only the state of Florida since Jeb Bush could see to it that the votes came out in his brother's favor.

> To be certain, Bush did not win by a
> "landslide",

No he didn't, but Gore won by a half a million votes.

> but you should keep in mind that Clinton was the LEAST voted
> for President in the history of the Unied States that STILL was elected into
> office.

It doesn't matter if you only get 3 votes. If only 5 people bothered to vote, then that is the majority of votes.
At least Clinton got the majority. In BOTH his elections. Bush still has never gotten a majority. And when his dad tried to start a war before the election to hope that he would get reelected, it didn't work for him, yet Junior doesn't learn from his pop's mistakes, just repeats history.

> The turnout for his last election was the lowest in history, as
> people didn't necessarily want to vote for HIM, but felt they had no real
> choice, so many chose not to bother.

And even fewer will bother now that they learned their votes didn't count at all anyway.

Seriously. Why bother? If one candidate can get a half a million votes more than the next highest candidate and still not get elected, then what is a person supposed to think about their one single vote?

I think the government just has voting to see how many people are still stupid enough to show up and believe the system works. The day no one shows up, they will get the message. Or if people would at least wake up and vote for one of the other 12 guys on the ballot for once. What have you got to lose? The electoral college will see to it that they don't win anyway, and at least we can all show the government we are not going to support your two "government approved party" system anymore.

Those are beacons and other assorted electronic hash - probably from
electronic gadets!!! I once heard a modem over one of the SW bands - at
least it had that squeal-beep-beep that modems do when they're
"handshaking."

> I forget the guy's name. The one that starts out with him calling CQ like a
> typical ham might, but it is a broadcast program from Radio Havana.

I have been listening to Radio Havana Cuba's English and Spanish shows
since 1991 when my uncle gave me his Zenith Tranoceanic Royal D7000Y.

I also would listen to Radio Marti, but they're pretty boring.

There is no jamming of Radio Havana. You're full of it.

I also listen to Radio Reloj (all news) and Radio Rebelde's webcasts at
work occasionally to catch up on news and stuff....

The USA government doesn't jam that either (they could potentially block
access to .cu domains just like France and other countries do to certain
websites).

The first overseas (Canada not included) radio station I remember tuning
into as a child was Radio Kiev (not the now-defunct one in Los Angeles) on
a half-dead portable radio/cassette recorder.

They were doing English news broadcasts and the signal was coming very
clear.

This was back in 1988/89. The Soviet Union was still in existence.

Dwight, thanks. Breathing a little better today. I figured out what it
was yesterday that I was responding to. It was just a little bit of radio
noise and what I should have done was switch it off! *Click* Then it's all
gone. In fact, I hardly remember any of it. :)

Well..the country of Israel as we know it today is fairly recent. It was established in what...the late 40s, 50s or something.

Shortly after the Second Worldwide Slaughter...the Brits divvied all of that up. Then the neighboring countries (Egypt, Jordan, etc.) weren't all to happy to have a bunch of Jews living in their back yard and they tried to raise Cain.

The Jews fought back...and beat the holy crap out of their agressors and took some of their land (parts of which they have returned). :-) :-)

Of course if you believe the Bible, the ethnic group that lays claim to this strip of land has been around for thousands of years.

There have been wars, invasions and occupations over the years - Medes, Persians, Philistines, Romans....etc.

Goes with the territory, I guess.

Moses was a "recent" leader, too?

Not forgetting Over The Horizon radar, which is, or was, notorious for sweeping up and down the band with its distinctive noise. The USSR had many of these installations.

My newsroom in Ecuador in the late 60's always checked RHC, and, as long as propagation was favorable, we never heard jamming at all. Generally, interference was from Argentine or Brazilian SW stations in regular operation.

A dozen or so Cuban AMs are regularly listenable in South Florida; none is jammed. I have heard about 60 of them at night from the western edges of Miami.

This is my simple religion. There is no need for temples; no need for
complicated philosophy. Our own brain, our own heart is our temple; the
philosophy is kindness. Dalai Lama

Now she sounds like a damn broken record with that this is my simple...crap.
She is starting to remind me of Buford T. Pusser from Smokey and the Bandit.
Where he was always going.,...OHM, OHM, OHM to keep his heart rate down.

JJ you have it all wrong dude... John was not saying he knows anything about the universe.

I got the point though, he was simply making a point of the fact that NOBODY knows anything about the universe really, its ALL speculation.

Why you go on posting against him and me, for not having an opinion.. in fact saying that we DONT know what were talking about.... thats whats futile.

I believe John and I (correct me if im wrong john) is that nobody can know anything for sure to be fact in the war on Iraq. Not even the highest of the high in the chain of command on the US or Iraqi side.

So for you to be continually posting about your opinions as if they are fact is reduculous. You dont know for a FACT anything of what you say to be true... just as much as NOBODY knows anything about the universe to be the truth.

is that how you feel too John?

Hello to all, they are a neophyte of the radioascolto and I am trying some situated publication or or other that can with a language from child of six years, to explain to me a little things useful in order to begin to chew of the matter without brancolare in the buio, type.... difference between uhf, vhf etc. etc... the long-wave, medium court..... rtty, usb, lsb... ecccccc..... insomma a little all without giving for discounted that one is already to ingeniere computer science. It would appeal to to me to deepen po' my insufficient acquaintances, therefore a day I will even understand also that what I am listening, like and why. Thanks to all those who will want to answer to me. Hello - dspg63

http://babelfish.altavista.com/

Translation Web Site, I use it for such occasions. Not perfect, but close enough, certainly better than that below.

Regards.

>does it matter.....??? If you are in the USA, don't bid.

If it's being used in the amateur 2-meter band, certification (nee
"type acceptance") is not required in the U.S.. It's necessary for
amateur equipment to comply with the power, spurious-emissions, and
other limits specified in Part 97, but it is _not_ necessary for the
equipment to have been formally certified or tested to meet those
limits.

> > In Iraq, if everyone checked the NO box, Saddam would have lost.
>
> HAHAHA!!! Lost what? Are you really so dumb as to think he would
> step down from power?

Bush hasn't yet. But you still don't see that 100% of the people voted for Saddam to stay, do you? This is something Bush can only DREAM about. Hitler also got a majority of the vote while the government was still a democratic one!

Considering only a handful of people voted no in a prior election, and how Bush forced the Iraqi people to love Saddam even more by Bush's actions, what idiot would waste time running against Saddam? Since 100% voted for Saddam, that would mean that no one else thought they were better than he was or there would have been one NO vote, and an extra man on the ballot.

> > In a previous
> > election, there were actually about 5 or 15 (forget the exact number off hand) people
> > that did not vote for Saddam.
>
> And they probably did not live to vote again.

Why do you say that? It was a secret ballot and no names were on them. How would he know out of millions of people how each voted? The elections were televised and I saw people putting ballots in the box without anyone checking it first.

> > Did you ever stop to think that if everyone is happy with a leader, that there would
> > not be anyone running against him?
>
> Just who do you think Saddam would allow to run against him?

Sure, he would just do what Bush did, have other people run against him, then take power anyway. See? Why couldn't Saddam do the same thing? He could have an electoral college system too. They could consist of his two sons, and their votes would count, and the people's wouldn't. Just like in the United States!

> > How many people voted for Bush?
>
> More than voted for Gore.

Gore had about a half a million more votes than Bush. How can you even argue this without doing the research first if you didn't know about this?

> > And you are making fun of Iraq's election process?
>
> No, you can't make fun of something that doesn't exist. Having
> only one name on the ballot and being forced to vote yes is not an

> election.

You have never voted before then. I see at least 2 or 3 offices on the ballot every time where there is only one candidate running. Unfortunately there is no "NO" hole to punch, so he ends up winning anyone if just one idiot punches the hole. What kind of election is that?

You need to start looking at your own election ballot before you start making fun of something that is not much different on another country's ballot.

HELLOOO! Thank you! The ultimate jamming is to bomb it away like we are doing to their radio and TV stations now. But, the US doesn't ever do this at all according to someone else on here.

> there was no attempt to block it's
> English-speaking programming (of which there was very little).

No, of course not. That beep beep beep originating with a much more powerful signal originating from the United States that I heard was just a dream. And that article in Monitoring Times or Pop Com that I read backing it up was all fantasy too.

Gees people. Wake up, you government DOES do this type of stuff!

well i have to go move, now unpluggin my box for a few days. anywho just wanted to say you're right John... Regime change and liberation starts at home!

but thank god for the internet.

I got a great laugh out of this statement, whoever wrote this - thanks you made my day:

> "I watch the Fox
> News Channel,
> because they're
> unbiased and
> support the war 100
> percent."

Not only do I disagree with that statement, the statement itself is an idiom. If you dont see that... which you obvously dont, then you probably also dont think that your news is censored.

"BHhhaaaaaa.... Mmoooooo..... BHhhaaaaaa......"

later John boy,
cheers - keep seeking the full truth

Compared to the real palaces of many nations, including some with far less riches than the USA, the White House is truly egalitarian. Camp David is near-Spartan by world "palace standards."

Most folks would agree that it is conducive to good decision making to have the decision makers in a good environment. Even Pol Pot and Papa Doc believed that.

Don't worry about it Clip. She's one of those "self proclaimed" geniuses that feels she's above reproach because she's so smart.

She says she's a genius, demands to know your IQ then just noses up saying "Well mines higher than that." Yeah right. Prove it missy. So far all she's proven is that she can act like a pompous little snot without a clue about life in the real world. I can't believe people like that actually find and keep employment anywhere but in fast food restaurants. Go figure that she accuses us of the same!

I think you mean Bufort T. Justice, Sheriff Pusser was a real person from Tennessee. He was immortalized in "Walking Tall".

John Simmons blathered again:
>>>In Iraq, if everyone checked the NO box, Saddam would have lost.
>>
>>HAHAHA!!! Lost what? Are you really so dumb as to think he would
>>step down from power?
>
>
> Bush hasn't yet. But you still don't see that 100% of the people voted for Saddam to
> stay, do you? This is something Bush can only DREAM about. Hitler also got a majority
> of the vote while the government was still a democratic one!

And you would have voted for Bush too if he had been the only one
on the ballot and you knew that a no vote would probably mean you
would not live to vote again. By the way, 100% of the people did
not vote for Saddam, many did not vote because they knew there was
only one choice on the ballot and they knew a no vote could mean
death, so they just did not vote. Anyone who voted knew they had
better vote yes.

>
> Considering only a handful of people voted no in a prior election, and how Bush forced
the
> Iraqi people to love Saddam even more by Bush's actions, what idiot would waste time
> running against Saddam? Since 100% voted for Saddam, that would mean that no one else
> thought they were better than he was or there would have been one NO vote, and an extra
man
> on the ballot.

You still don't get it, anyone foolish enough to check the no box
would not live to tell about it.

Lets see, you keep claiming that the Iraqis are not shooting their
own people. Well here is what is being reported.

***
Iraqi forces Monday tried to push women and children onto a bridge
between
Hilla and Karbala that the forces had rigged with explosives,
shooting a woman
who tried to escape, Brooks said at Central Command. Coalition
officials have
accused the Iraqi regime of using civilians as human shields, a
tactic Iraq denies.

In areas around Nasiriya, civilians told CNN they had been terrorized for years by Baath Party operatives.

One Iraqi, who goes by the name Hayat, said through an interpreter that Baath Party "thugs" shot him three times and left him for dead when he refused to fight in the Persian Gulf War. He said he has been trying to eke out a living between subsistence farming and odd jobs since to support his wife and three children.

Baath Party members come by all neighborhoods in Nasiriya on a regular basis to extort money and test loyalty, Hayat said. If neither is forthcoming, he said, "You will be shot."
****

But you still hold on to the illusion that Saddam does not shoot his own people.

And Saddam did not gas his own people. Well here it is.

***
Al Majeed, the commander of Iraqi forces in southern Iraq, is widely known as "Chemical Ali" for ordering Iraqi forces to use chemical weapons on Kurds in northern Iraq in 1988.
***
Notice it did not anything about say Iranian forces using chemical weapons on Iraqis.

Oh, I know, you don't believe any of it though, after all it wasn't reported by your approved news source, the Nation Inquirer. Yessir, that Saddam is a real nice guy, he and you make a real pair.

Here's a quote from you in a previous post:

"Hey, I'll do anything to protect myself from people who try to pick on me.
That IS my right. I was taught to always take up for myself."

And now you say:

"My parents should have worked harder at teaching me to hurt others than
love them, as I would have been
much better to protect myself against such things as internet 'trolls.'"

You're a phony.

Big words from an anonymous troll. You're an idiot. Do not pass go, do not collect 200 dollars. I will laugh and laugh when you get sued for slander and copyright infringement.

Really.

Take your pills, drop the web site and go back to bed. The doctor told you not to strain yourself.

Post the patch - let's see some guts from the anonymous troll!

Yeah right - all talk and nothing more. Yawn. Next!

-me

This crap still does not work!!! We got the new patch and it ran for a total of 30sec before it to locked up, Check out:
<snip>

As you can see, we have a PERFECT MATCH on the headers. What say you now you anonymous little punk? I got you dead to rights - I even have a website AND an IP address that can be used to trace you right down to that little keyboard you hide behind! Hee hee...

I hope the gang at Pozilla gets wind of this. Maybe I'll just be a dick and send them some email today. Or maybe tomorrow.

What a choice - alert them now or wait and watch you squirm? Decisions, decisions.....

1739. uniden e-scanner software

Newsgroup: rec.radio.scanner
Date: 2003-04-01 01:49:41 UTC
From: Charlie Brookhart <cbrookha@erols.com>
Message-ID: <b6ar4qnfk1@bob.news.rcn.net>
Source record: 33854

I downloaded the e-scanner software version 2.0. I have opened the program up and selected the connection tab. I select the bc250d radio and then click auto configure. The software then checks the four com ports at 9600 baud and 19200 baud. At the end of this check, the software states that the radio cannot be detected. The small end of the remote cable is connected to the scanner and the larger end is connected to the back of the computer. There are no adapters in use for the cable. The scanner is turned on. If the scanner is turned on and connected, why doesn't the software configure itself for uploading? I can try the manual settings, but since auto configure didn't work, I don't know what to select for a manual connection. Has anyone else experienced this problem? How can it be corrected?

I'm with you there especialy that Bill o'reilly guy. He aregues with every
single guest. How is that "we report you decide".
It's always his opinion wins.

Evening,
You may have something using the serial port, like a Palm or a backup
unit even though you unplugged them. You have to turn them off.

Burr

I can't fathom why someone would by software for a radio that looks like a radio. Just get a radio.
Or i fyou wanna use software, make it user friendly instead of "it looks like the radio you already have" friendly. Why put a big tuning knob on the screen. A tuning knob is for fingers not a mouse.

Go for it! You'll do just fine. Just relax, take a deep breath and think
logically.
And in regards to the jerk on the internet, you handled that situation just
GREAT!'
Best of luck to you Celt!
Steve

Is your problem the fact that they *claim* to be objective and aren't?
Or the fact that they just aren't? All news broadcasts at least
implicitly hold themselves out as objective, and the voluminous number
of left-leaning ones have never gotten any criticism from the same
people who are now taking on Fox. I agree that Fox tilts right; it's
just the double standard I find curious.

There are several vital things that time will tell. Watch
closely to see how they unfold:

1. Liberation vs. Invasion and occupation

This is the scariest one. Only time will tell whether the
bulk of Iraqis see us as liberators or invaders to be
repulsed at all costs. This will determine in large measure
whether the coalition will be fighting only elite soldiers,
or will be constantly surrounded and engaged by an armed
population of ordinary folks who are defending their home
against invaders.

The ramifications of which way this will go are literally
titanic. The stability of the region is at stake.

2. WMD status

Although informed people never believed wild claims that
Saddam had the ability to threaten other countries with his
WMDs, it seems likely he does have *some* WMDs that survived
the Gulf I bombing, and some percentage (maybe large, maybe
very small) that may still be potent. These are truly
unknown.

Given the pressure to present proof of these WMDs, watch for
Administration "re-classification" of non-WMDs as WMDs to
avoid embarassment, if they fail to find substantial
stockpiles. If this happens, it confirms that the actual
threat was minor. On the other hand, if large stockpiles of
WMDs (as classified before the war started) are found, it
would strongly bolster the case that the war was necessary.
Here, watch to be sure the news reports say the found WMDs
are still *potent*/active, rather than degraded and
useless. If they don't say, it's very possible they found

deteriorated material that actually wasn't a threat but try to pass it off as a real threat.

IF reports come out about large stockpiles of still-active chemical or biological agents, this would be very convincing if reported from multiple sources including non-US sources. Reports of stockpiles with no mention of potency should be viewed with extreme suspicion, however.

3. Aftermath

If the Iraqi people turn out to be largely grateful for being rid of Saddam, governing Iraq ought to be easy. Otherwise, it will be like being in-between tribes of squabbling enemies.

Given the "calm and peaceful liberated Iraq" scenario, the first thing to watch is, are ALL profits from rebuilding and oil sales going to the Iraqi people? Or are there contracts for US oil firms to build filling stations, rebuilding stuff we blew up, etc. that steals the lion's share of money from Iraqis and puts it into the pockets of ultra-rich oil and construction concerns? After all, Bush and others have said that the oil belongs to Iraq, but only time will tell whether these were truthful words. The rebuilding of Iraq cannot be a profit center or it casts grave doubts on our motives.

Another thing to watch is US prestige in the rest of the world, especially our European friends. If it rises over time in the post-war era, this is a great sign.

The other place to look is how will Arab nations view this after it's over? Will their perception change when (if) they see a US/UK genuinely rebuilding Iraq in Iraq's best interest as well as the interest of the region? Or will our behavior confirm their suspicions that this is a neo-colonial conquest at least in part motivated by huge oil profits?
The former case bolsters our credibility in negotiating with Israel and Palestinians. The latter virtually guarantees that radicals will be attacking US interests in retaliation for a long time to come.

Hopefully, it will all be over in a few weeks, and casualties will be well below projections. I can see anything from this to a gradual escalation to near-nuclear war occurring in some scenarios.

And Amen to that too.... I wasn't thinking of HAM, only the original posters bent on it not being for commercial use. Too many panties in a bunch... so it's a ham radio that's already MARS modified. :) Check and see, though and email me direct, I was under the impression it was Part 15 for ham stuff acceptance (as you said, tested only for crappy signal output).
thanks for pointing that out as well, Dave.

A recent report from the BBC Monitoring Station at Caversham described "substantial American jamming" of several Shortwave Broadcast frequencies that was rendering the reception of several countries virtually impossible.

GCHQ (the British Government Monitoring Station) has also reported the same thing.

The BBC reported attempts by the American Airforce to jam Iraqi TV in the first few days of the "war".

PLEASE read what you posted
It does not have one damn thing to do with scanners.
It is to prevent the theft of satellite TV/cable service/cell service.
Which is ALREADY ILLEGAL in most places.

>article to make restitution as authorized by law.
>
>(9) Forfeiture of communication or unlawful access devices. Upon
>conviction of any person for any violation under this article, such
>instrument, apparatus, equipment, device, plan or instructions shall
>be either destroyed as contraband by the sheriff of the county in
>which such person was convicted or turned over to the communication
>service provider in whose service area such instrument, apparatus,
>device, plan or instruction was seized.
>
>(10) Venue. An offense or violation under subsection (a) of this
>article may be deemed to have been committed at either place where the
>defendant manufactures, develops or assembles a communication or
>unlawful access device or assists others in doing so, or the places
>where the communication or unlawful access device is sold or delivered
>to a purchaser or recipient. It shall be no defense to a violation of
>subsection (a) of this article that some of the acts constituting the
>violation occurred outside of the State of South Carolina.
>
>(11) Inferences. In any criminal prosecution under this article or
>civil action under Section 16-11-856, any of the following shall
>create an inference that the defendant intended to violate this
>section:
>
>(a) The presence of an unauthorized connection of any kind between the
>defendant's property or the premises occupied by the defendant, and
>any network, system or facility owned or operated by a communication
>service provider; or
>
>(b) The presence on the defendant's property or the premises occupied
>by the defendant, or in the defendant's possession or control, of any
>communication device which is connected in such a manner as would
>permit the unauthorized receipt, interception, acquisition,

>decryption, transmission or re-transmission of a communication
>service; or
>
>(c) The defendant's possession of five (5) or more communication or
>unlawful access devices for any purpose prohibited by this section; or
>
>(d) The existence on the defendant's property or the premises occupied
>by the defendant of any connection, wire conductor, microwave antenna,
>lockbox key, pedestal key, lockbox tool, or any device whatsoever, or
>connection in any pedestal or lockbox, which is connected in such a
>manner as would permit the receipt of a communication service without
>such service being reported for payment to and specifically authorized
>by the communication service provider; or
>
>(e) The giving of a false name or identity to a communication service
>provider in order for the communication service provider to provision
>a communication service to the defendant's property or the premises
>occupied by the defendant.
>
>Where a communication service provider notifies the owner or the
>occupant of the premises of the circumstances described in
>subparagraphs (a) through (e) above and the same circumstances are
>found to exist within a reasonable time thereafter, an inference shall
>be created that the defendant or owner and/or occupant of the premises
>acted willfully in violation of this article.
>
>SECTION 16-11-856 Civil Actions.
>
>(1) Any person aggrieved by a violation of this section may bring a
>civil action in any court of competent jurisdiction. "Any person
>aggrieved" shall include any communication service provider. The
>inferences set forth in Section 16-11-855(11) shall apply in any
>action under this article. For purposes of establishing liability,
>the entry of a plea of guilty, the forfeiture of any bail or bond
>posted or the entry of plea of nolo contendre for a violation of this
>article shall have the same effect as a conviction after trial.
>
>(2) The court:
>
>(i) may award declaratory relief and other equitable remedies,
>including preliminary and final injunctions to prevent or restrain
>violations of this article, without requiring proof that the plaintiff
>has suffered, or will suffer, actual damages, irreparable harm or
>lacks an adequate remedy at law;
>
>(ii) may at any time while an action is pending, order the impounding,
>on such terms as it deems reasonable, of any communication or unlawful
>access device that is in the custody or control of the violator and
>that the court has reasonable cause to believe was involved in the

>alleged violation of this article;
>
>(iii) may award damages as described in subsection (3) below;
>
>(iv) shall award reasonable attorney fees and costs, including, but
>not limited to, costs for investigation, testing and expert witness
>fees, to an aggrieved party who prevails; and
>
>(v) may as part of a final judgment or decree finding a violation of
>this section, order the remedial modification or destruction of any
>communication or unlawful access device, or any other devices or
>equipment involved in the violation, that is in the custody or control
>of the violator, or has been impounded under subparagraph (ii) above.
>
>(3) Types of damages recoverable. --Damages awarded by a court under
>this section shall be computed as either of the following:
>
> (i) Upon his election of such damages at any time before final
>judgment is entered, the complaining party may recover the actual
>damages suffered by him as a result of the violation of this article
>and any profits of the violator that are attributable to the violation
>and are not taken into account in computing the actual damages. Actual
>damages include the retail value of any communication services
>illegally available to those persons to whom the violator directly or
>indirectly provided or distributed any communication or unlawful
>access devices. In proving actual damages, the complaining party
>shall be required to prove only that the violator manufactured,
>distributed or sold any communication or unlawful access devices, but
>shall not be required to prove that those devices were actually used
>in violation of this article. In determining the violator's profits,
>the complaining party shall be required to prove only the violator's
>gross revenue, and the violator shall be required to prove his
>deductible expenses and the elements of profit attributable to factors
>other than the violation; or
>
>(ii) Upon election by the complaining party at any time before final
>judgment is entered, that party may recover in lieu of actual damages
>an award of statutory damages of between $1,500 to $10,000 for each
>communication or unlawful access device involved in the action, with
>the amount of statutory damages to be determined by the court, not the
>jury, as the court considers just.
>
>(4) In any case where the court finds that any of the violations of
>this article were committed willfully and for purposes of commercial
>advantage or private financial gain, the court in its discretion may
>increase the total award of any damages amended under subparagraphs
>(i) and (ii) above, by an amount of not more than $50,000 for each
>communication or unlawful access device involved in the action and for
>each day the defendant was in violation of this article.

>

Sounds like an IRQ conflict somewhere. If you have an older system, you probably have a hardware controlled modem (not Winmodem) and that could be causing it. As well your mouse if it is not USB could be taking the interupt as well.

Most likely the scanner SW's default configuration is to use com1 irq4. If it can be changed try these settings below and see if it connects.

COM1 3F8h irq4
COM2 2F8h irq3
COM3 3E8h irq4
COM4 2E8h irq3

With most systems I have worked on; com1 is set to the DB9 connector and com2 to the DB25
Even if both of those ports seem to be free. It may be a PS2 type mouse or the modem causing the problem.

I would first adapt the DB9 cable from the scanner to fit the DB25 on the computer and see if it picks up the scanner on com2. If not you may want to try and find out what com port your modem is using if internal and go from there. unfortunatally there is not easy answer just have to play with it. but it should work out...

Ken

I find it reprehensible that people like you, who very obviously have no experience with the conditions in foreign lands, have decided to compare the US government and the nation's leaders with everyone form Adolf Hitler to Papa Doc. Until you have seen friends beaten, others murdered (in one case, a friend's head was thrown into his family's patio), all kinds of basic-to-an-American rights abused over and over, you are sitting in your Ivory Tower out in Kansas, with about as close a touch to reality as Dorothy had.

It's not Kansas. It's the world of petty dictators, generalissimos, death squads, ballots with one choice, forced military services, gulags of many names, racial and ethnic genocide and other abhorrent things.

Are we doing it the right and the best way? Maybe not. Does it need doing? Yes. I only wish it had been done elsewhere and some of my friends would be alive today.

1769. Trunk Tracking PCR-1000 v0.5.40 Beta Now Available...

Hi all,
I have the beta version available for download now...

This version supports the Motorola Trunking formats.
TypeI are treated as TypeII for now.

You can also Backup & Verify your EEprom.
(taken from my PcrPro1k program)

You can check it out here:
http://104452.home.icq.com/trunkpcr/TrunkPcr1k.html

The Help page shows some Screen Shots of the program in operation.

Regards,
Jay

And that's the first sensible thing you've said in the thread (other
than the part about "the first one"). You've stuck with that ID for a
whole day now, so I guess I'm getting used to it.

I agree about M. Archer's post, well done, other than the presumption
inherent in the use of the term "informed people." However, it's a
good rhetorical device for sure.

This is my simple reply. There's no need for the continued debate; no need for continued denial.. Your own brain is small, and in your heart you are a troll. Your only philosophy is to have the last word no matter how foolish. It's the domain of Celt Chic the Bimbo Troll.

-me
It's the return of the "Oh wait. No way. You're Kidding. He didn't just say what I think he did, did he?"

Hey I liked your BIG post too, I thought it was in a different thread.

I don't think of things in terms of whether they are liberal or not. I don't think I'm going to dinner with liberal friends, or my ethnic friends, or my tall friends. I just don't categorize the press in terms of liberal press / right wing press.

The rush limbaugh crowd promotes such thinking because it sells. I don't pay attention too it. I think bill o'reilly is full of it, but not because he is right wing, but because he accuses people of unproven things which are immoral "in his opinion", but only when it sells. Fair and balance reporing?

I listed to a voice I can relate to and trust. that's all.

I don't read the New Yorker because it's what you call liberal. I read it cause it challenges me. Rush limboaugh does not. He annoys me, and so do the people who actually listen to it and then repeat it.

I wish you would stop promoting such >politicaly racist < terms like "Liberals". It's just a stick to hit people with. It really stinks, when you ,of all people, with your intellect and ability to type fast, could just stick to the ideas. The rest of us don't want to hear it.

Did it ever occur to the Rush Limbaugh crowd, that he puts down NPR because it is his marketshare competition?

You get points and applause from everyone who has fallen at your feet in awe for pointing that i use different IDs, as if it is somehow built in to the nature of computer electrons that a person should only use one. But you really have no idea at all how many different IDs I use. Second, you have no idea how many people use this ID.

David,

I agree with you that the Bush administration is not in the same league as the Pol Pot's and the Papa/Baby Doc DuValier's of the world. Their regimes were no doubt evil and murderous beyond the comprehension of most Americans, who have never had to live with such conditions.

However, there are serious parallels to be drawn between the current administration and Germany in the years just prior to WWII (the parallels, at the present time, would have to stop there, since we are not killing millions).

In the name of national security, many rights have already been taken away. If the rumored (and I say rumored because I have read only the one report on it thusfar) Patriot Act II is passed, then a large amount of our freedoms will be gone, with no sunset clause (further, Patriot II would reportedly remove the sunset clause from Patriot I).

Further disturbing is a news report I heard yesterday stating that the administration will hold asylum seekers from Iraq and 35 other Muslim nations in incarceration until further notice.. shades of the Japanese internment camps of WWII. The only difference I see so far is that supposedly this does not affect Muslims already in the US, so no land grabs yet as there were then.

I only hope that this war does not do what it appears by all accounts to be doing, which is to galvanize all Muslim nations, as well as a significant part of the rest of the world against us. We think ourselves omnipotent, but we can ill afford to be on everyone's blacklist.

Take care, all, and stay well.

You need to set the scanner to hook up remotely from the menu. Read
the manual for instructions on how to do it.

Very nicely expressed. In my experience, which includes being threatened
with death by a government I did not publicly (and on the air) agree with, I
still see a vast difference between limitations on the most liberal freedoms

in the world and fascism or totalitarianism. On the other hand, I am not naive enough to believe that the armed changes of governments I have lived through, the dictators I have seen supported and the military influence on civilian leadership during the last 5 decades has nothing to do with US manipulation. I see the differences and similarities. But, even with today's news, I see our system as so infinitely better it is hard to be wholly critical.

A holding camp with full rations is very different from the Bataan death march or a Nazi camp or a Russian gulag. I hope.

But I have to say your points are well taken, nicely reasoned and eloquent. Hopefully, none of us willhave long range and long term reasons for concern.

JT & EG,

This is the Great Thing about being able to say (write) this type of
anti-christian humor in a so called 'Christian Nation' like the USA.
You are tolerated and some people actually will enjoy your humor.

Had you said (written) the same type of anti-islamic humor in an
Islamic Nation (pick any one). These could have possibly been your

Spring cleaning - SHACK SALE!

April 1, 2003

UPDATE - Watch For Updates & Additions

*** Communication Specialists TP-154 Repeater Controller ***

Encodes / Decodes PL, DPL and I think inverted PL

Has a courtesy tone

Has an ID'er

Programmable time limits for system and for each tone/code

Lots of other features

Manual with programming, operation and hook up data included

Programmable over the air or via programming jack - uses a touchtone phone.

A great controller for starter / basic systems

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-027S.JPG

Price LOWERED!

*** Asking $145 Shipped - OR OFFER ***

-------- ------------- ----------- -------------- ----------------- --------
-------- -------------

*** Radio Shack PRO-2067 Base / Mobile Scanner ***

500 Channels
Trunk Tracking - Motorola type I, II. I/II Hybrid, LTR, EDACS
SAME Technology for Weather alerting
PC Programmable
Direct keypad frequency input
CTCSS / DPL decode
4 line Alpha display
BNC antenna connector
Plus much much more features

*** Comes with the following: ***
Mounting bracket
Original user manual

Wall wart power pack - for base use
Serial programming cable
Programming software

This scanner has been tested and works just beautifully. Condition is Very good - non-smoker, never mobile. I bought 2 of them, I just need one now... so
one has to go.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-018S.JPG

*** I'm asking $175 Shipped - OR OFFER for the whole setup ready to plug and play... sent 2-3 day priority mail ***

-------- ------------ ----------- ------------- ----------------- -------- -------- -------------

*** Motorola P200 UHF 2 Channel Handheld Radio***

Only problem .. the antenna has some shrink tubing on it because the plastic on the antenna is cracking.

Has been tested - is in good working condition

Physical condition is VERY GOOD with exception to the antenna.

Battery condition is EXCELLENT!

Currently programmed in the 460Mhz area

Easily converts to 6 channel

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-019S.JPG

*** Asking $60.00 or offer - shipped ***

-------- ------------ ----------- ------------- ----------------- -------- -------- -------------

*** Palm IIIx PDA ***

Just your basic Palm PDA

WORKS GREAT!

Maybe it could find a use on APRS or used with a GPS unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-021S.JPG

*** $40.00 shipped - or offer ***

-------- ------------ ---------- ------------- ---------------- --------
-------- -------------

*** Kenwood TM-742A Multi Bander Mobile Radio ***

SOLD!

-------- ------------ ---------- ------------- ---------------- --------
-------- -------------

*** Kenwood TS-700SP 2 Meter ALL MODE ***

Built in digital display along with analog dial

10W output - perfect for feeding amplifiers

Comes with the 120V AC cord, manual and the original hand mic.

Works good, however the display flickers once in a while when tuning.
Rocking the tuning dial up and down in freqs clears the problem.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-024S.JPG

*** Asking $150.00 Shipped - Or offer ***

-------- ------------ ---------- ------------- ---------------- --------
-------- -------------

*** Scott Air Pack SCBA unit (Fire Fighters air pack) ***

Comes with carry / storage case, mask, regulator, tank frame and tank . the
whole complete unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-025S.JPG

*** Asking $135.00 Shipped or offer ***

-------- ------------ ---------- ------------- ---------------- --------
-------- -------------

*** Setcom 7-PR4SB Headset with Boom Mic ***

I'm not sure what radio it is wired for, but it was used with an HT for auto
racing (Pit Crew)

*** TX-RX 900MHz Vari-Notch Cavity filters / (Duplexer?) ***

Quantity - 4

Filter Type - Vari-Notch

Model - 15-88-01

Freq - 890 - 960MHz

There is 4 of these filters on a rack mount frame. No interconnecting cables. I was going to send these to TX-RX to have them convert 2 of them to Pass High and make the interconnecting cables - But I went with a different duplexer.

PICTURES AT:

http://www.kmcnet.net/Auction_Stuff/MVC-028S.JPG

http://www.kmcnet.net/Auction_Stuff/MVC-029S.JPG

PRICE LOWERED!

*** Asking $160 shipped - or offer ***

-------- ------------ ----------- ------------- ---------------- --------
-------- -------------

There's more to be listed... Keep an eye open for my posts.

I accept Paypal online payments, US Postal Money Orders and TRADES. I don't have any specific list of what I'm looking for in trade.so if you want to offer a trade, send me your "trade list" for what item(s).

Please note, included shipping is for continental US addresses ONLY, Hawaii, Alaska and international addresses, I will calculate the additional shipping needed.

Thanks

Dave Schmidt

looking for a scanner for my truck. I want it to fit in a DIN size opening
if possible. I need the following, 800mhz NO trunking NO digital something
simple I guess,
is there anything around that fits the bill?
if nothing for the opening then something relatively small.
thanks

>As for American aggression, I am reminded of the Spanish garoting a =
>native who had just converted - they did so to save his soul ... for =
>them I guess it was just fun.

I trust that you were there when this happened, and not relying on rewritten text books to glean this information. These same books usually fail to mention the human sacrifices and cannibalism that natives were engaged in before contact with European men.

The destruction will be universal, but the souls of those that die in grace will be saved. God is not "fair", God is "Just". There is a difference. Carl Jung once differentiated the unconscious from the subconscious. Unconscious implies a lack of accessibility to the content, but the subconscious implies that the content is there but not currently being utilized by the mind. If God were fair, we'd all live to 85 years old and be in perfect health. We don't.

Be cautious of Anthropomorphism, God is not like one of the guys at work. Don't attribute human qualities to Him lest you be in for a surprise.

This is strange jamming. Normally a jamming signal is a square wave
that generates plenty of noise. Why do I think the "beep, beep, beep"
is WWV's time signals this guy is mistaking for jamming?

Don't get upset with the guy. What he means is that, since the dawn of
time, Israel is recent. Of course, in that frame of reference, so is
homo sapiens (no, John, that doesn't refer to gay people)

The US is a "recent" nation, also, when you compare it to China, the
rest of Asia, Europe and most of the Middle East..

Hi,

I own an old Uniden Bearcat 50XL which doesn't have
a delay option, the delay is ON by default.

Now I'd like to make the delay switchable, does anyone
have experience on this with these old Bearcats?

Bye, Peter Hunt.

Please THINK about what I posted. Go to the freedom to tinker web site and read the stuff there. The opinions there are not your typical Usenet drivel. They come from the likes of Professor Lawrence Lessig (who recently argued a copyright case before the Supreme Court).

This is very broad legislation, it sweeps all over the place. If we aren't careful it will get applied to scanners as well. After all, if it is used to set limits on what a TIVO box can do, how long do you think it will be before they apply it to scanners?

I mean, if this stuff goes through, what's to keep NASCAR from declaring that they "own" their radio traffic and therefore we can't listen to it in an unrestricted manner?

Going even further, what's to keep a police department dispatch from doing the same?

Take a day, think hard, and then you can tell me how wrong I am.

It is a conspiracy: they embedded a microchip in a filling. It creates a
heterodyne with anti-American broadcasts.

> is WWV's time signals this guy is mistaking for jamming?

Because it was not on WWV's frequencies for one, plus I know what those sound like, plus they
don't just occur during anti-American newscasts, then go away (along with the strong carrier)
when the anti-American newscast is over. Many others reported this as well, I was not the only one to hear it.

Is it REALLY that hard to believe that this could actually happen? We are not talking about people with wings (angels) flying into the sky, or people rising from the dead or walking on
water here. Of course many people don't have any trouble believe stuff like that, only that any shortwave broadcast could EVER possibly have been jammed. That is completely impossible to
some people. What a society.

Why? when he didn't get the majority of votes, he just took power anyway. No killing was necessary. Why would Saddam have to kill anyone, he could just do the same thing Bush did.

Most people don't need to know how to design and build a VCR. That
is what some people get engineering degrees for. So you say if
someone does not know how to do that then they are stupid. Can you
do it?
How many people know how to do a heart transplant? Not many
compared to the overall population. Bet you don't know how, so you
must be one of those idiots.
Most people don't even know how to set the CLOCKS on a VCR. Have
> you ever seen a genius as president of our country? Of course not, and you never will

What is amazing, is that a google search for the entities you quoted found nothing. Another search of Jamming had numerous hits, not a single one relating to the US jamming anyone.

Can you provide definitive jamming information? I think you are totally incorrect, but am open to any definitive proof. Popcomm and others are not a definitive source as they publish the anecdotal evidence presented to them by people that make wrong assumptions.

A search of jamming equipment in the US arsenal shows RADAR and missile jamming equipment, but I was unable to locate any short-wave jamming equipment.

Anyone familiar with the art will explain the JS/JT ratios involved and the antenna requirements to be successful.

Personally, I feel that this is more of the bovine excrement you are so fond of propagating.

GMRS is the next CB radio. I wouldnt bother with the license. Theres so many out there now theres no way to enforce it anyway. The panel van with all the antennas hasent pulled up to my house yet. :-)

My history is wrong? There are many "recent" countries. Bangladesh was established within my adult lifetime (which still has a long time to go). I knew the brother of the first Prime Minister who was assasinated. He was my next door neighbor in Boston and borrowed my shortwave receiver when he found there were problems at home. That's how he discovered his brother was dead.

David,

I said this before on here. The political construct known as the state of Israel (AS WE KNOW IT) is modern. It was carved out by the British in the mid 20th century..

The identity and the ethnic group that claim that this piece of land was "given by God" to Abraham have been around for hundreds (if not thousands) of years.

Likewise, there never really was a "Palestine," politically speaking.

These were all independent tribes.

My question is...

If this ONLY happens during the anti-American broadcasts, then how would the jammer know when to stop?

> who have studied the universe for hundreds of years.

Columbus knew more than all of the astronomers and "experts" of his time, right? That is the whole point here. And even after it is made, you are laughing again just like they all laughed at Columbus.

> So please explain to us the mysteries of just how the universe
> came to be.

It did not come to be. If you don't have anything that exists, then you can't have any explosions, "big bangs" or any occurrences of any kind to create anything because nothing exists. If you can create existence, then there must have been some sort of existence in order to create the existence with, thus you didn't create existence, it was already there.

This is so simple a child can figure it out, and that is when I figured it out, when I was a child. You don't need to be a genius to just think about how impossible it would be for the Universe or existence to have a beginning.

Which came first, the chicken or the egg? Neither. The species evolved over time, there was no magical day when a chicken or egg just appeared out of nowhere.

Another ridiculous argument is that everything that exists is so amazing and complex that only a great intelligent mind or god could have created it. Yet, something even MORE amazing and complex like the brain of this intelligent mind or god people have no problem believing needs the same explanation in order to exist. He just popped out of nowhere by randon chance. Wouldn't an even MORE amazing and complex being be required to create something as amazing and complex as the creator of our universe and all existence? And so you have an endless infinite line of gods and creators without a beginning.

So no matter how you choose to look at it, there is no beginning to existence. That would be impossible.

> With all your great knowledge I just can't understand why you are
> not in charge of the country,

Because we live in a democratic type of society. In a democracy, you have 3 wolves and a sheep voting on what to have for lunch. Very few people are geniuses in any given society, most people are idiots. How many people do you know that can design and create a VCR? Most people don't even know how to set the CLOCKS on a VCR. Have you ever seen a genius as president of our country? Of course not, and you never will in a democracy. The majority idiots rule and tell the minority geniuses how it is going to be.

Why can't a genius figure out a way to trick the people into voting for him? Because no one in this country who is intelligent is ever allowed to speak to a large enough of the population to ever reach them in the first place. Hitler was able to do it and realized that if you can reach and talk to the entire population at once, you can program them anyway you want to. He was able to get them to all vote for him, before forbidding anyone else to ever get the opportunity to speak to the people again and quickly turned the country into a dictatorship. Our country has done the same. No other political party is allowed in the presidential debates anymore, for the fact that they could speak to all of the people without censorship. Someone might actually get elected that is not part of the two party system.

So, you will never have Einstein as president, only people like Clinton and Bush.

> Have you written to Washington to tell them just how smart you
> are, that you have all the answers to everything, and they should
> put you in charge? No, why not? I am sure Bush would gladly step
> aside if he only realized that you could solve all the world's

The concept of the strictly bordered nation is also a new construct in history. In fact, in some languages the term tribe and nation are the same. Boundaries were, to say the least, fluid. The Aztec "empire" (a misnomer, since it was in essence a theocracy with a civilian-military leader) had different borders nearly every day as influences and alliances waxed and waned.

Tribal lands evolved into nation-states or principalities, and then into contemporary nations. Most of what we consider ethnic lands in the Biblical territories would be considered nations today; Israel came and went several times.

I think the spelling is "Scuds." And we didn't build them - the Russian did, in the late 50's and early 60's (about 35-45 years ago).

Anyway, it is amazing these things keep flying around. I remember a General at a press conference early in the last Iraq war saying all the Scud launchers had been knocked out. Over the next 24 hours, about a dozen Scuds were launched. Almost week later, another General said nearly the same thing, with more Scuds launched afterward. When asked about that, the military said mobile launchers are difficult to find and said nothing more publicly about Scud launchers being destroyed after that. Perhaps it is a good thing because we now see missiles, probably Scuds, being launched yet again.

Wrong, they just want you to tear down your firewall so that
anybody can make sure you do not use 2 computers on the connection
if you only paid for one, and then there is the bonus that the
music industri can gain access to your computer and see if you have
pirate spftware on it.

And your only protection against viirus and hackers will be the law.

Why do they need to be able to know how it works or how it stores
video information? I suppose you know how everything works.
How many people do you think can explain how the automatic
transmission is their car works? Why do they need to be able to?
They drive the car and it works. Probably the heart transplant
doctor can't. Would you call him unintelligent?

> Very few
> geniuses, but millions of people that are idiots.

I see, you consider yourself to be a genius and everyone else are
idiots. What a pompous moron!

> tall friends. I just don't categorize the press in terms of liberal press /
> right wing press.

That's because you are smarter than those that do. "liberal" and "right wing" are just fictional titles given to people who say something against their beliefs when they themselves consider to belong to the opposite group.

You say something against Clinton, you are called "right wing" But wait, you then say something against Bush, and you are called a "liberal". Therefore, they are both the same exact thing.

So you can choose to call the government propaganda news as either "liberal" or "right wing", it really doesn't matter, there is really no difference. BOTH liberals and right wing groups support our troops now that the war has started, right? See? Shouldn't one group still be against the troops if there really was a difference?

What do you call a one sided brainwashed American with no self thought opinions? A liberal right-wing Republicat.

> The rush limbaugh crowd promotes such thinking because it sells. I don't
> pay attention too it. I think bill o'reilly is full of it, but not because
> he is right wing, but because he accuses people of unproven things which are
> immoral "in his opinion", but only when it sells. Fair and balance reporing?

He is not reporting. Telling all his viewers to boycott any French goods is not a news report or any fair and balanced reporting of any facts, it is directing the viewers and telling them what to do. They don't let you "decide for yourself", they tell you that anyone who doesn't support the war is not an American and does not deserve any constitutional protection.

> I don't read the New Yorker because it's what you call liberal. I read it
> cause it challenges me.

Here, read this and see if it challenges you too:
http://www.antiwar.com/latest.html
http://www.truthaboutwar.org/home.shtml

> I wish you would stop promoting such >politicaly racist < terms like
> "Liberals". It's just a stick to hit people with. It really stinks

And it never fits the intended target. I get called a liberal AND a right wing conservative all the time, and I am neither.

> Did it ever occur to the Rush Limbaugh crowd, that he puts down NPR because
> it is his marketshare competition?

That is how broadcasting works, yes. One day if he gets a job at NPR, he will then start bashing the other stations he worked at. Just look at your own local radio personalities. One DJ calls a rival station's DJ names, then a few years later works at the same station and they are both great buddies promoting each other's shows.

No different than if you change jobs from working at one company or store to it's competitor. Suddenly they are not the enemy, but the good guys.

Exactly. If you don't like what is being said, simply tune to another frequency (message). I do like the use of the "simple religion" phrase, but you need to vary it occasionally - I get bored easily. Regardless, enough of that will end ANY debate.

They modified original Scuds. The new Scuds can be re-fueled
in the air. Once launched, such Scuds can be hidden in clouds.
And that's what military face now: the scuds that were launched
long before the invasion. Destroying launchers will not help
because the scuds are already out there (hidden and hard to
locate)...

> 1. Liberation vs. Invasion and occupation
>
> This is the scariest one. Only time will tell whether the
> bulk of Iraqis see us as liberators or invaders to be
> repulsed at all costs.

I will save you the time. They will never accept our takeover. Turn the tables around and think of it this way... What if China and Russia teamed up and came over here started bombing your house, killing your friends and family and tried to take Bush out of power and put in thier own communist leader and form of government to liberate us? Would you finnaly just give in and thank them for all the destruction they caused and for burning your constitution?

I don't like Bush as president. I didn't like Clinton as president either. But if this situation were to occur, I would fight with everyone else here to get them out of our country and protect the life of our president.

The people of Iraq are no different. Even those that might not like Saddam are not going to let any other country come in and take over.

> This will determine in large measure
> whether the coalition will be fighting only elite soldiers,

Stop saying "coalition", there is no coalition this time. That word has become a synonym for the "USA"

> or will be constantly surrounded and engaged by an armed
> population of ordinary folks who are defending their home
> against invaders.

And this will never end. Did Palestine ever give up when the Jews took over their coutnry and turned it into Israel in 1948? No, they are still fighting to get their country back decades later.

> 2. WMD status
>
> Although informed people never believed wild claims that
> Saddam had the ability to threaten other countries with his
> WMDs, it seems likely he does have *some* WMDs that survived
> the Gulf I bombing, and some percentage (maybe large, maybe
> very small) that may still be potent.

If this was true, they would be using them now against us. What good will it have been to have them when he is out of power? Why is he not using them to fight back against our invasion? When will people finally beleive that they disarmed over a decade ago? The USA waited 12 years to attack for what

reason? Because they wanted to make sure they had no weapons to fight back with. They used the UN inspectors to check what was inside certain facilities, used U2 spy planes with Iraq's consent to stake out targets only weeks before the attacks were to begins. After all this, they still can't take over a country the size of one of our states with all our weapons of mass destruction and technology. The USA is not all that it boasted it was. Russia, China, North Korea are all taking note of this and are going to come and kick our ass soon.

> Given the pressure to present proof of these WMDs, watch for
> Administration "re-classification" of non-WMDs as WMDs to
> avoid embarassment, if they fail to find substantial
> stockpiles.

No, we have the stockpiles to plant there! We have over 75% of chemical weapons we were supposed to have completely destroyed ourselves and still have not got around to getting rid of them. Since Iraq got their chemical weapons from us to begin with, they are the same type we have in our storage facilities across our country. Once we would have Iraq under our control (IF that ever even happens) we would just bring in some of our plants and "find" them. Don't think Bush would ever not "find" any, he already thought of that. Just like when the UN wanted proof and he came up with those fake documents.

> 3. Aftermath
>
> If the Iraqi people turn out to be largely grateful for
> being rid of Saddam,

Get that out of your mind now. They are not surrendering and welcoming our troops as your government told you are they? The generals and people we claimed surrendered to us have since been on Al Jazeera TV and made us look like idiots saying they are not captured at all. We took over Umm Qasr during the first or second day, yet now we find out we don't have control of it at all. This is all propaganda so Saddam thought we already had him and he might as well give up. Now they know, as we do, that this was a trick and they are fighting stronger than ever knowing we were just bluffing.

Here is another thing, reporters are never allowed to say where they are in Iraq, yet CNN shows animated maps every hour showing exactly where our troops are and how we are comming up from the south towards Baghdad.

This bit of information tells me (and Saddam) that they are really comming in from the NORTH from Turkey and they never refused to let us attack from their country after all.

Why else would the Pentagon allow CNN to show all our locations and broadcast to the world and Iraq where we are and what direction we are comming from?

Just as Bush thought the Iraqis were so stupid that they would surrender from our lies about "shock and awe", Bush now thinks that Iraq will bring all their troops and tanks out 50 to 100 miles in the southern desert so that our real troops in the North can come down and take Baghdad? If I can figure this out, I would hope that the Iraqi intelligence could figure it out too.

They shouldn't have allowed CNN to show those maps, that was the dead giveaway. I fell for the Turkey not allowing us to be based there even though we were already unloading and setting up there, but it is CNN showing exactly where we are everyday without the Pentagon telling them to stop that blew the plan. What idiots, they almost pulled it off.

Also, there are no imbedded press in the Northern troops, so no one will see the chemical weapons we will be using. Why else do you think we have all those protective chemical gear? Rumsfeld stated himlsef to congress on C-span that we use them in Afghanistan, and will use them in Iraq. Whoops! There is video and audio of this on the web if you want to see and hear this for yourself.

> Given the "calm and peaceful liberated Iraq" scenario, the
> first thing to watch is, are ALL profits from rebuilding and
> oil sales going to the Iraqi people? Or are there contracts
> for US oil firms to build filling stations, rebuilding stuff
> we blew up, etc. that steals the lion's share of money from
> Iraqis and puts it into the pockets of ultra-rich oil and
> construction concerns?

Two major contracts have allready been awarded to US companies, one of which Vice President Cheny was former CEO of. Even Britian is angry that they are not getting any of these contracts. (and why else would they have gone in on this war with us?)

> After all, Bush and others have said
> that the oil belongs to Iraq, but only time will tell
> whether these were truthful words.

Remember when the US marine took down the Iraqi flag and put up the US flag? Yeah, the Iraqi people will never forget that either. That shows what our motives are. We want a 51st state.

> The other place to look is how will Arab nations view this
> after it's over?

Saudi Arabia allready said they want us out of the middle east as soon as it is over. That stament put them on the list of countries we will be taking over next.

> Will their perception change when (if)
> they see a US/UK genuinely rebuilding Iraq in Iraq's best
> interest as well as the interest of the region?

No, because that will never happen. Why do you think our military bases keep getting attacked by the Kuwati people who are not very pleased with our take over of their country?

> Or will our
> behavior confirm their suspicions that this is a
> neo-colonial conquest at least in part motivated by huge oil
> profits?

Why did we take over Afghanistan? So we could get that oil pipeline built that we need to go through that country, that's why. We had troops there before 9/11, and just used that as a great excuse to start something we were going to do anyway. Why did we just now invade Iraq? We were hoping there would be another attack (thus the code orange thing) but it never came, so we just had to go in anyway as all our troops were already there.

> The former case bolsters our credibility in negotiating with
> Israel and Palestinians.

What negotiating? Did we negotiate for Hitler to get out of the countries he invaded? Why are the Jews still allowed to call part of Palestine "Isreal" and still be in Palestine since 1948?

> Hopefully, it will all be over in a few weeks,

Wow you really beleive that huh? This war may outlast your own life.

Not everything at once. There is already a list of countries
supporting terrorism and waiting to be bombed by U.S.:
Syria, Iran, N.Korea, France, Canada, Mexico, China,
Germany, Italy, Egypt, Turkey (and many more)...
Then you can take care of Russia.

BTW, I didn't realize there were so many terrorists in
the world...

I agree this legislation appears to be all over the place. As such, it does pose a potential threat - as most sweeping legislation often does.

While section 16-11-850 does address reception of signals from air by dish or antenna, it does not offer an exclusion to any other part of this legislation, including possession of equipment capable of receiving the signals described, modification of equipment to receive the signals described, or the criminal offenses associated with same. As such, this legislation could easily be used against scanner owners (and many other radio owners).

One more note of caution, while only eight states are affected so far, there appears to be discussion of similar legislation in other states. Such discussion was mentioned on the SC legislation web site.

> do it?

I sure can. I can even set the clock on one. Can you even do the later? Because that was the point. Not that everyone needs to know how to design a VCR, but that there are very few people that are intelligent enough to even know how the hell it works and be able to explain how it works and stores video information, forget even designing one. Very few geniuses, but millions of people that are idiots. THAT was the point, but you not understanding the point no matter how one explains it is what is actually proving the point. Now go and help me prove it some more with another reply.

> How many people know how to do a heart transplant? Not many
> compared to the overall population.

EXACTLY. But how many people don't know how to set the clock on a VCR, or can't explain how a video picture gets from the TV station to your TV screen? MILLIONS of people can't.

There are more UNintelligent people than intelligent people.

> Bet you don't know how, so you
> must be one of those idiots.

Actually I do know how.

The thought of being King of the idiots is not that appealing, but thanks for suggesting that
I was a genius. I don't even consider myself one. There is still lots to learn, these are just the basics I figured out many years ago.

> > accomplish that feat.
>
> How do you know God does not post to newsgroups? You have proof of
> that?

Do you have proof that a 7000 ton invisible 2 mile wide monster is not at the bottom of the Atlantic Ocean?

Of course not. You can't disprove someone else's fantasy, it is up to the person who makes up the fantasy to prove his claim. YOU have the burden of proving that god posts on newsgroups, not I.

This is the same idiot logic that required Saddam to PROVE he DIDN'T have any chemical weapons. How the hell do you prove that you DON'T have something?

You start by PROVING to everyone on this newsgroup that YOU don't have any chemical weapons of
mass destruction in your house, and show us how Saddam could do it.

And when you CAN'T do it, we will have the authority to bomb your house and take it away from
you.

How the MAJORITY of Americans can not see how ridiculous this is, is just as baffling as how
the MAJORITY of Americans are not outraged that Bush is president even though he had half a

million votes LESS than Gore did.

Absolutely amazing.

1838. How to Kill a Newsgroup

Newsgroup: rec.radio.scanner
Date: 2003-04-01 22:47:14 UTC
From: Frank <tlxcifdckz@pelpaektdqgvumvl.com>

Source record: 33751

To kill a newsgroup that you wish to not exist post an occasional message with controversial content that is sure to instigate flames. When each thread begins to die begin another thread with another controversial topic. After a few weeks the people with on-topic knowledge which they wish only to share will become so frustrated that they will abandon the group and it becomes worthless.

In radio business it's called jamming.

Frank

Being a genius, and having a large font of knowledge, are not one and the same. A genius, defined by Mensa as having an IQ in the 98th percentile or higher (132 or higher on Stanford-Binet test). A person can attain this score, or higher, and still be ignorant, that is, lack any base of knowledge.

As an example, let's use yours of how many people cannot program their VCR's. This phenomenon is not due to the average person lacking the intelligence to do so, but rather the basic knowledge or cognitive skills (or just plain laziness of not reading the manual) to do so. IQ is not a measure of how much a person knows, it is a measure of how easily a person is able to learn and assimilate new things. In the case of our VCR programming, the fault lies mostly with the latter explanation of laziness, with some blame to be placed upon the writers or translators of the users manuals because such manuals are not clearly written, and some machines are decidedly less intuitive than others. I for one have never had a problem programming any of my VCR's, even without the manual. This does not qualify me to be a genius. :)

Yogi Berra is getting old. I'm comforted to know we'll have a
successor, then we can have Deja Vu all over again, all over again.

Wasn't that around the time that Clinton was in Moscow?

Curious...

Love, love, love, love, love, love, love, love, love.
There's nothing you can do that can't be done.
Nothing you can sing that can't be sung.
Nothing you can say but you can learn how to play the game
It's easy.
There's nothing you can make that can't be made.
No one you can save that can't be saved.
Nothing you can do but you can learn how to be in time
It's easy.
All you need is love, all you need is love,
All you need is love, love, love is all you need.
Love, love, love, love, love, love, love, love, love.
All you need is love, all you need is love,
All you need is love, love, love is all you need.
There's nothing you can know that isn't known.
Nothing you can see that isn't shown.
Nowhere you can be that isn't where you're meant to be.
It's easy.
All you need is love, all you need is love,
All you need is love, love, love is all you need.
All you need is love (all together now)
All you need is love (everybody)
All you need is love, love, love is all you need.

Love, love, love, love, love, love, love, love, love.
There's nothing you can do that can't be done.
Nothing you can sing that can't be sung.
Nothing you can say but you can learn how to play the game
It's easy.
There's nothing you can make that can't be made.
No one you can save that can't be saved.
Nothing you can do but you can learn how to be in time
It's easy.
All you need is love, all you need is love,
All you need is love, love, love is all you need.
Love, love, love, love, love, love, love, love, love.
All you need is love, all you need is love,
All you need is love, love, love is all you need.
There's nothing you can know that isn't known.
Nothing you can see that isn't shown.
Nowhere you can be that isn't where you're meant to be.
It's easy.
All you need is love, all you need is love,
All you need is love, love, love is all you need.
All you need is love (all together now)
All you need is love (everybody)
All you need is love, love, love is all you need.

Yes, I heard about that. Cool tech! Just append "CH" to
your order code (cloud-hider) if you want that.
If you also want the solar power option, to keep it up
longer, append -S too.

Their most popular option is -DOY ("drops on Yankees.")
There is a long lead-time on that option due to a sudden
upsurge in demand, which may be linked to Bush's warning
France, Germany, and Turkey and Belgium and Denmark and
Sweden, and Norway, and The Netherlands, and China they have
been added to the Axis of Evil and face imminent invasion if
they refuse to disarm.

Refueled in the air? Look, I know Iraq has plenty of oil, but endlessly refueling Scuds in the air would be tedious at best. Are you sure they haven't developed a balloon-based launcher or helium-filled Scud? For possible evidence to support this, look at the dictionary definition of the word "scud" - to sail with a gale or strong wind blowing from behind. Did our military know something we didn't when they named this particular missile? ;)

Heck, those things are so old, the guy is probably 70+ years old by now. Given a few more years, he'll be locked up in an old folks home. With the "retirement" homes in Russia, he would probably thank you if you locked him up in a prison here.

I don't know. What year did Clinton go to Moscow? Regardless, visions of Scuds could have influenced his behavior with Monika later in the White House - they do say missiles are phallic symbols. Perhaps that's why Saddam has such old, worn out, beat up, missiles. :)

DS,

The 'original' SCUD design was from the old USSR. North Korea is the principle manufacture and supplier of SCUDs in today's International Arms Market. (A CASH CROP)

The 'original' SCUD was basically a Medium Range Ballistic Battle Field Rocket for 'tactical' use beyond the range of regular field artillery.

Those were the originals. Nowadays North Korea builds and
sells these worldwide by the thousands. Indeed, the U.S.
stopped a N.Korean ship full of scuds not that long ago
when it entered Middle East waters. Only to have to let it
go when they found out the missles weren't bound for Iraq,
but rather Qatar...

1866. Icom IC-R3 the right scanner?

Newsgroup: rec.radio.scanner
Date: 2003-04-02 03:21:26 UTC
From: robo111@earthlink.net
Message-ID: <cfae55fa.0304011921.3970108b@posting.google.com>
Source record: 33782

I am searching for a portable scanner that captures 2.4GHZ video, and was looking at the ICOM IC-R3 until I realized that it misses most of the 800 band. I am looking to also capture those freqs as my local county services are running a trunked system in that band. Does anyone have any thoughts on a scanner that captures the video (2.4 GHZ, tv broadcast, etc) as well as the 800 band? I hope there's one out there!!!

Thx,
Rob

thank you Brenda for the wise post. Devo is clueless. He sees only what he wants and when he sees what we see it will be too late.

The Patriot Act (The Domestic Security and Enhancement Act) also will allow secret arrests, and revoction of citizenship with trial.

Unconstitutional - but what the fuck, Ashcroft never bothered with the constitution yet.

I probably know about the PNAC report of 98 written by Paul Wolfowitz, Dick Cheney, Richard Perle, Rummy, Rice, and the Afghani dissodent who apointed Karzi.

I'm sure you know about Unocal (not Unical as I posted to Davo last week - my mistake) and the pipline.

I'm sure you know about Haliberton and the Brown and Root construction contracts formalized TWO months ago!

I'm sure you've just read that Paul Wolfowitz has gotton full control over who and how many are appointed to rule inthe "new" Iraq. General Garner no longer has hiring authority. so we know who the "real" king of Iraq will be. i

don't think the Iraqi people will like king Wolfowitz too much.

I'm sure you know that the UN will play NO role in the management of Iraq after the bloody war.

I'm sure you know that the USA has just decided to exclude the IAEA in looking for Woepons of Mass DEstruction inthe post war Iraq - all "investigations" will be done by the US of A's military. I'm sure we will "manufacture" some sort of WMD to satify the American Sheople. Of course the rest of the world will see the whole thing as a sham - but we said "fuck the world" two weeks ago. (or two yrs ago with the election depending upon your vision)

peace!.

I often tease those I love, in fact that's who I do almost all my teasing with.
I don't think the apostles were as stone-cold serious as satan would have you believe.

No - your interpretation of it is wrong. There NEVER was a "Jewish" country at any time. It was a political construct. It was also convenient for the USA as a political presence in the Middle East - the Jewish influence on the American government has always been immense.

Christians, too, have shown themselves quite capable of zealously cutting out the tongues of those they consider to be heretics. For example, you can read here about the extermination of the leaders of the Moravian church, along with other Protestants, by Roman Catholics in Prague in June of 1621: http://www.everydaycounselor.com/hutton/i15.htm .

Check this out- beats the r3:
http://www.tvham.com/
click recievers
Also:
www.TVHAM.com will shortly be announcing a new microwave video receiver which is a 2.2-2.7GHz video receiver with memories and various scanning modes. The new receiver is more sensitive and much more flexible. Its output is via RCA jacks for display on an existing monitor. The cost is likely to be about the same as the Videoscanner.

As a former Catholic (I have recently broken from the Church due to several recent decisions made by the Vatican, as well as those made by regional Cardinals) I find myself an apologist for the past sins of the Church. This includes, but is by no means limited to, the Crusades, the Inquisition and their roll in the Holocaust. Indeed, true Christians are few and far between. This is the real problem. If Christians actually behaved as Christ did, and urged his followers to, then Christians and Christianity would not have the reputation as hypocrites that they currently suffer.

Hey Celt Chic,
You are a breathe of fresh air in a group that 'sometimes' gets a little stagnant...lol. I hope you don't get upset with what I'm getting ready to say, because it's not my intent, honestly. :-)

But I keep clicking on your posts and I'm wasting a lot of time with your 'prayer/belief' whatever it is .....and now songs. PLEASE try an not add to the craziness that is already here...lol. I want to read what you have to say, if it's related to the hobby......but you're kinda sorta maybe turning into a troll.....and I say that will all the respect in the world to you.

You've been here long enough to know who the instigators are, just 'choose' not to read what they say because it isn't radio related ninety nine percent of the time anyhow, and you replying is just doing exactly what they want. :-(

Welcome to the group and have fun, but *try* to be 'somewhat' on topic if at all possible. :-D

*No hard feelings. (?)

>
> God's truth is absolute.

You DO realize this is only a statement of opinion? No
matter how strongly stated or believed?

You'd be very hard-pressed to collect up any large number of
Christians from different denominations and find agreement
on what "God's Truth" actually was about much of anything,
due to interpretations, translations, context, and different
starting frameworks. So given that God's Truth is in fact
absolute, given that there are so many different opinions
out there, all claiming to be the truth, there's a
vanishingly small chance that you are the one who possess
that actual "God's truth." That doesn't even begin to
address the chance that God's Truth might be Muslim, or
Jewish, or Hindu, or Bhuddist.

Face it, your views are philosophy and opinion. You may be
right, but odds are your views are mostly wrong about what
God wants unless you're VERY special.

There is a good reason why the mere mention of Jesus elicits so much response. The mention of His name requires everyone to make a decision. What will we do with Him? Will we accept the free gift of God? Or will we reject it ? Will we humble ourselves before God? Or will we continue in our sin? We have people here who think the whole thing is a big joke. We have people who intellectualize their way around the truth. We have people who think they are Christians and are not. All have one thing in common. They are running from the truth. The result of this disobedience will be certain destruction. JESUS IS LORD. Repent and believe, or perish with the rest of Satan's army. One truth. One God. One Saviour. Its really not complicated at all. It is so easy, a child can believe it.
We are all sinners and have fallen short of the glory of God. The only way to please Him is to be 100% holy. The penalty for being unholy is death. I don't know about you, but I am not able to live up to the standards of the 10 commandments. (If you think you are going to heaven cause you have been "basically a good person" think again.) He requires full adherence to those commandments. Not one of us has lived up to those standards. The Bible says if you are guilty of one, you are guilty of all. Jesus said if you lust after a woman in your heart, you are guilty of adultery. Whoops. Guilty. Case closed. But thankfully, He has given us a way out. Accept the sacrifice for our sins that He provided for us. His only Son, and our Saviour Jesus Christ.
Its real easy. My 10 year old can do it. So can you. Just believe it. Read your Bible, get on your knees and ask for forgiveness (and mean it) make a decision to live by God's rules instead of your own. The world cant save you. Not church, not school, not your intellect, not your bank account. Just you...His holy Word, and your humility. Amen and Amen.

Dave

The Essenes were not a tribe. They were a sect. A group of philosophers that many in error claim that Jesus spent time with. His teachings are clearly not in line with what the Essenes taught.

I did not say that my opinion is absolute. I said God's truth is absolute.
And His Word through scripture is absolute, whether understood fully or not.
Obviously, since there is one truth, we best get about finding out what God
wants from us. I am NOT special. I am a sinner and my righteousness is as
dirty rags. So is yours.
I do not have all of the answers. But one thing I do know is that JESUS
IS LORD. And the Muslims, Hindus and Buddhists reject that. When those
groups confess that Jesus is the only way to salvation and into the kingdom
of God, then they will know the truth and the truth will set them free.
AMEN.

WF,

Lets see the Year 1621.
- When We All Lift Our Heads Up Out of the History Books and Look Around.
- - What Do We See...
- - - The Islama Baddies Doing the Dirty Deeds Today in 2003!

[Reality Check] Christians and Buddhist are Not the Ones Going Around with Machine Guns, Grenades and Bombs on Fridays Attacking Islamic Mosques. But this is a regular 'happening in many Islamic Countries for Muslims to Attack Christian Churches on Sundays. Especially in Pakistan and Indonesia. In Indonesia over 20 years 1000 Christian Churches were in-fact attacked. In these "ATTACKS" People were Murdered and buildings destroyed. Think Of It: That is one Attack a Week, Every Week for 20 Years. So is there a pattern here? Some reasonable people think so.

God {Allah} Help Me to Know My Friends and My Enemies.
- - - And Give Me the Wisdom to Know the Difference - Amen

~ RHF

You have a good point, BUT you can't seriously point to the
history of Christianity and deny that a lot of people (and
cats!) were killed for their "errant" beliefs, worship, or
practices, or that people were not tortured in the most
barbaric of ways to admit to witchcraft, or to convert to
Christianity?

I think it's partly due to the deplorable level of education
among some nations that are primarily Islamic, and part to
the fact that Islam is a newer religion, and hasn't
completely worked through how to tolerate the existence of
those who disagree with its tenets.

Actually, the relative uneducated state of Islamic countries is itself a result of Christian activity (the Crusades). During the Crusades Christian armies sacked and destroyed much of Islamic civilization (which was far ahead of Christians socially and economically), resulting in the beginning of the Dark Ages. Islamic countries had vast universities and libraries at the time, and education, at least among the male population, was very high. Those institutions were completely and utterly destroyed.

As for Islam being a "newer" religion, I would say no.. as it has been around at least since the 9th century, making it one of the oldest practiced religions.

It's the people who stand so high and tell us all what god really means that gets everyone in trouble or killed.

God doesn't need an interpreter. He can and does speak to each of us directly.

Sort of like Bill and Hillary Clinton and their followers, isn't it?
I mean, what nuts would vote for a pair of radical, gun-hating, freedom hating leftists?
But, how insane would those people have to be to vote for the pair plus algore twice!?!

Yep, there are nuts in America, and the above group describes them well.

Get it? Stop with your political BS and lets talk scanners.

If you want to rave on about how you hate Bush, and how you still have a picture of Hillary over your bed,
fine. Just do it somewhere else so we wont have to stumble over your junk in this group.

Free speech is great. If you don't like what I just said, too bad.

Source record: 33663

The LaLonde's, and other 'preachers' who preach 'end time' scenarios IMO, are dangerous to Christiandom worldwide. They are utterly convinced that 'the end is nigh', any moment in 'our lifetime'. Truth is, NO ONE KNOWS. This 'rapture' theory is even more dangerous, it's a false, relatively new doctrine that's decieving many. Convince me, Show me in scripture where Christ comes in 'secret' to snatch away Christians before earth's last days. The 'last days' began when Jesus acsended!

1897. This Group Is Officially Dead

Yep, I've been coming by here for a few years, but as you can see,
there is far more political bs and name calling
than there is info on scanners, so I declare this scanner newsgroup Dead
On Arrival.

Refueled in the air? Look, I know Iraq has plenty of oil, but endlessly refueling Scuds in the air would be tedious at best. Are you sure they haven't developed a balloon-based launcher or helium-filled Scud? For possible evidence to support this, look at the dictionary definition of the word "scud" - to sail with a gale or strong wind blowing from behind. Did our military know something we didn't when they named this particular missile? ;)

RA,

YES - That was then 100 to 300 years ago. That is 'part' of the
Christian History; but not the Entire Christian History.

TODAY - Islamic History is being Written and it is not the True Islam
but a twisted perverted exploitation of the true words of the Prophet
Mohammed.

QUESTION - Did Jesus (The Christ) Lead an Army into Battle against his
neighbors NO! But the Prophet Mohammed Did [.]

>

BILLIONS of Petro-Dollars and poor schools and poverty for the masses
of many Islamic Nations. So Blame the Christians -or- More Correctly
Blame the Islamic Leaders of those nations. Most Islamic Nations fall
into two groupings: Royalist Regimes and National Socialist Regimes.
Both Exist for the Leadership not for the people.

>
> Actually, the relative uneducated state of Islamic countries is itself a

BA,

So in the same time period of hundreds of years the United States was Founded and Built and is the Leading Power of the World. What has held the Islamic Peoples back is Islamic Leadership. Quit making excuses for Islamic People and Accept them as Equals. The Current Problem in the education of Islamic Peoples and the Youth of Islam will not change over night it will take a generation, or two or three or more. To have them gain the introspective to focus on building a modern Islamic Society that nurtures it people vice teaching them to focus on hating the West (Christian Infidels). It is easier to teach HATE them to Educate and Enlighten a Young Mind. Emotion Comes Easily and Thinking for Yourself is Hard Work. .

>
> As for Islam being a "newer" religion, I would say no.. as it has been
> around at least since the 9th century, making it one of the oldest practiced
> religions.

One "FIX" for many Islamic Nations is an Elected Legislature (Parliamentary System) made up of Two Chambers.

* A Large Elected Body of Women (Only) about 250-500 Representatives that is based on population. Their primary responsibility would be for: Primary and Secondary Schools, Higher Education Colleges and Universities, Health Care and Hospitals, Drugs and Medicine, Food and Agriculture and Related Taxes. Like a Parliamentary System the Ministers for these Government Functions Departments would be from this Body

* A Smaller Elected Body of Men (Only) about 50-100 Representatives that is based on geographic regions. Their primary responsibility would be for: Military, Boarders, Foreign Relations, International Trade, Transportation, Science and Industry and Related Taxes. Like a Parliamentary System the Ministers for these Government Functions Departments would be from this Body

NOTE: The President (Direct Election) and the Prime Minister (Parliamentary Election) could be a Women or a Men.

IF I RULED THE WORLD ~ RHF
(I Would Be Shot - Or In Jail)

I admit, I haven't thought of that. Indeed, they can be using
balloon launchers. They could use specially trained geese to
conceal the presence of the balloons from AWACS...

Actually, when one thinks about that, it becomes clear why
US military seem to be confused. ;-)

Yeah...no WONDER the allies are losing, and haven't taken a single
city...incredible. Guess we all ought to start hanging up pictures of
Saddam. I have two already, but must remove the darts from one and try to
patch the bullet holes from the other on the firing range...

From the History of Palestine:

The only time "Palestine" was ruled by "Palestinians" or any people from the Arabian Peninsula was briefly around 635 A.D.
"The only Arab domination since the Conquest in 635 A.D. hardly lasted, as such, 22 years...," the Muslim chairman of the Syrian Delegation attested in his remarks to the Paris Peace Conference in February 1919.
"Yes, the existence of a separate Palestinian identity serves only tactical purposes. The founding of a Palestinian state is a new tool in the continuing battle against Israel... " Zuheir Muhsin, late Military Department head of the PLO and member of its Executive Council, Dutch daily Trouw, March 1977

The History and Meaning Of "Palestine" and "Palestinians"
"There is no such thing as a Palestinian Arab nation . . . Palestine is a name the Romans gave to Eretz Yisrael with the express purpose of infuriating the Jews . . . .

"The British chose to call the land they mandated Palestine, and the Arabs picked it up as their nation's supposed ancient name, though they couldn't even pronounce it correctly and turned it into Falastin a fictional entity."

-- Golda Meir quoted by Sarah Honig,
Jerusalem Post, 25 November 1995

Palestine has never existed . . . as an autonomous entity.
There is no language known as Palestinian.
There is no distinct Palestinian culture.

There has never been a land known as Palestine
governed by Palestinians.

Palestinians are Arabs, indistinguishable from Jordanians
(another recent invention), Syrians, Lebanese, Iraqis, etc.

Keep in mind that the Arabs control 99.9 percent of the Middle East lands. Israel represents one-tenth of one percent of the landmass. But that's too much for the Arabs. They want it all. And that is ultimately what the fighting in Israel is about today . . . No matter how many land concessions the Israelis make, it will never be enough.
-- from "Myths of the Middle East", Joseph Farah,
Arab-American editor and journalist,
WorldNetDaily.Com, 11 October 2000

From the end of the Jewish state in antiquity to the beginning of British rule, the area now designated by the name Palestine was not a country and had no frontiers, only administrative boundaries..
-- Professor Bernard Lewis,
Commentary Magazine, January 1975

Talk and writing about Israel and the Middle East feature the nouns "Palestine" and Palestinian", and the phrases "Palestinian territory" and even "Israeli-occupied Palestinian territory". All too often, these terms are used with regard to their historical or geographical meaning, so that the usage creates illusions rather than clarifies reality.

WHAT DOES "PALESTINE" MEAN?

It has never been the name of a nation or state. It is a geographical term, used to designate the region at those times in history when there is no nation or state there.

The word itself derives from "Peleshet", a name that appears frequently in the Bible and has come into English as "Philistine". The Philistines were mediterranean people originating from Asia Minor and Greek localities. They reached the southern coast of Israel in several waves. One group arrived in the pre-patriarchal period and settled south of Beersheba in Gerar where they came into conflict with Abraham, Isaac and Ishmael. Another group, coming from Crete after being repulsed from an attempted invasion of Egypt by Rameses III in 1194 BCE, seized the southern coastal area, where they founded five settlements (Gaza, Ascalon, Ashdod, Ekron and Gat). In the Persian and Greek periods, foreign settlers - chiefly from the Mediterranean islands - overran the Philistine districts. From the time of Herodotus, Greeks called the eastern coast of the Mediterranean "Syria Palaestina".

The Philistines were not Arabs nor even Semites, they were most closely related to the Greeks. They did not speak Arabic. They had no connection, ethnic, linguistic or historical with Arabia or Arabs. The name "Falastin" that Arabs today use for "Palestine" is not an Arabic name. It is the Arab pronunciation of the Greco-Roman "Palastina"; which is derived from the Peleshet, (root Pelesh) which was a general term meaning "dividers", "penetrators" or "invaders". This referred to the Philistine's invasion and conquest of the coast from the sea.

The use of the term "Palestinian" for an Arab ethnic group is a modern political creation which has no basis in fact - and had never had any international or academic credibility before 1967.

HOW DID THE LAND OF ISRAEL BECOME "PALESTINE"?

In the First Century CE, the Romans crushed the independent kingdom of Judea. After the failed rebellion of Bar Kokhba in the Second Century CE, the Roman Emperor Hadrian determined to wipe out the identity of Israel-Judah-Judea. Therefore, he took the name Palastina and imposed it on all the Land of Israel. At the same time, he changed the name of Jerusalem to Aelia Capitolina.

The Romans killed many Jews and sold many more in slavery. Some of those who survived still alive and free left the devastated country, but there was never a complete abandonment of the Land. There was never a time when there were not Jews and Jewish communities, though the size and conditions of those communities fluctuated greatly.

THE HISTORY OF PALESTINE

Thousands of years before the Romans invented "Palastina" the land had been known as "Canaan". The Canaanites had many tiny city-states, each one at times independent and at times a vassal of an Egyptian or Hittite king. The Canaanites never united into a state. After the Exodus from Egypt probably in the Thirteenth Century BCE but perhaps earlier -- , the Children of Israel settled in the land of Canaan. There they formed first a tribal confederation, and then the biblical kingdoms of Israel and Judah, and the post-biblical kingdom of Judea.

From the beginning of history to this day, Israel-Judah-Judea has the only united, independent, sovereign nation-state that ever existed in "Palestine" west of the Jordan River. (In biblical times, Ammon, Moab and Edom as well as Israel had land east of the Jordan, but they disappeared in antiquity and no other nation took their place until the British invented Trans-Jordan in the 1920s.)

After the Roman conquest of Judea, "Palastina" became a province of the pagan Roman Empire and then of the Christian Byzantine Empire, and very briefly of the Zoroastrian Persian Empire. In 638 CE, an Arab-Muslim Caliph took Palastina away from the Byzantine Empire and made it part of an Arab-Muslim Empire. The Arabs, who had no name of their own for this region, adopted the Greco-Roman name Palastina, that they pronounced "Falastin".

In that period, much of the mixed population of Palastina was forced to convert to Islam and adopted the Arabic language. They were subjects of a distant Caliph who ruled them from his capital, that was first in Damascus and later in Baghdad. They did not become a nation or an independent state, or develop a distinct society or culture.

In 1099, Christian Crusaders from Europe conquered Palestina-Falastin. After 1099, it was never again under Arab rule. The Christian Crusader kingdom was politically independent, but never developed a national identity. It remained a military outpost of Christian Europe, and lasted less than 100 years. Thereafter, Palestine was joined to Syria as a subject province first of the Mameluks, ethnically mixed slave-warriors whose center was in Egypt, and then of the Ottoman Turks, whose capital was in Istanbul.

During the First World War, the British took Palestine from the Ottoman Turks. At the end of the war, the Ottoman Empire collapsed and among its

subject provinces "Palestine" was assigned to the British, to govern temporarily as a mandate from the League of Nations.

THE JEWISH NATIONAL HOME

Travelers to Palestine from the Western world left records of what they saw there. The theme throughout their reports is dismal: The land was empty, neglected, abandoned, desolate, fallen into ruins.

Nothing there [Jerusalem] to be seen but a little of the old walls which is yet remaining and all the rest is grass, moss and weeds
-- English pilgrim in 1590

The country is in a considerable degree empty of inhabitants and therefore its greatest need is of a body of population"
-- British consul in 1857

There is not a solitary village throughout its whole extent [valley of Jezreel] -- not for 30 miles in either direction. . . . One may ride ten miles hereabouts and not see ten human beings.

For the sort of solitude to make one dreary, come to Galilee . . .

Nazareth is forlorn . . . Jericho lies a moldering ruin . . . Bethlehem and Bethany, in their poverty and humiliation... untenanted by any living creature . . .

A desolate country whose soil is rich enough, but is given over wholly to weeds . . a silent, mournful expanse . . . a desolation . . . . We never saw a human being on the whole route . . . . Hardly a tree or shrub anywhere. Even the olive tree and the cactus, those fast friends of a worthless soil had almost deserted the country . . . .

Palestine sits in sackcloth and ashes . . . desolate and unlovely . . .

-- Mark Twain, The Innocents Abroad, 1867

The restoration of the "desolate and unlovely" land began in the latter half of the Nineteenth Century with the first Jewish pioneers. Their labors created newer and better conditions and opportunities, which in turn attracted migrants from many parts of the Middle East, both Arabs and others.
The Balfour Declaration of 1917, confirmed by the League of Nations Mandate, commited the British Government to the principle that "His Majesty's government view with favour the establishment in Palestine of a Jewish National Home, and will use their best endeavors to facilitate the achievement of this object. . . . " It was specified both that this area be open to "close Jewish settlement" and that the rights of all inhabitants already in the country be preserved and protected.

Mandate Palestine originally included all of what is now Jordan, as well as all of what is now Israel, and the territories between them. However, when Great Britain's prot?g? Emir Abdullah was forced to leave the ancestral Hashemite domain in Arabia, the British created a realm for him that

included all of Manfate Palestine east of the Jordan River. There was no traditional or historic Arab name for this land, so it was called after the river: first Trans-Jordan and later Jordan.

By this political act, that violated the conditions of the Balfour Declaration and the Mandate, the British cut more than 75 percent out of the Jewish National Home. No Jew has ever been permitted to reside in Trans-Jordan/Jordan.

Less than 25 percent then remained of Mandate Palestine, and even in this remnant, the British violated the Balfour and Mandate requirements for a "Jewish National Home" and for "close Jewish settlement". They progressively restricted where Jews could buy land, where they could live, build, farm or work.

After the Six-Day War in 1967, Israel was finally able to settle some small part of those lands from which the Jews had been debarred by the British. Successive British governments regularly condemn their settlement as "illegal". In truth, it was the British who had acted illegally in banning Jews from these parts of the Jewish National Home.

WHO IS A PALESTINIAN?

During the period of the Mandate, it was the Jewish population that was known as "Palestinians" including those who served in the British Army in World War II.

British policy was to curtail their numbers and progressively limit Jewish immigration. By 1939, the White Paper virtually put an end to admission of Jews to Palestine. This policy was imposed the most stringently at the very time this Home was most desperately needed -- after the rise of Nazi power in Europe. Jews who might have developed the empty lands of Palestine and left progeny there, instead died in the gas chambers of Europe or in the seas they were trying to cross to the Promised Land.

At the same time that the British slammed the gates on Jews, they permitted or ignored massive illegal immigration into Western Palestine from Arab countries Jordan, Syria, Egypt, North Africa. In 1939, Winston Churchill noted that "So far from being persecuted, the Arabs have crowded into the country and multiplied . . . ." Exact population statistics may be problematic, but it seems that by 1947 the number of Arabs west of the Jordan River was approximately triple of what it had been in 1900.

The current myth is that these Arabs were long established in Palestine, until the Jews came and "displaced" them. The fact is, that recent Arab immigration into Palestine "displaced" the Jews. That the massive increase in Arab population was very recent is attested by the ruling of the United Nations: That any Arab who had lived in Palestine for two years and then left in 1948 qualifies as a "Palestinian refugees".

Casual use of population statistics for Jews and Arabs in Palestine rarely consider how the proportions came to be. One factor was the British policy of keeping out Jews while bringing in Arabs. Another factor was the violence

used to kill or drive out Jews even where they had been long established.

For one example: The Jewish connection with Hebron goes back to Abraham, and there has been an Israelite/Jewish community there since Joshua long before it was King David's first capital. In 1929, Arab rioters with the passive consent of the British -- killed or drove out virtually the entire Jewish community.

For another example: In 1948, Trans-Jordan seized much of Judea and Samaria (which they called The West Bank) and East Jerusalem and the Old City. They killed or drove out every Jew.

It is now often proposed as a principle of international law and morality that all places that the British and the Arabs rendered Judenrein must forever remain so. In contrast, Israel eventually allotted 17 percent of Mandate Palestine has a large and growing population of Arab citizens.

FROM PALESTINE TO ISRAEL

What was to become of "Palestine" after the Mandate? This question was taken up by various British and international commissions and other bodies, culminating with the United Nations in 1947. During the various deliberations, Arab officials, spokesmen and writers expressed their views on "Palestine".

"There is no such country as Palestine. 'Palestine' is a term the Zionists invented. . . . Our country was for centuries part of Syria. 'Palestine' is alien to us. It is the Zionists who introduced it."

-- Local Arab leader to British Peel Commission, 1937

"There is no such thing as Palestine in history, absolutely not"

-- Professor Philip Hitti, Arab historian to
Anglo-American Committee of Inquiry, 1946

"It is common knowledge that Palestine is nothing but southern Syria."
-- Delegate of Saudi Arabia to the
United Nations Security Council, 1956,

By 1948, the Arabs had still not yet discovered their ancient nation of Falastin. When they were offered half of Palestine west of the Jordan River for a state, the offer was violently rejected. Six Arab states launched a war of annihilation against the nascent State of Israel. Their purpose was not to establish an independent Falastin. Their aim was to partition western Palestine amongst themselves.

They did not succeed in killing Israel, but Trans-Jordan succeeded in taking Judea and Samaria (West Bank) and East Jerusalem, killing or driving out all the Jews who had lived in those places, and banning Jews of all nations from Jewish holy places. Egypt succeeded in taking the Gaza Strip. These two Arab states held these lands until 1967. Then they launched another war of annihilation against Israel, and in consequence lost the lands they had taken by war in 1948.

During those 19 years, 1948-1967, Jordan and Egypt never offered to surrendar those lands to make up an independent state of Falastin. The "Palestinians" never sought it. Nobody in the world ever suggested it, much less demanded it.

Finally, in 1964, the Palestine Liberation Movement was founded, with a charter that proclaimed its sole purpose to be the destruction of Israel. To that end it helped to precipitate the Arab attack on Israel in 1967.

The outcome of that attack then inspired an alteration in public rhetoric. As propaganda, it sounds better to speak of the liberation of Falastin than of the destruction of Israel. Much of the world, governments and media and public opinion, accept virtually without question of serious analysis the new-sprung myth of an Arab nation of Falastin, whose territory is unlawfully occupied by the Jews.

Since the end of World War I, the Arabs of the Middle East and North Africa have been given independent states in 99.5 percent of the land they claimed. Lord Balfour once expressed his hope that when the Arabs had been given so much, they would "not begrudge" the Jews the "little notch" promised to them.

[Some of the material cited above is drawn from the book From Time Immemorial by Joan Peters.].

Palestinians are Arabs, indistinguishable from Jordanians
(another recent invention), Syrians, Lebanese, Iraqis, etc.

Keep in mind that the Arabs control 99.9 percent of the Middle East lands. Israel represents one-tenth of one percent of the landmass. But that's too much for the Arabs. They want it all. And that is ultimately what the fighting in Israel is about today . . . No matter how many land concessions the Israelis make, it will never be enough.
-- from "Myths of the Middle East", Joseph Farah,
Arab-American editor and journalist,
WorldNetDaily.Com, 11 October 2000

From the end of the Jewish state in antiquity to the beginning of British rule, the area now designated by the name Palestine was not a country and had no frontiers, only administrative boundaries..
-- Professor Bernard Lewis,
Commentary Magazine, January 1975

Talk and writing about Israel and the Middle East feature the nouns "Palestine" and Palestinian", and the phrases "Palestinian territory" and even "Israeli-occupied Palestinian territory". All too often, these terms are used with regard to their historical or geographical meaning, so that the usage creates illusions rather than clarifies reality.

WHAT DOES "PALESTINE" MEAN?

It has never been the name of a nation or state. It is a geographical term, used to designate the region at those times in history when there is no nation or state there.

The word itself derives from "Peleshet", a name that appears frequently in the Bible and has come into English as "Philistine". The Philistines were mediterranean people originating from Asia Minor and Greek localities. They reached the southern coast of Israel in several waves. One group arrived in the pre-patriarchal period and settled south of Beersheba in Gerar where they came into conflict with Abraham, Isaac and Ishmael. Another group, coming from Crete after being repulsed from an attempted invasion of Egypt by Rameses III in 1194 BCE, seized the southern coastal area, where they founded five settlements (Gaza, Ascalon, Ashdod, Ekron and Gat). In the Persian and Greek periods, foreign settlers - chiefly from the Mediterranean islands - overran the Philistine districts. From the time of Herodotus, Greeks called the eastern coast of the Mediterranean "Syria Palaestina".

The Philistines were not Arabs nor even Semites, they were most closely related to the Greeks. They did not speak Arabic. They had no connection, ethnic, linguistic or historical with Arabia or Arabs. The name "Falastin" that Arabs today use for "Palestine" is not an Arabic name. It is the Arab pronunciation of the Greco-Roman "Palastina"; which is derived from the Peleshet, (root Pelesh) which was a general term meaning "dividers", "penetrators" or "invaders". This referred to the Philistine's invasion and conquest of the coast from the sea.

The use of the term "Palestinian" for an Arab ethnic group is a modern political creation which has no basis in fact - and had never had any international or academic credibility before 1967.

HOW DID THE LAND OF ISRAEL BECOME "PALESTINE"?

In the First Century CE, the Romans crushed the independent kingdom of Judea. After the failed rebellion of Bar Kokhba in the Second Century CE, the Roman Emperor Hadrian determined to wipe out the identity of Israel-Judah-Judea. Therefore, he took the name Palastina and imposed it on all the Land of Israel. At the same time, he changed the name of Jerusalem to Aelia Capitolina.

The Romans killed many Jews and sold many more in slavery. Some of those who survived still alive and free left the devastated country, but there was never a complete abandonment of the Land. There was never a time when there were not Jews and Jewish communities, though the size and conditions of those communities fluctuated greatly.

THE HISTORY OF PALESTINE

Thousands of years before the Romans invented "Palastina" the land had been known as "Canaan". The Canaanites had many tiny city-states, each one at times independent and at times a vassal of an Egyptian or Hittite king. The Canaanites never united into a state. After the Exodus from Egypt probably in the Thirteenth Century BCE but perhaps earlier -- , the Children of Israel settled in the land of Canaan. There they formed first a tribal confederation, and then the biblical kingdoms of Israel and Judah, and the post-biblical kingdom of Judea.

From the beginning of history to this day, Israel-Judah-Judea has the only united, independent, sovereign nation-state that ever existed in "Palestine" west of the Jordan River. (In biblical times, Ammon, Moab and Edom as well as Israel had land east of the Jordan, but they disappeared in antiquity and no other nation took their place until the British invented Trans-Jordan in the 1920s.)

After the Roman conquest of Judea, "Palastina" became a province of the pagan Roman Empire and then of the Christian Byzantine Empire, and very briefly of the Zoroastrian Persian Empire. In 638 CE, an Arab-Muslim Caliph took Palastina away from the Byzantine Empire and made it part of an Arab-Muslim Empire. The Arabs, who had no name of their own for this region, adopted the Greco-Roman name Palastina, that they pronounced "Falastin".

In that period, much of the mixed population of Palastina was forced to convert to Islam and adopted the Arabic language. They were subjects of a distant Caliph who ruled them from his capital, that was first in Damascus and later in Baghdad. They did not become a nation or an independent state, or develop a distinct society or culture.

In 1099, Christian Crusaders from Europe conquered Palestina-Falastin. After 1099, it was never again under Arab rule. The Christian Crusader kingdom was politically independent, but never developed a national identity. It remained a military outpost of Christian Europe, and lasted less than 100 years. Thereafter, Palestine was joined to Syria as a subject province first of the Mameluks, ethnically mixed slave-warriors whose center was in Egypt, and then of the Ottoman Turks, whose capital was in Istanbul.

During the First World War, the British took Palestine from the Ottoman Turks. At the end of the war, the Ottoman Empire collapsed and among its

subject provinces "Palestine" was assigned to the British, to govern temporarily as a mandate from the League of Nations.

THE JEWISH NATIONAL HOME

Travelers to Palestine from the Western world left records of what they saw there. The theme throughout their reports is dismal: The land was empty, neglected, abandoned, desolate, fallen into ruins.

Nothing there [Jerusalem] to be seen but a little of the old walls which is yet remaining and all the rest is grass, moss and weeds
-- English pilgrim in 1590

The country is in a considerable degree empty of inhabitants and therefore its greatest need is of a body of population"
-- British consul in 1857

There is not a solitary village throughout its whole extent [valley of Jezreel] -- not for 30 miles in either direction. . . . One may ride ten miles hereabouts and not see ten human beings.

For the sort of solitude to make one dreary, come to Galilee . . .

Nazareth is forlorn . . . Jericho lies a moldering ruin . . . Bethlehem and Bethany, in their poverty and humiliation... untenanted by any living creature . . .

A desolate country whose soil is rich enough, but is given over wholly to weeds . . a silent, mournful expanse . . . a desolation . . . . We never saw a human being on the whole route . . . . Hardly a tree or shrub anywhere. Even the olive tree and the cactus, those fast friends of a worthless soil had almost deserted the country . . . .

Palestine sits in sackcloth and ashes . . . desolate and unlovely . . .

-- Mark Twain, The Innocents Abroad, 1867

The restoration of the "desolate and unlovely" land began in the latter half of the Nineteenth Century with the first Jewish pioneers. Their labors created newer and better conditions and opportunities, which in turn attracted migrants from many parts of the Middle East, both Arabs and others.
The Balfour Declaration of 1917, confirmed by the League of Nations Mandate, commited the British Government to the principle that "His Majesty's government view with favour the establishment in Palestine of a Jewish National Home, and will use their best endeavors to facilitate the achievement of this object. . . . " It was specified both that this area be open to "close Jewish settlement" and that the rights of all inhabitants already in the country be preserved and protected.

Mandate Palestine originally included all of what is now Jordan, as well as all of what is now Israel, and the territories between them. However, when Great Britain's prot?g? Emir Abdullah was forced to leave the ancestral Hashemite domain in Arabia, the British created a realm for him that

included all of Manfate Palestine east of the Jordan River. There was no traditional or historic Arab name for this land, so it was called after the river: first Trans-Jordan and later Jordan.

By this political act, that violated the conditions of the Balfour Declaration and the Mandate, the British cut more than 75 percent out of the Jewish National Home. No Jew has ever been permitted to reside in Trans-Jordan/Jordan.

Less than 25 percent then remained of Mandate Palestine, and even in this remnant, the British violated the Balfour and Mandate requirements for a "Jewish National Home" and for "close Jewish settlement". They progressively restricted where Jews could buy land, where they could live, build, farm or work.

After the Six-Day War in 1967, Israel was finally able to settle some small part of those lands from which the Jews had been debarred by the British. Successive British governments regularly condemn their settlement as "illegal". In truth, it was the British who had acted illegally in banning Jews from these parts of the Jewish National Home.

WHO IS A PALESTINIAN?

During the period of the Mandate, it was the Jewish population that was known as "Palestinians" including those who served in the British Army in World War II.

British policy was to curtail their numbers and progressively limit Jewish immigration. By 1939, the White Paper virtually put an end to admission of Jews to Palestine. This policy was imposed the most stringently at the very time this Home was most desperately needed -- after the rise of Nazi power in Europe. Jews who might have developed the empty lands of Palestine and left progeny there, instead died in the gas chambers of Europe or in the seas they were trying to cross to the Promised Land.

At the same time that the British slammed the gates on Jews, they permitted or ignored massive illegal immigration into Western Palestine from Arab countries Jordan, Syria, Egypt, North Africa. In 1939, Winston Churchill noted that "So far from being persecuted, the Arabs have crowded into the country and multiplied . . . ." Exact population statistics may be problematic, but it seems that by 1947 the number of Arabs west of the Jordan River was approximately triple of what it had been in 1900.

The current myth is that these Arabs were long established in Palestine, until the Jews came and "displaced" them. The fact is, that recent Arab immigration into Palestine "displaced" the Jews. That the massive increase in Arab population was very recent is attested by the ruling of the United Nations: That any Arab who had lived in Palestine for two years and then left in 1948 qualifies as a "Palestinian refugees".

Casual use of population statistics for Jews and Arabs in Palestine rarely consider how the proportions came to be. One factor was the British policy of keeping out Jews while bringing in Arabs. Another factor was the violence

used to kill or drive out Jews even where they had been long established.

For one example: The Jewish connection with Hebron goes back to Abraham, and there has been an Israelite/Jewish community there since Joshua long before it was King David's first capital. In 1929, Arab rioters with the passive consent of the British -- killed or drove out virtually the entire Jewish community.

For another example: In 1948, Trans-Jordan seized much of Judea and Samaria (which they called The West Bank) and East Jerusalem and the Old City. They killed or drove out every Jew.

It is now often proposed as a principle of international law and morality that all places that the British and the Arabs rendered Judenrein must forever remain so. In contrast, Israel eventually allotted 17 percent of Mandate Palestine has a large and growing population of Arab citizens.

FROM PALESTINE TO ISRAEL

What was to become of "Palestine" after the Mandate? This question was taken up by various British and international commissions and other bodies, culminating with the United Nations in 1947. During the various deliberations, Arab officials, spokesmen and writers expressed their views on "Palestine".

"There is no such country as Palestine. 'Palestine' is a term the Zionists invented. . . . Our country was for centuries part of Syria. 'Palestine' is alien to us. It is the Zionists who introduced it."

-- Local Arab leader to British Peel Commission, 1937

"There is no such thing as Palestine in history, absolutely not"

-- Professor Philip Hitti, Arab historian to
Anglo-American Committee of Inquiry, 1946

"It is common knowledge that Palestine is nothing but southern Syria."
-- Delegate of Saudi Arabia to the
United Nations Security Council, 1956,

By 1948, the Arabs had still not yet discovered their ancient nation of Falastin. When they were offered half of Palestine west of the Jordan River for a state, the offer was violently rejected. Six Arab states launched a war of annihilation against the nascent State of Israel. Their purpose was not to establish an independent Falastin. Their aim was to partition western Palestine amongst themselves.

They did not succeed in killing Israel, but Trans-Jordan succeeded in taking Judea and Samaria (West Bank) and East Jerusalem, killing or driving out all the Jews who had lived in those places, and banning Jews of all nations from Jewish holy places. Egypt succeeded in taking the Gaza Strip. These two Arab states held these lands until 1967. Then they launched another war of annihilation against Israel, and in consequence lost the lands they had taken by war in 1948.

During those 19 years, 1948-1967, Jordan and Egypt never offered to surrendar those lands to make up an independent state of Falastin. The "Palestinians" never sought it. Nobody in the world ever suggested it, much less demanded it.

Finally, in 1964, the Palestine Liberation Movement was founded, with a charter that proclaimed its sole purpose to be the destruction of Israel. To that end it helped to precipitate the Arab attack on Israel in 1967.

The outcome of that attack then inspired an alteration in public rhetoric. As propaganda, it sounds better to speak of the liberation of Falastin than of the destruction of Israel. Much of the world, governments and media and public opinion, accept virtually without question of serious analysis the new-sprung myth of an Arab nation of Falastin, whose territory is unlawfully occupied by the Jews.

Since the end of World War I, the Arabs of the Middle East and North Africa have been given independent states in 99.5 percent of the land they claimed. Lord Balfour once expressed his hope that when the Arabs had been given so much, they would "not begrudge" the Jews the "little notch" promised to them.

[Some of the material cited above is drawn from the book From Time Immemorial by Joan Peters.].

I turned on my radio and heard that we are at war. Needless to say, I was shocked.

Israel DID exist, and HAS existed, in one form or another, for CENTURIES,
whereas Palestine NEVER really existed.

NO, NO - it's the jamming signal, with a sub-sonic carrier wave carrying
subliminal messages that is forcing people all over the WORLD to listen to
anybody but Saddam Hussein!!!

I don't know - I have many back issues of Popcomm, and don't recall ANYTHING
in there that shows any "proof" of the US jamming any signals - perhaps he
would care to enlighten us with a link to an article that shows this? I mean
a FACTUAL article, with scientific facts, not the babblings of another
johnny...?
I mean, if he's going to smear a magazine, he should have proof to back up
his claims, no?

Now, stop that - just because he names those mags is no reason to smear
them. Sure, lots of stuff in there is conjecture, but they DO have SOME
useful stuff, and they're great magazines for kids just getting into the
hobby. I don't think anybody is going to start hating chocolate because
johhny uses THAT in one of his arguments (just wait)...

Letters to the Editor
- Arlington, VA

During the past several months in the American press, the Democrats have frequently denounced the Republicans as Nazis due to their attempts to control runaway federal spending. How very ironic. I remember the Nazis. Let me share a little about them and recall some of their exploits.

First of all, "Nazi" was gutter slang for the verb "to nationalize". The Bider-Mienhoff gang gave themselves this moniker during their early struggles. The official title of the Nazi Party was "The National Socialist Workers Party of Germany". Hitler and the Brownshirts advocated the nationalization of education, health care, transportation, national resources, manufacturing, distribution and law enforcement.

Hitler came to power by turning the working class, unemployed, and academic elite against the conservative republic. After Der Fuhrer's election ceased being a political conspiracy and was transformed into a fashionable social phenomenon, party membership was especially popular with educators, bureaucrats, and the press.

Being a Nazi was "politically correct". They called themselves "The Children of the New Age of World Order" and looked down their noses at everyone else. As Hitler acquired more power, he referred to his critics as "The Dark Forces of Anarchy and Hatred". Anyone who questioned Nazi high-handedness in the German press was branded a "Conservative Reactionary". Joseph Goebbels, minister of communications, proclaimed a "New World Order".

The Nazi reign of terror began with false news reports on the Jews, Bohemians and Gypses who were said to be arming themselves to

overthrow the "New World Order" and Hitler demanded that all good people register their guns so that they wouldn't fall into the hands of "terrorists and madmen".Right-wing fanatics of the "Old Order" who protested firearms registration were arrested by the S.S. and put in jail for "fomenting hatred against the Government of the German people".

Then the Reichstag (government building) was blown up and Hitler ram-rodded an "Emergency Anti-Terrorist Act" through Parliament that gave the Gestapo extraordinary powers. The leader then declared that for the well-being of the German people, all private firearms were to be confiscated by the Gestapo and the Wermotten (federal law enforcement and military). German citizens who refused to surrender their guns when the "jack-boots" (Gestapo) came calling, were murdered in their homes. By the way, the Gestapo were the federal marshals' service of the Third Reich. The S.W.A.T. team was invented and perfected by the Gestapo to break into the homes of the enemies of the German people.

When the Policia Bewakken, or local police, refused to take away guns from townsfolk, they themselves were disarmed and dragged out into the street and shot to death by the S.A. and the S.S. Those were Nazi versions of the B.A.T.F. and the F.B.I. When several local ministers spoke out against these atrocities, they were imprisoned and never seen again.

The Gestapo began to confiscate and seize the homes, businesses, bank accounts, and personal belongings of wealthy conservative citizens who had prospered in the old Republic. Pamphleteers who urged revolt against the Nazis were shot on site by national law enforcement and the military. Gypsies and Jews were detained and sent to labor camps. Mountain roads throughout central Europe were closed to prevent the escape of fugitives into the wilderness, and to prevent the movement and concealment of partisan resistance fighters.

Public schools rewrote history and Hitler youth groups taught the children to report their parents to their teachers for anti-Nazi remarks. Such parents disappeared. Pagan animism became the state religion of the Third Reich and Christians were widely condemned as "right wing fanatics".

Millions of books were burned first and then people. Millions of them burned in huge ovens after they were first gassed to death. Unmarried women were paid large sums of money to have babies out of wedlock and then given medals for it. Evil was declared as being good, and good was condemned as being evil. World Order was coming and the German people were going to be the "peacekeepers".

Yes, indeed, I remember the Nazis and they weren't Republicans, or "right wing", or "patriots" or "militias". They were Socialist monsters.

-- Thomas Colton Ruthford
~~~~~~~~~~~~~~~~~
Buford Furrow's bloody rampage is over, and now begins the predictable propaganda campaign to score political points. With egregious sleight of hand, the American "right wing" will be demonized. No doubt, the media will get around to blaming talk radio and the Internet.

Notice that some events precipitate wide-ranging discussions on political philosophy, while others do not. After a series of school-yard killings in which the murderers were linked to violent Satanic cults, and even after it was shown that the deranged kids set out to kill students who believe in God, there was no hunt for atheistic "left-wing extremists." That would have been an unseemly attempt to use tragedy to advance a partisan agenda.

But Furrow, a deranged criminal, gives the media an opportunity to do what they love best: attack those who oppose the ever-increasing government control of our lives. Furrow, then, is being called "right wing" because he was associated with Neo-Nazi groups that imagine themselves as successors to Hitler. Their acts of violence are designed to set off a domestic war that would lead to the establishment of a New Order run by them.

But what, in Heaven's name, does any of this have to do with "right-wing" theory? By "right wing," the media can mean one of these killer Nazi thugs, or they can mean someone who believes in private property, free enterprise, and bourgeois social norms. The blurring of the difference -- they are really polar opposites -- is wildly dishonest but obviously purposeful.

Of course, the media are free to define terms however they like, but the fact is that the ideological origins of Nazism are with the left. The term Nazi itself is short for the National Socialist German Workers Party. Nazism was fashioned as a totalitarian nationalist alternative to the totalitarian international socialism of the Lenin model. But national or international, the relevant word is socialist, which should be the first tip-off to Nazism's leftist origins.

It was no accident that the Nazi flag was a red banner; it was taken from the flag of socialism. As Erik von Kuehnelt-Leddihn showed in his book, "Leftism" (1974 and 1990), Hitler and all his top lieutenants were hard-core socialists who hated everything about the old Europe, including small states, the monarchs, the Church, the landed aristocracy, peace, and the free economy of the 19th century. They imagined themselves running a centralized, protectionist, and statist Germany under the executive-branch "leadership principle." They talked constantly of a proletarian revolution that would destroy the bourgeois class.

Furthermore, as Robert Proctor showed in "Racial Hygiene: Medicine Under the Nazis" (1988), the Nazis were health fanatics who banned cigarette smoking, promoted vegetarianism and organic gardening, engaged in abortion and euthanasia, frowned on all capitalist excess,
~~~~~~~~~~~~~~~~~

and even promoted animal rights. They were environmentalists who locked up land from development to promote paganism.

The Nazi government introduced socialized medicine and government-mandated vacations at government spas, imposed handgun control, and expanded unemployment "insurance" and Social Security. The Nazis opposed the traditional calendar and wanted to replace it with one centered on race and nation rather than faith and family.

A new study of Nazi make-work programs of the 1930s by Dan P. Silverman ("Hitler's Economy," 1998) shows that Hitler's government pursued a program of "public investment" even more far reaching than the U.S. New Deal. This government imagined itself as the employer of every citizen, the planner of every production decision, and the redistributor of every accumulated pocket of wealth in society. From the Nazi point of view, full glory came during the war when they took over the economy completely, Soviet-style.

Whatever you want to call a violent movement that idealizes Hitler's socialist Third Reich, "right-wing" doesn't cut it. Consider also the politics of the Neo-Nazi novel that inspires many of these killers. It is called the Turner Diaries. The book got a lot of attention after the bombing of the Oklahoma federal building because it was a favorite of Timothy McVeigh's.

It has been said that the book advocates the killing of federal officials. In fact, that's just the initial hook. Conspirators wipe out all their enemies, which include anyone who opposes their rise to total power. After taking over, they restart the calendar at the year zero, a goal associated with every socialist thinker from Rousseau to Pol Pot.

Also in the book, businessmen are portrayed as a greedy class that puts money before race, and Christians are demonized as stupid and evil. In the U.S. of the future, all free enterprise and free trade are abolished. Instead, we get a central-planning regime that distributes all resources, including food, on an equal basis. The citizens are pliable subjects of the socialist elite who exercise total power. The book ends with nuclear bombs, the invention of the socialist FDR, destroying all of Africa, China, and South America.

The plot, however crude, isn't entirely unfamiliar. It is just a version of the nightmarish dream of every variety of socialism: millennialist imaginings of a new age of history, hatred of businessmen, opposition to established religion, a belief in central planning, a love of central power, and a world government that crushes all opposition to the revolution.

No matter what they call themselves, the people who have similar dreams of total social and economic control today are on the left, not the right. (That there exists a venerable non-socialist tradition on the left is another issue for another day.) The uncomfortable truth is

this: the differences between the fevered imaginings of Furrow, and those advanced in the academic socialist literature, do not concern ideological substance, but its particular shading and application.

> jammer know when to stop?

Why not ask any teenager with a CB radio how this is done? If the person they are trying to jam is still talking when they stop, they start back up again.

Shortwave stations are even easier as they follow strict programing schedules. You can tell when the news portion of the broadcast is going to be over without even listening, but just watching the clock. Sort of like turning your radio to another station during the commercial breaks and being able to know when it will be safe to go back to that station. You learn how long their commercial breaks are, and you can time it to the minute.

All very complex and sophisticated, but the government has the special equipment and rocket scientists needed to figure this out too.

Here is a science experiment for you:

WHAT YOU WILL NEED:

A VACUUM CLEANER
A RADIO
A PERSON TO HELP YOU WITH THE EXPERIMENT

WHAT TO DO:

Have the person sit in a room. On the other side of the room turn on the radio to an AM news station.
Place the Vacuum cleaner right next to the person. When the weather report comes on (there should be one every 15 minutes) turn on the vacuum cleaner until the weather report is over. Then ask the person what the weather report said. Then come back to the newsgroup and admit that it actually IS possible.

Spring cleaning - SHACK SALE!

April 2, 2003

UPDATE - Watch For Updates & Additions

Everything has to go ASAP! Make me offers!!!

*** Communication Specialists TP-154 Repeater Controller ***

Encodes / Decodes PL, DPL and I think inverted PL

Has a courtesy tone

Has a programmable ID'er

Programmable time limits for system and for each tone/code

Lots of other features

Manual with programming, operation and hook up data included

Programmable over the air or via programming jack - uses a touchtone phone.

A great controller for starter / basic systems

TESTED - was used on my system.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-027S.JPG

PRICE LOWERED!

*** Asking $125 Shipped - OR OFFER ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Radio Shack PRO-2067 Base / Mobile Scanner ***

500 Channels
Trunk Tracking - Motorola type I, II. I/II Hybrid, LTR, EDACS
SAME Technology for Weather alerting
PC Programmable
Direct keypad frequency input
CTCSS / DPL decode
4 line Alpha display
BNC antenna connector
Plus much much more features

*** Comes with the following: ***
Mounting bracket
Original user manual
Wall wart power pack - for base use
Serial programming cable
Programming software

This scanner has been tested and works just beautifully. Condition is Very
good - non-smoker, never mobile. I bought 2 of them, I just need one now...
so
one has to go.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-018S.JPG

PRICE LOWERED!
*** I'm asking $175 Shipped - OR OFFER for the whole setup ready to plug and
play... sent 2-3 day priority mail ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Motorola P200 UHF 2 Channel Handheld Radio***

SOLD

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Palm IIIx PDA ***

Just your basic Palm PDA

WORKS GREAT!

Maybe it could find a use on APRS or used with a GPS unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-021S.JPG

*** $40.00 shipped - or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Kenwood TM-742A Multi Bander Mobile Radio ***

SOLD!

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Kenwood TS-700SP 2 Meter ALL MODE ***

Built in digital display along with analog dial

10W output - perfect for feeding amplifiers

Comes with the 120V AC cord, manual and the original hand mic.

Works good, however the display flickers once in a while when tuning.
Rocking the tuning dial up and down in freqs clears the problem.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-024S.JPG

PRICE LOWERED!

*** Asking $130.00 Shipped - Or offer ***

-------- ------------ ----------- ------------- ----------------- --------

*** Scott Air Pack SCBA unit (Fire Fighters air pack) ***

Comes with carry / storage case, mask, regulator, tank frame and tank . the
whole complete unit.

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-025S.JPG

PRICE LOWERED!

*** Asking $100.00 ***

LARGE item - please send city & zip for shipping calculation

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** Setcom 7-PR4SB Headset with Boom Mic ***

I'm not sure what radio it is wired for, but it was used with an HT for auto
racing (Pit Crew)

PICTURE AT:

http://www.kmcnet.net/Auction_Stuff/MVC-030S.JPG

PRICE LOWERED!

*** Asking $35.00 shipped or offer ***

-------- ------------ ----------- ------------- ----------------- --------
-------- -------------

*** TX-RX 900MHz Vari-Notch Cavity filters / (Duplexer?) ***

Quantity - 4

Filter Type - Vari-Notch

Model - 15-88-01

Freq - 890 - 960MHz

There is 4 of these filters on a rack mount frame. No interconnecting cables. I was going to send these to TX-RX to have them convert 2 of them to Pass High and make the interconnecting cables - But I went with a different duplexer. GREAT FOR 900MHz HAM SYSTEMS!

PICTURES AT:

http://www.kmcnet.net/Auction_Stuff/MVC-028S.JPG

http://www.kmcnet.net/Auction_Stuff/MVC-029S.JPG

PRICE LOWERED!

*** Asking $140 shipped - or offer ***

-------- ------------ ----------- -------------- ----------------- --------
-------- -------------

There's more to be listed... Keep an eye open for my posts.

I accept Paypal online payments, US Postal Money Orders and TRADES. I don't have any specific list of what I'm looking for in trade.so if you want to offer a trade, send me your "trade list" for what item(s).

Please note, included shipping is for continental US addresses ONLY, Hawaii, Alaska and international addresses, I will calculate the additional shipping needed.

Thanks

Dave Schmidt

> Being a genius, and having a large font of knowledge, are not one and the
> same. A genius, defined by Mensa as having an IQ in the 98th percentile or
> higher (132 or higher on Stanford-Binet test). A person can attain this
> score, or higher, and still be ignorant, that is, lack any base of
> knowledge.

There is no physical written test you can take to judge IQ or intelligence. Any intelligent person would know that. I can devise an IQ test that you would fail and I would master, someone could devise a test that I would fail and you would master. Someone can ace an IQ test, and still not know or figure out what is happening with the US and it's war on countries like Iraq.

> As an example, let's use yours of how many people cannot program their
> VCR's. This phenomenon is not due to the average person lacking the
> intelligence to do so, but rather the basic knowledge or cognitive skills
> (or just plain laziness of not reading the manual) to do so.

Shit it was just a quick example, not the perfect example, and I would never have intended an instruction manual to be included in the example as you have done.

The population of stupid people far far outnumber the population of intelligent people. That was the point that I was trying to make, but there are too many stupid people out there that are not able to understand the point that was being made. This only further proves the point.

> IQ is not a
> measure of how much a person knows, it is a measure of how easily a person
> is able to learn and assimilate new things.

Changing this into an argument of legal definitions of IQ and intelligence is just as much of a time waster as pleading with a supreme court judge to try and follow the constitution that is written very clearly and was meant to be taken literally, not to be interpreted some other way or be up for discussion and opinions about it.

> In the case of our VCR
> programming, the fault lies mostly with the latter explanation of laziness,
> with some blame to be placed upon the writers or translators of the users
> manuals because such manuals are not clearly written,

The point that someone would need to even read a manual to figure out how to use a VCR just goes to show you how stupid so many people are, and was the point I was TRYING to make. You wouldn't NEED a manual if everyone was intelligent enough to understand how to figure out what all the labeled buttons on the remote are for, and just follow the on screen menu directions. Yet we include

the manuals for what? Because MOST people are too stupid to figure this basic stuff out.

Have you ever READ one of those manuals just for fun? My favorite part is the troubleshooting sections. Like if the unit does not light up or do anything, make sure to check that the power cord is plugged into an electrical outlet. If you can't receive any channels, make sure that you have the antenna or cable connected to the VCR. Do we REALLY need to include stuff like this in the manuals? YES WE DO! Talking to people on newsgroups shows us real fast WHY we do.

> and some machines are
> decidedly less intuitive than others. I for one have never had a problem
> programming any of my VCR's, even without the manual.

I should hope not, but for a moment there you were scaring me into thinking you might.

> This does not qualify
> me to be a genius. :)

Of course not, but it puts you above the millions of idiots. It costs companies lots of money to include a manual in each box for every set they sell, right? Why not just not have a manual and save money if you and I don't need it anyway? Because the MAJORITY of people are idiots and need a manual to tell them to check and see if the unit is plugged in if the unit is not working and nothing happens when you turn the power button on.

Being able to operate the VCR puts you and I above all the millions of idiots. But being able to design and create the VCR is yet a step higher and even fewer people can do that than can use a VCR without a manual. See where this is going? A Genius is even a step above the guy who can design the VCR.

I don't place myself at the Genius level, but well above the idiot level. There are more than just two levels (idiot and genius) yet there are actually people here that assumed I must consider myself a genius, just because I consider myself more intelligent than the idiots. See, even THIS has to be explained to people.

Why is it I have no problem explaining things to young children, yet most adults never seem to understand anything? I know the answer to that, I am just pointing out how sad that is.

We all start out with a basic program and instinct to question everything and try to figure things out. Then we get sent through a school system that punishes those that think on their own instead of thinks as they are told and taught to think. Society programs people against the design of nature and evolution. Thus young children still have some of the ability to think for themselves and are always able to ask their parents questions that the parents are not able to answer. Like why do you have to sit at a red traffic light in the middle of nowhere at 3 in the morning when there are no other cars on the road. Well, dear, that's just because it is the law and just the way it is. But WHY mommy or daddy, that makes no sense and is STUPID.

The older most people get, the less they keep of their common sense and logical reasoning, and the more they just do things because that is just the way it is done without ever sitting back and thinking how stupid it really is.

Like the street sign around schools that says: "No turn on red on school days when children are present."
So if it is not a school day and a hundred children are present, I can turn on red. That makes soooo much sense it makes me want to pull out all of my hair. But let us say that they made the signs properly so that it would just say: "No turn on red when people are present" We ALREADY know that you can only turn on red when and if it is safe to do so! Is this sign even needed at all? Apparently so.

Just like all the ridiculous gun laws. We already have a law that says it is illegal to kill someone.

Just go into your town and sit down and watch people and society in action. Then THINK about everything you see and question everything. If you don't find anything wrong or against logic or nature in 5 minutes, just go back home and be happy. You are a fine upstanding citizen and the government is proud of you.

Has anyone here ever read Mein Kampf? If not, ask yourself WHY you have not. I mean REALLY ask yourself why you have not read it or why you would have no desire to read it. Knowing that the government doesn't want me to read it and how bad and evil I am always told by my government that the author was, I figured this should be on everyone's must read list just for that reason. I mean what is it that is so powerful that the government doesn't want me to read it. Many countries (including Germany) you can't even buy it or be allowed to have it anymore!

Before you say, isn't that a great thing about the US, keep in mind that if you buy it from a book store your name and this information must be given to the government under the Patriot Act.

Check out the warning some libraries are now posting informing their patrons about this:

Although the Santa
Cruz Library makes
every effort to protect
your privacy, under the
federal USA
PATRIOT ACT
(Public Law 107-56),
records of the books
and other materials you
borrow from this
library may be
obtained by federal
agents. That federal law
prohibits library
workers from informing

you if federal agents
have obtained records
about you. Questions
about policy should be
directed to Attorney
General John Ashcroft,
Department of Justice,
Washington D.C.
20530.

I had to get this from the google search CACHED feature, as for some reason, they have removed this warning, no doubt from government pressure to remove it.

Go to Google and do a search for Santa Cruz Library, Patriot Act, and Ashcroft and then click on CACHED to see the actual webpage.

Also, many books on Hitler are no longer in print and hard to find in the US. Not because of low demand, just see how much they sell for on Ebay or how fast they sell at used book stores when a copy becomes available.

You will find tons of books on Hitler written by Jewish authors, but you can't get the one Hitler wrote called "My New Order" or the one by Kubizek that knew Hitler as a child. Those are out of print and unavailable in the US by that method of censorship.

Want to buy a book containing some of Hitler's speeches? Got $300 or more? That's how much the books cost. Check Amazon.com or have your local bookstore see if they can order you one and watch their face when they see how much it costs. Is it a real big book, leather bound and wrapped in gold? No. Why does it cost hundreds of dollars? Because the government doesn't want people reading it that can't afford this price. If someone can afford to throw that much away on a book about Hitler's speeches, then you don't have to worry about them having this information anyway, they have been well programed already.

I read Mein Kampf, and I was really really shocked at what I read. But not in the way I thought I would be shocked. I recommend everyone read that book. Even though it was written so long ago, you think you are reading about the United States the way the United States is today, by an observer today explaining about the US congress and the US government and how it works. Absolutely amazing.

Definitely recommended reading. And don't be afraid to read the book. Surely you have a brain and mind strong enough that it can't be changed and programmed by reading just one book, can it?

Just a note: Mensa takes you in on performance in the top 2% on any of
several intelligence tests, past or present. Thus eligibility for the genius
label is likely available to several times 2% of the population.

You're NEARLY right - neither Palestine nor Israel existed historically -
both are quite recent political constructs, though the Romans called an
area "Palestine" about 2000 years ago. However, there have never actually
been "Palestinians", just as there can't really be any "Israelis"!

Not only that. But if the Bible is 100 percent God's truth. Then why hasn't it been presented to all people across the world now and in the past 2000 years or so. Not only that fact but I know that some of my ancestry was American Indian and they didn't know anything about Christianity until the Europeans came here during the 1600's. You will also find that phenomenon occured in a multitude of cultures in the past 2000 years. Now how can something be absolute truth if hasn't been brought up to the mass of people. For example, the Bible talks about eternal hell but how can you damn someone to hell for an eternity for not knowing anything about that religion. If you go back and read, you will find that most cultures across the world did not have any contact with Christianity until the past 300 years or so as the colonialists moved into Asia, Africa, and South America. People have existed in Vietnam, China, Burkina Faso, Congo, etc for thousands of years yet have never heard anything of Christianity until the past 300 to 400 years at best. I suspect there are still some individuals in tribes in South America or in the Pacific/Asia sphere that don't even have a Bible where they can study Gods word.

The Spanish Inquistion was a fine example of human barbarity not to mention the Crusades. What is interesting with the Crusades is that the Crusaders believed they were on a mission from God to take back the holy places yet they failed in the long run. They were able to repulse the Muslims at the first but eventually they were defeated again. Yet, despite the fact it was a mission from God, they lost.

Yep, everyone is of Satan including all of the people who aren't even the slightest bit familiar with Christianity. I suspect all of the American Indians are of Satan as well as the other indigenous tribes. Not only that but all the other tribal people across the world. They are all of Satan arent they. Those people were here before the Christians but they are all of satan Right

Actually Jesus told a lot of the believers that they wouldnt make it to heaven either. Matter of fact, he told them that they should go away. Even though, they prophesized and did good works for Him, he told they away from me, because you never knew me

Its kinda like God giving you a mind to think and your fundamentalist doesnt use it. The earth is also flat according to the church. Also, the fact is that Jesus never intended for his followers to start a church. In fact, the word church is only brought up twice in the Bible.

Good point. One can look at the Salem witch trials, Crusades, Spanish Inquisition, etc for examples of murderous behavior and persecution. Of course, the secular world has it share of barbarity yet these behaviors came from an organized religion

To argue about "evidence" to support something about a fictional character of mythology, is like
trying to find evidence supporting that Santa Clause voted Republican.

The fact that you are even having this debate is hilarious. What "evidence" can be provided to
show that Jesus could walk on water, rise from the dead and fly into outer space, or that Santa Could
make reindeer fly?

These are fairy tales to make children behave. "Obey thy mother and father" "Be good or no presents"

When you grow up to be an adult, you realize that Jesus and Santa are make-believe.
Well, some of us anyway.

> There is a good reason why the mere mention of Jesus elicits so much
> response. The mention of His name requires everyone to make a decision. What
> will we do with Him?

The same thing we do with Santa. Put a statue of him up once a year, and put
him back in the closet for the rest of the year.

> Will we accept the free gift of God?

Nothing is free. (except AOL CDs) He makes you work hard for every single
thing you get.

> We have people here who think the whole thing is a big joke.

No, everyone believes that people can walk on water and rise from the dead and
fly up into outerspace.

> We have people who think they are Christians and are not.

THAT you have right. Bush is one of them, the Pope is another. Bush sends
people to kill. The Pope does not go to Iraq and stand as a human shield.
Priests continue to molest and rape little boys. If they believed in god and
jesus, and that god and jesus could KNOW what they are doing to those little
boys, why would they do it in the first place? Because they DON'T believe in
it. They just like the almighty collection plate and the tax free money it
provides them.

> JESUS IS LORD.

I thought he was the Lord's son? You people can't even agree on that! If
they are both the same, then Jesus impregnated his own mother, and you know what
that makes him... a mother........

God told you to worship no one but him. Yet you worship Jesus and the Pope.
SINS!

> One truth. One God.

MANY gods. Read Genesis where God speaks to the other gods and has fear that
eating from the tree of knowledge has made Adam and Eve like them. (gods
plural)

> Its real easy. My 10 year old can do it.

And a 10 year old son of Buddhist parents can understand about Buddha. And a
10 year old son of parents from another cult can understand why sacrificing
animals and humans is the right thing to do.

It is not hard to brainwash a 10 year old, it is just a very sick and twisted thing to do.

Isn't it amazing that people happen to believe in the gods from the same religion their parents did? Somehow, children in Iraq or Afghanistan never see angels or believe in Jesus. What political party do you belong to? Do your parents belong to the same party? Huh. Amazing, what a coincidence.

> So can you. Just believe it. Read
> your Bible, get on your knees and ask for forgiveness

Forgiveness for what crime? Not believing in someone who doesn't have the decency to introduce himself and is hiding from everyone? Eternal pain in hell seems like a just punishment to fit that crime, don't you think?

Jesus:
"If any one comes to me and does not hate his own father and mother and wife and children and brothers and sisters, yes, and even his own life, he cannot be my disciple." - Luke 14:26

So I hope you hate your own mother, father, children, etc., or Jesus wants nothing to do with you.

Read the book instead of waving it around, and you will see that you are not even following what it tells you to do. Do you know what you call a Christian after he actually READS the bible? An Atheist.

Not only that, note how God is just like Bush. Orders everyone in the world to follow his orders and commandments or else be doomed to great punishment.

If I was a god, I would allow everyone to have freewill and do as they please, not dictate to them how they have to live like you would to slaves. But that is just me.

Was he a Christian teacher, or a Jewish teacher? First of all, he was a friggin Carpenter, not a teacher, unless he taught shop class at some time in his life that the Bible forgot to mention.

Is Jesus the son of god, or is Jesus god himself? Why worship Jesus, when you can worship God himself? If they are both the same, then what is the son of god stuff all about?

Where the hell did Cain's wife come from? If he had sex with one of his sisters, then let's give that sister a name like we do for the rest of the family.

Its like the Biblical story of Jonah being swallowed by a whale and living in the whales belly for 3 days and being finally spat on the land. Not only that but the story of Noah where Noah was a sinless man who built the Ark yet after the Ark found its resting place he was found drunken and naked by his son. Its stories like that really hurt the moral message of the Bible. Its like in the Old Testament when God commanded Moses to kill, yet when one thinks about it, since God has all the power then why doesnt he kill them instead of commanding Moses. Or is it Moses trying to cover his own actions.

Because they don't believe in God. We all know that the mythology goes like this... You can't fool God and he can see everything we do and know everytime we sin, right?

So how do you explain all the priests that molest and rape little boys? If they believed in God, they would know that God saw them having sex with the little boys, right? Obviously priests don't believe in the product they are selling, they are just looking for suckers to take money from.

They kneel and worship the almighty collection plate that gives them tax free cash, without having to provide any real service or product. Money for free.

Sometimes, I wonder how much of the Bible has been mixed with other myths which ends up polluting the moral message. I find it strange that God creates 90 percent of his creation of humans so they can be damned to an eternal hell where the fire never quenches just because they don't believe in a book.. However, I think that doctrine came about during the 3rd century when the Christian church was trying to convert the Roman Pagans. Interesting too that the Sabbath day is supposed to be on Saturday yet all the churches have it on Sunday. Isnt that a violation of the Ten Commandments?

Funny that God creates his people so that they can end up being agents of Satan when the Bible says he is all knowing and all powerful. The Bible has never been a universal truth to all races, peoples, or tribes. Not all have been exposed to it nor have they even known anything about it. The Oubangui of Central Africa probably didnt find out about it until this century. The first English language Bible wasn't written until the 1500's after Gutenberg invented the printing press. So therefore, the word of God was in the clergy until that time for the most part. That in itself limits who will know the truth or alleged truth since most of the European societies were of lower educational levels and doubtfully could even read. Christianity wasnt introduced to Africa until the 1600s when the Dutch went to South Africa. Asia didnt witness Christianity until much of the same time for the most part as the Europeans colonized much of those areas. Same goes for South America, where the Yanomami Indians lives this day without much if any human contact and no knowledge of Christian teachings.

Really the Bible only accounts for a few years of his life anyway. Another good point about the fact that Cains wife was the effect of some level of what appears to be interbreeding. Yet later in the Bible it gives teachings against interbreeding. Ever noticed how interbreeding also leads to mental retardation. That fact can be seen in certain places in the US in regards to that matter.

A Challenge to All Christians
Kenneth Harding
1998

--

Mark 16:18

"They will pick up snakes with their hands; and when they drink deadly poison, it will not hurt them at all; they will place their hands on sick people, and they will get well." (NIV)

"They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." (KJV)

According to the New Testament of the Christian Bible, they (believers in Jesus Christ) can handle snakes, presumably poisonous ones, without harm. With this claim, religious faith enters the realm of testable science, and I hereby call the bluff.

Is the Bible true? Are its verses correct in every word, being inspired by God? Or is the bible mythology, the flawed word of primitive men? Or are some parts inspired, and some parts flawed? If so, which parts are true and which parts are false, and how can one determine which is which?

Is Mark 16:18 a lie? Does the Holy Bible contain a falsehood? Is it telling you that you, as a true believer, can do something extremely dangerous without risk? All Christians who truly believe in Jesus Christ are hereby challenged to handle a rattlesnake without physical protection, or drink a glass of arsenic (or any positively lethal substance), and seek no medical assistance afterward. The act must be performed in the presence of skeptical observers, and for authenticity, skeptics should provide the snake and/or poison as well. Well, is your faith strong enough? Do you really believe as strongly as you think you do?

--

The following article first appeared in Freethought Today, Vol. 15, No. 9.

Bite Kills Snake-handling Minister

A preacher, whose wife died three years ago from a snakebite, succumbed himself on Oct. 3, after handling a 3-foot-long timber rattler during a prayer meeting.

John Wayne "Punkin" Brown Jr., 34, of Tennessee, was bitten on the hand while preaching at the Rocky House Holiness Church in rural Alabama. He continued preaching for ten or 15 minutes after being bitten, then fell dead from the pulpit. His wife Melinda, 28, died in 1994 two days after refusing medical attention following a rattlesnake bite during a church service in Kentucky.

"He was really looking forward to that day anyway" when he could see his wife again, opined the Rev. Carl Porter of Kingston, Georgia, to the Birmingham News. Porter plans to pass along Brown's two rattlers to Brown's brother, by the way.

The Browns had five children.

There have been at least 75 snake-handling deaths among fundamentalists in the United States during this Century.

--

This event is submitted as EVIDENCE that the sacred scriptures are untrue.

Some may say, "He was not a true believer." Well, I submit that he was. He believed strongly enough to handle the snake. He was a minister. He had given over his life for his beliefs. He followed the word of God to the letter, and put his complete trust in the scripture. HE certainly thought that he believed. What more proof of belief could be provided? If that is not true belief, what is? Is your belief so strong?

Others may protest that he should not have tested the Lord. Well, it was the Lord, presumably, who inspired Mark (or whoever really wrote that book) to include that verse. After all, it is claimed that the scriptures are the inspired word of God. If God did not intend that people should make use of that verse as a guide for their lives, why did He include it at all? What other purpose could it possibly serve?

Some people suggest that this verse only applied to the original Apostles. BUT, that statement finds no support in scripture. If one reads verses 16 and 17, it becomes clear that Jesus was speaking about "them that believe", those that are baptized and saved. It does not say anything about the original Apostles being the only ones who can drink poison and handle snakes.

Preachers certainly make use of the second half of the verse "they will place their hands on sick people, and they will get well." You need only to turn on late night TV to see the proliferation of faith-healing charlatans, milking the public of their hard-earned funds, by pretending to heal their sicknesses. Why then should the first half of the verse Mark 16:18 be metaphorical, and the second half of it be literal? Such an

argument is an avoidance of the irrationality of the philosophy. This is one more example of the harm that literal belief in the bible can produce.

Just food for thought.

argument is an avoidance of the irrationality of the philosophy. This is one more example of the harm that literal belief in the bible can produce.

Just food for thought.

A Challenge to All Christians
Kenneth Harding
1998

--

Mark 16:18

"They will pick up snakes with their hands; and when they drink deadly poison, it will not hurt them at all; they will place their hands on sick people, and they will get well." (NIV)

"They shall take up serpents; and if they drink any deadly thing, it shall not hurt them; they shall lay hands on the sick, and they shall recover." (KJV)

According to the New Testament of the Christian Bible, they (believers in Jesus Christ) can handle snakes, presumably poisonous ones, without harm. With this claim, religious faith enters the realm of testable science, and I hereby call the bluff.

Is the Bible true? Are its verses correct in every word, being inspired by God? Or is the bible mythology, the flawed word of primitive men? Or are some parts inspired, and some parts flawed? If so, which parts are true and which parts are false, and how can one determine which is which?

Is Mark 16:18 a lie? Does the Holy Bible contain a falsehood? Is it telling you that you, as a true believer, can do something extremely dangerous without risk? All Christians who truly believe in Jesus Christ are hereby challenged to handle a rattlesnake without physical protection, or drink a glass of arsenic (or any positively lethal substance), and seek no medical assistance afterward. The act must be performed in the presence of skeptical observers, and for authenticity, skeptics should provide the snake and/or poison as well. Well, is your faith strong enough? Do you really believe as strongly as you think you do?

--

The following article first appeared in Freethought Today, Vol. 15, No. 9.

Bite Kills Snake-handling Minister

A preacher, whose wife died three years ago from a snakebite, succumbed himself on Oct. 3, after handling a 3-foot-long timber rattler during a prayer meeting.

John Wayne "Punkin" Brown Jr., 34, of Tennessee, was bitten on the hand while preaching at the Rocky House Holiness Church in rural Alabama. He continued preaching for ten or 15 minutes after being bitten, then fell dead from the pulpit. His wife Melinda, 28, died in 1994 two days after refusing medical attention following a rattlesnake bite during a church service in Kentucky.

"He was really looking forward to that day anyway" when he could see his wife again, opined the Rev. Carl Porter of Kingston, Georgia, to the Birmingham News. Porter plans to pass along Brown's two rattlers to Brown's brother, by the way.

The Browns had five children.

There have been at least 75 snake-handling deaths among fundamentalists in the United States during this Century.

--

This event is submitted as EVIDENCE that the sacred scriptures are untrue.

Some may say, "He was not a true believer." Well, I submit that he was. He believed strongly enough to handle the snake. He was a minister. He had given over his life for his beliefs. He followed the word of God to the letter, and put his complete trust in the scripture. HE certainly thought that he believed. What more proof of belief could be provided? If that is not true belief, what is? Is your belief so strong?

Others may protest that he should not have tested the Lord. Well, it was the Lord, presumably, who inspired Mark (or whoever really wrote that book) to include that verse. After all, it is claimed that the scriptures are the inspired word of God. If God did not intend that people should make use of that verse as a guide for their lives, why did He include it at all? What other purpose could it possibly serve?

Some people suggest that this verse only applied to the original Apostles. BUT, that statement finds no support in scripture. If one reads verses 16 and 17, it becomes clear that Jesus was speaking about "them that believe", those that are baptized and saved. It does not say anything about the original Apostles being the only ones who can drink poison and handle snakes.

Preachers certainly make use of the second half of the verse "they will place their hands on sick people, and they will get well." You need only to turn on late night TV to see the proliferation of faith-healing charlatans, milking the public of their hard-earned funds, by pretending to heal their sicknesses. Why then should the first half of the verse Mark 16:18 be metaphorical, and the second half of it be literal? Such an

argument is an avoidance of the irrationality of the philosophy. This is one more example of the harm that literal belief in the bible can produce.

Just food for thought.

I actually have no idea how to do this or which of the two types of sutures would be used or anything like that. You found me out. I said you win. What more do you want? I can't find anyway to argue your statements and am here admitting it. Why are you wasting time with someone like me that can no longer match your debating skills? Time to find someone else now who is more on your level of debating. With me you are just going to win every

argument from now on and how challenging will that be for you?

Interestingly, this story may give proof of the flood. Picture if you will the earth surrounded with a cloud of gases keeping the oxygen at a high level.

Now the firmament condenses and has two effects, first the flood and second, Noah getting drunk from his normal measure of wine. Why? because of the reduced pressure, creating the effect of a higher elevation. If you have had a drink on an airplane (elevation of cabin about 8000 feet) it has a much greater effect than sea level.

There are several churches in the south that do just that.

One of the TV shows called it bunk and had the arsenic tested, and sure
enough it was sufficient to kill you. The believers suffered no ill effects.
They are bitten by snakes, and again no ill effect.

So then, when one of your children needs to do their homework, you will do it for them since you are much wiser and more educated than they are.

Forgive my saying so, but it sounds like you will have very stupid kids. Why even bother to have them? They're so much work and generally a big pain.... Get a puppy instead.

That's what the doctor keeps telling me, but then He pops into my head and says "He's a blasphemer. Kick him in the shin" so I do.

Then they just give me my pills and leave. They're so nice - they even lock the door behind them so no one will interrupt me while I place my tiny ads in the newspapers.

>Maybe we should rename this rec.radio.cb or rec.radio.shortwave.
>

Rec.radio.cb might be right on target. Rec.radio.shortwave is actually providing me with a lot better s/n ratio than rrscanner and infinitely better than the abysmal rrcb.
I've stuck with rrsw over the last few months (and off and on over the years) but tend to avoid rrcb for months at a time, knowing it'll be the same useless forum for boneheads as it has always been.
This group isn't doing a whole lot better lately, but is usually more informative, and I don't avoid it as often or for as long a stretch as with rrcb.
I'd rather do my own research, and find my own answers to my radio questions, than dive into the trash of some of these newsgroups.
How about
rec.radio.cb.scanner.non-communication.redneck.mindless.grudgematch.pissin
g.contest?... +spam.

Hard to tell who is the subject and object in the above. It could be interpreted that after being handled by a believer, they (the snakes) could then drink deadly poison with no ill effects!

And, in both versions of the passage, it doesn't specifically say "deadly" snakes (serpents). It just says "snakes". (Most of which are non-poisonous).

A few are knoledgable, but most just know that it is "cool" to have an amp.
Most probably don't even know what an amp is or how it works. For all we
know, they might not even know what a cb is.

> This group isn't doing a whole lot better lately, but is usually more

This group used to be on-topic, but since the war, this group is "Off Topic"
certified.

p.s. -I just realized that this is pretty off topic itself.

Romans 1:18-32 For the wrath of God is revealed from heaven against all ungodliness and unrighteousness of men, who hold the truth in unrighteousness; Because that which may be known of God is manifest in them; for God hath shewed it unto them. For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse: Because that, when they knew God, they glorified him not as God, neither were thankful; but became vain in their imaginations, and their foolish heart was darkened. Professing themselves to be wise, they became fools, And changed the glory of the uncorruptible God into an image made like to corruptible man, and to birds, and fourfooted beasts, and creeping things. Wherefore God also gave them up to uncleanness through the lusts of their own hearts, to dishonour their own bodies between themselves: Who changed the truth of God into a lie, and worshipped and served the creature more than the Creator, who is blessed for ever. Amen. For this cause God gave them up unto vile affections: for even their women did change the natural use into that which is against nature: And likewise also the men, leaving the natural use of the woman, burned in their lust one toward another; men with men working that which is unseemly, and receiving in themselves that recompence of their error which was meet. And even as they did not like to retain God in their knowledge, God gave them over to a reprobate mind, to do those things which are not convenient; Being filled with all unrighteousness, fornication, wickedness, covetousness, maliciousness; full of envy, murder, debate, deceit, malignity; whisperers, Backbiters, haters of God, despiteful, proud, boasters, inventors of evil things, disobedient to parents, Without understanding, covenantbreakers, without natural affection, implacable, unmerciful: Who knowing the judgment of God, that they which commit such things are worthy of death, not only do the same, but have pleasure in them that do them.

Jude 1:17-25 But, beloved, remember ye the words which were spoken before
of the apostles of our Lord Jesus Christ; How that they told you there
should be mockers in the last time, who should walk after their own ungodly
lusts. These be they who separate themselves, sensual, having not the
Spirit. But ye, beloved, building up yourselves on your most holy faith,
praying in the Holy Ghost, Keep yourselves in the love of God, looking for
the mercy of our Lord Jesus Christ unto eternal life. And of some have
compassion, making a difference: And others save with fear, pulling them out
of the fire; hating even the garment spotted by the flesh. Now unto him that
is able to keep you from falling, and to present you faultless before the
presence of his glory with exceeding joy, To the only wise God our Saviour,
be glory and majesty, dominion and power, both now and ever. Amen.

Go ahead and think this one through.....they never new Him. They were never saved, they never humbled themselves. Jesus said:

Matthew 7:13-14 Enter ye in at the strait gate: for wide is the gate, and broad is the way, that leadeth to destruction, and many there be which go in thereat: Because strait is the gate, and narrow is the way, which leadeth unto life, and few there be that find it.

The unfortunate fact is that many who call themselves Christians are not. This is why there is so much hypocrisy, and corruption in the so called Christian churches.

There is a difference between a truly saved person, and one who thinks he is saved and is not. God knows which one has truly believed, and which is a pretender. Jesus also reaffirmed the position of the pretender here:

Matthew 7:21-23 Not every one that saith unto me, Lord, Lord, shall enter into the kingdom of heaven; but he that doeth the will of my Father which is in heaven. Many will say to me in that day, Lord, Lord, have we not prophesied in thy name? and in thy name have cast out devils? and in thy name done many wonderful works? And then will I profess unto them, I never knew you: depart from me, ye that work iniquity.

Exactly....they do not know God. They are fakes.

Matthew 7:17-20 Even so every good tree bringeth forth good fruit; but a corrupt tree bringeth forth evil fruit. A good tree cannot bring forth evil fruit, neither can a corrupt tree bring forth good fruit. Every tree that bringeth not forth good fruit is hewn down, and cast into the fire. Wherefore by their fruits ye shall know them.

I was just teaching my son about John Calvin, and this statement by Pope Leo X was mentioned. Again, a man not of God. I urge you to not associate the nosense you see on television, the heresy you see in the Catholic church and all of the pretenders. Just you, the Bible and a heart that is humble and looking for answers.

Remember who wrote your Constitution - an earlier post described them as "Deists". Your Constitution, just like the Bible, is open to interpretation.

The very vagueness of the American Constitution has made American Lawyers very rich!

I saw it here at B&N last yr.

> or the one by Kubizek that knew
> Hitler as a child.

Yep read that book when I was in middle school. He was his best friend
when they were kids. Good book AFAIK. Been over 25 yrs.

In fact that book was checked out from my middle schools library!!!! - of
course this was in the late 70's and before Political Correctness destroyed
freedom of thought.

Fact is Nazism and the group think is not about intelligence (Goerbells
was intelligent) - but psychology.

FEAR is the linchpin! Blame others (like our Bu$h administration likes to
do) for you troubles and encourge fear (yellow/oragne/red -alerts).

Sorry - could'nt let this go:

In fact there is nothing "clear" in the way our Constitution is written.
There are many IMPLIED rights (try reading our 9th for one thing!). It was
written this way so as to not become "outmoded"

it worked! sadly Ashcroft and his henchmen simply ingore it.

Sir do you believe in any world history? Why? Because you read it in a
book written by witnesses to the facts. Are you aware of any other ancient
book that has more manuscripts than the Bible? Or a greater body of
witnesses?

> > We have people who think they are Christians and are not.

The Pope comment and the fact that these ungodly men are molesting children
are correct, as is your comment about the collection plate. However, God has
a long and storied history of moving armies against each other and using
mankind to bring His wrath on people whom He thinks need a whoopin.

I dont worship the Pope, nor do I support the Catholic religion in any way.
Ever heard of the Reformation? Or Protestants?

1 John 5:7 For there are three that bear record in heaven, the Father, the
Word, and the Holy Ghost: and these three are one.

John 10:30 I and my Father are one.

John 14:9 Jesus saith unto him, Have I been so long time with you, and yet
hast thou not known me, Philip? he that hath seen me hath seen the Father;
and how sayest thou then, Shew us the Father?

> > One truth. One God.

> Forgiveness for what crime?

Romans 3:23 For all have sinned, and come short of the glory of God;

James 2:10 For whosoever shall keep the whole law, and yet offend in one point, he is guilty of all.

>Not believing in someone who doesn't have the
> decency to introduce himself and is hiding from everyone? Eternal pain in
> hell seems like a just punishment to fit that crime, don't you think?

Matthew 12:36-37 But I say unto you, That every idle word that men shall speak, they shall give account thereof in the day of judgment. For by thy words thou shalt be justified, and by thy words thou shalt be condemned.

> Jesus:
> "If any one comes to me and does not hate his own father and mother and wife and
> children and brothers and sisters, yes, and even his own life, he cannot be my
> disciple." - Luke 14:26
>
> So I hope you hate your own mother, father, children, etc., or Jesus wants
> nothing to do with you.

Lets finish the scripture here:

Luke 14:26-35 If any man come to me, and hate not his father, and mother, and wife, and children, and brethren, and sisters, yea, and his own life also, he cannot be my disciple. And whosoever doth not bear his cross, and come after me, cannot be my disciple. For which of you, intending to build a tower, sitteth not down first, and counteth the cost, whether he have sufficient to finish it? Lest haply, after he hath laid the foundation, and is not able to finish it, all that behold it begin to mock him, Saying, This man began to build, and was not able to finish. Or what king, going to make war against another king, sitteth not down first, and consulteth whether he be able with ten thousand to meet him that cometh against him with twenty

thousand? Or else, while the other is yet a great way off, he sendeth an ambassage, and desireth conditions of peace. So likewise, whosoever he be of you that forsaketh not all that he hath, he cannot be my disciple. Salt is good: but if the salt have lost his savour, wherewith shall it be seasoned? It is neither fit for the land, nor yet for the dunghill; but men cast it out. He that hath ears to hear, let him hear.

The message is that if you are not willing to give up everything to follow him, you will not be saved. It is not easy being a real Christian. It allienates you from the world in many ways, including your family and friends if they have not also been changed.

> Read the book instead of waving it around, and you will see that you are not
> even following what it tells you to do. Do you know what you call a
> Christian after he actually READS the bible? An Atheist.

That is real cute and all, but false. I do read the Bible. And I quote the Bible. I do follow to the best of my ability what it tells me to do. And I will continue to wave it around. The Bible tells me to. It is my sword.

Ephesians 6:17 And take the helmet of salvation, and the sword of the Spirit, which is the word of God:

Hebrews 4:12 For the word of God is quick, and powerful, and sharper than any twoedged sword, piercing even to the dividing asunder of soul and spirit, and of the joints and marrow, and is a discerner of the thoughts and intents of the heart.

Indeed a discerner of your heart too.

AMEN and AMEN.

Easy! Take the rubber duck off your scanner, dip it into the jar of Skippy (creamy works best) and then run it around inside the box of rice crispys.

A tempting treat that doubles as a marital aid! You can't go wrong....

can't upload a zip or a exe file here *me* so I guess you will have to get it from the bull shit people that make the not working junk!!! O'pps it's not on there web-page for download????

Troll indead.. Well I guess when you have a 49 IQ the best you can do is call people names.... and the best I can do is give the crack for ARC780

name: Registered
key: 468360

these guys rock.. they to can't get winshit working nor can the other 10,000 people that use a Pentium III or faster computer!! So I guess if you have and old ass 486 it works just fine

http://webpages.charter.net/moment/winjunk.htm

These guy are telling the truth with pictures!!! If I hd found these web-site before I bought this wincarp I would have bought TrunkStar780 from the get..

Exactly.

The scripture answered the statement. God answers for Himself, I do not need to do it for Him. Thats why He is God, and I am dust.

I have not been keeping up with the hobby for a few years so
apologize if this has been answered here already. I would like
recommendation on scanners that pick up the trunking police systems
(Seattle for specifics). I have seen several models, radioshack and uniden
that have several trunking systems they follow.

Does anybody know which the Seattle and other police depts use?
What is the benefit of the $299 digital option for some unden scanners?
What will that allow you to listen to that the others dont.

Ken, Seattle

It's been *years* since I've been on UseNet, recently making a return to participate in groups of technical interest to me and keep in touch with other coders and radio enthusiasts around the world...

I rolled my eyes as I read this series of posts, seeing that after so much time, flaming still goes on and on.

Folks, this is an inappropriate forum to discuss religion, Christianity, or tangential intersections between those topics and radio on and on forever and ever. I'm a devout American and firmly believe in your right to express your opinion, but at the same time I pay good money for my bandwidth and bible quotes is not what I signed up for in this group.

Please move your heated conversation elsewhere so the rest of us can talk about tinfoil antennas. ;)

As long as god's people see themselves as dust they will never, ever rise above their lot in life. They will always be controlled and manipulated. They will never be free. They will never use their mind to think for themselves. They will always be slaves to myth and legend written long ago for a political aim and continue to be used as a tool of political manipulation. You may be dust, I am a human being. I hope one day you and yours can see that.

> In fact there is nothing "clear" in the way our Constitution is written.

It seems very very clear to me. But then again, you can have two lawyers looking at the same law and saying it means two different things, so why don't I find it surprising that the same is being done with the Constitution.

If it was not clear, then it would be completely worthless. Thus the effort that goes into the wording of any contract you sign, to make sure no one is going to be able to interpret it in any way other than it is carefully stated. Yet, people still go to court to have a judge read the clearly stated contract to the idiot who doesn't understand it. Then you have to hope the Judge knows how to read it.
What a mess.

You read it right the first time. It is 144.900 Mhz. Traffic is
very active (almost non-stop) from 10.00 till 23.00 UTC. Mostly it's
European and American Ham's. Signal is weak but readable.I'm using a
Diamond 130J as antenna. I've already checked AMSAT.org but found
nothing. Never heard Satellites doing this low freqs.

And Thank You All...

Funny how eBay's "power sellers" are allowed to get away with things the rest of us cannot.

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&item=3015723976

Item Description clearly makes reference to:

"Easy full 800 Mhz".

"Highly modifiable"

"Ease of Modifications"

Which is in complete violation of eBay's policy on scanners:

Electronics Equipment

Scanners

Generally, scanning receivers and radios may be listed on eBay. However, you may not list any scanning receiver or radio that receives cellular transmissions or has "full 800mz" coverage.

If you or I had listed this, it would have been cancelled. Guess large pawn shops that spend big $$$$$ with eBay are okay, though.

> in the whales belly for 3 days and being finally spat on the land. Not only
> that but the story of Noah where Noah was a sinless man who built the Ark
> yet after the Ark found its resting place he was found drunken and naked by
> his son. Its stories like that really hurt the moral message of the Bible.

What moral message? You mean filth like this:

Isaiah 36:12
Hath he not sent me to the men that sit upon the wall, that they may eat their
own dung, and drink their
own piss with you?

Malachi 2:3
Behold, I will corrupt your seed, and spread dung upon your faces!

And thou shalt eat it as barely cakes, and thou shalt bake it
with dung that cometh out of man..." - Ezekiel 4:12

"Lo, I have given thee cow's dung for man's dung and thou
shalt prepare thy bread therewith" - Ezekiel 4:15

Or do you mean the moral message from Jesus that we should all hate our mothers,
fathers, children, etc?

"If any one comes to me and does not hate his own father and mother and wife and
children and brothers and sisters, yes, and even his own life, he cannot be my
disciple." - Luke 14:26

> Its like in the Old Testament when God commanded Moses to kill, yet when one
> thinks about it, since God has all the power then why doesnt he kill them
> instead of commanding Moses.

Why doesn't God just get rid of Satan? That would end all of our problems.

If god can prevent evil, but doesn't, then He isn't all-loving.
If god intends to prevent evil, but cannot, then He isn't omnipotent.
If god both intends to prevent evil and is capable of doing so, then how can
evil exist?

One of the following two statements MUST be true:

1) There is no god.
2) God is evil.

Yes, I see your point. Now can you use SCIENCE to explain how Jesus could walk on water, rise from the dead, and fly into outer space?

How about explaining where the hell Cain's wife came from? Or how the earth was flat with 4 corners when God created it, and now it is like a sphere?

Also how during prohibition alcohol was illegal, yet how bad could alcohol be if Jesus and Noah were allowed to drink it? And were they 21 when they did?

So many things for you to explain on every page of that mythology science fiction book.

> eternal hell where the fire never quenches just because they don't believe
> in a book..

Or in someone who never shows himself, yet we read of how people in the past like Noah were spoken to and given exact measurements to construct an Ark. He doesn't speak to any of us today, so we are supposed to believe why? And why is he hiding from us? Is he afraid we would try to triangulate where his voice or presence was coming from and find him with the Hubbell telescope?

> Interesting too that the Sabbath day is supposed to be on Saturday yet all
> the churches have it on Sunday. Isnt that a violation of the Ten
> Commandments?

God violates all those commandments. "Thou Shalt not kill" But flood the earth and drown most every human life on the flat four cornered planet. Is god now in hell for all his sins?

If you are just going to quote the Bible, then we can all find parts we like and quote them too:

2 Kings 18:27
But Rabshakeh said unto them, Hath my master sent me to
thy master, and to thee, to speak these words? hath he not sent me to
the men which sit on the wall, that they may eat their own dung, and
drink their own piss with you?

That one is so important, the book mentions it twice:

Isaiah 36:12
But Rabshakeh said, Hath my master sent me to thy master
and to thee to speak these words? hath he not sent me to the men that
sit upon the wall, that they may eat their own dung, and drink their
own piss with you?

Malachi 2:3
Behold, I will corrupt your seed, and spread dung upon your faces!

And thou shalt eat it as barely cakes, and thou shalt bake it
with dung that cometh out of man..." - Ezekiel 4:12

"Lo, I have given thee cow's dung for man's dung and thou
shalt prepare thy bread therewith" - Ezekiel 4:15

JOB 41:19.....
Out of this mouth go burning lamps, and sparks of fire leap out. Out of his
nostrils goeth smoke, as out of a seething pot of caldron. His breath kindleth
coals, and a flame goeth out of his mouth.

Isaiah 34:7
And the unicorns shall come down with them, and the bullocks with the bulls; and
their land shall be soaked with blood, and their dust made fat with fatness.

Revelation 12:3 "...and behold a GREAT RED DRAGON, having SEVEN HEADS and ten
horns, and seven crowns upon his heads."

"If any one comes to me and does not hate his own father and mother and wife and
children and brothers and sisters, yes, and even his own life, he cannot be my
disciple." - Luke 14:26

Date: 2003-04-03 20:28:28 UTC
From: n9nlu_REMOVE_THIS_@charter.net
Message-ID: <v8p6gfm6i6d83@corp.supernews.com>
Source record: 33627

Does anyone have a Radio Shack PRO-2067 scanner? I have 2 of them (One for sale - $175)... both do the same thing. The county I'm in and few of the surounding counties run DVP encryption occasionally on the regular sheriff freqs when they need to pass sensitive information. I figured that running PL decode would eliminate the racket that the DVP makes when they run it... but it seems that the DVP is falsing the PL Decode. Has anyone ran into this problem with a 2067? Or is it just a fluke instance that the DVP falses the 192.8 hz PL Decode.

Thanks

Dave

I see your point and what you quoted as Scripture is in fact in that Book. I find it odd that such moral filth would be in a book stated as Holy. Not to mention the Song of Solomon etc. My comment in regards to the morals in the Bible regards a few different stories and teachings. I find a lot of the book to be that of a cruel God who creates his people so that they can eventually fail and suffer in some lake of fire even if they do not know his son. I find that all strange. Its just like the fact that there is a verse where soldiers are commanded to smash babies heads into the wall and Moses is ordered to kill all kinds of people. In addition, if God needed Moses to kill those people, then why didnt he do them himself

It could be echolink ... or it could be a WIRES-II system on a simplex freq or it may be a IRLP node. Do you ever hear them mentioning IRLP NODE numbers (Like Node 755, Node 852 etc etc), WIRES ID numbers (like 1148D, 7110D, 4102D, 5105D ..or something like that) or Echolink Node numbers (like 63231, 74849 or similar etc.) .... If they do say a number ... what do they say ... usually the 3 digit node numbers will be IRLP, the 4 digit and or numbers that end with a D are WIRES-II nodes, and the 5 digit numbers are echolink type nodes.

> So then, when one of your children needs to do their homework, you will do
> it for them since you are much wiser and more educated than they are.

You teach kids facts. Things you can show them when they ask how and why.
None of their homework contains anything about gods or religion. You should
never force your kids to your own religion, you should let them figure it out
for themselves when they are old enough to make that decision.

I find it just as wrong to turn children into Atheists by Atheist parents as it
is to turn them into believing in their patent's version of any god or
gods. Teaching Math, Spelling, etc. have nothing to do with this. You
need to know those things if you want to get by in life, you don't need religion
or gods. Many of us do just fine without those things.

> Forgive my saying so, but it sounds like you will have very stupid kids.

God wanted all his creation to be stupid and not eat from the tree of
knowledge. When humans ate from the tree (not knowing it was wrong because
they didn't have knowledge yet - and god knew this) giving themselves knowledge,
god was angry and made life much more miserable for all the rest of us.

> Why
> even bother to have them?

Good point. Why indeed! Because god told us to have them and be fruitful and
multiply? I don't have children because it would be a very evil act to bring
someone into a world such as this one against their own will and choosing.
What right do I have to make that choice for another being?

If you look around, only stupid people have kids, and a lot of kids too.
Intelligent scientists rarely have any kids. The amount of kids you have shows
your intelligence level.

Keep this in mind too:

WITHOUT MAN, WHAT WOULD GOD'S PURPOSE BE?

He would need us more than we would need him, or else he would have no one to
boss around and treat like shit. If we did not exist, what the hell would he
DO? What would his purpose for existing be?

If you think about this enough, you realize that it is not god who created man,
but man who created god. As a way to answer questions from children that could
not be answered by primitive man.

If man can only exist by creation from a superior intelligent being, then so too
can a superior intelligent being as complex and amazing as god, only exist by

creation from an even MORE superior and intelligent being or god!

God could not just exist from some sort of random accident, evolution, or from apes, right? Only a super god could be the explanation for the existence of god. But then you have to go on and on into infinity with this bullshit form or reasoning that is used to explain man's existence.

> The scripture answered the statement. God answers for Himself, I do not
> need to do it for Him.

Someone else did it for him when they published that book. The Bible was written by man, not god.

He is unable to speak, because he either does not exist, or chooses to hide from his creation.

> Thats why He is God, and I am dust.

And without man, what would god's purpose be?

Amazing how each Christian is sure about how god thinks and rules, even when all of their gods contradict each other's gods. Why is it each individual is allowed to know and be sure of what god finds acceptable or not?

How does the Vatican get to VOTE on what is acceptable behavior in the church? Why not just ask god instead of voting and making the decision of men be the rules of the church? Because he never answers anyone? That should tell you something really really important about god.

> Honor your Father and Mother

That is a real important commandment, as it shows why the religion was created to begin with. To keep children to behave and be good and do as their parents tell them to. The Santa Claus mythology is no different. If you are not good and don't do as mommy and daddy say, Santa won't bring you any presents.

Why would an adult have to obey his mother and father?!

Funny how when people grow up, they understand the reason for the Santa mythology and don't believe in it anymore, yet they cling to the other one for some reason. Even after they read the commandment about having to obey your mother and father. This is a mythology to keep children to obey their parents, that is all. Except instead of threatening them with no presents or a lump of coal in their stocking, these sadistic child tormentors threaten their children with burning in eternal hell.

At least with Santa, you get presents if you are good and there is a reward. These cheap bastards never have any rewards, just threats of eternal punishment. Heaven? Yeah great, you will get that after you are dead. Meanwhile Santa gives you cool stuff every year.

Santa is a generous giver of gifts, Jesus is a Jew.

> saved, they never humbled themselves. Jesus said:

Jesus didn't say anything the science fiction writer who created his character made him to say in the story.

What about what Santa said? Does that hold as much weight too? Of course not.

> The unfortunate fact is that many who call themselves Christians are not.

A perfect example of this would be all the priests and church leaders.

> This is why there is so much hypocrisy, and corruption in the so called
> Christian churches.

If you can see that, you should be able to figure out the rest.

> There is a difference between a truly saved person, and one who thinks he is
> saved and is not. God knows which one has truly believed, and which is a
> pretender.

Kids can truly believe in ghosts and monsters under their beds and in their closets. They believe this with all their heart. Yet those things don't exist either. Sure people can really really believe in god, but they just have not grown up mentally yet, they are still children.

> Jesus also reaffirmed the position of the pretender here:

If you can take text in the Bible as proof, then I can prove to you that there are fire breathing dragons, unicorns, and dragons with seven heads. See... your god tells you this himself:

JOB 41:19.....
Out of this mouth go burning lamps, and sparks of fire leap out. Out of his nostrils goeth smoke, as out of a seething pot of caldron. His breath kindleth coals, and a flame goeth out of his mouth.

Isaiah 34:7
And the unicorns shall come down with them, and the bullocks with the bulls; and their land shall be soaked with blood, and their dust made fat with fatness.

Revelation 12:3 "...and behold a GREAT RED DRAGON, having SEVEN HEADS and ten horns, and seven crowns upon his heads."

Unless you are going to believe all of this bullshit too, then can you see how ridiculous it is to keep showing other quotes from the same science fiction novel as if it were some sort of proof of reality?

All the ridiculous poetry you are quoting from the same book I got this stuff makes you look just as silly for stating it is true and real as if I said the above quotes are proof that those silly things are real.

Grow up. You're not a child anymore. You no longer have to "obey your mother and father"

> Really the Bible only accounts for a few years of his life anyway.

And books rarely account for more than a few years of Santa's life too. You rarely read about Santa as a child.

> Another
> good point about the fact that Cains wife was the effect of some level of
> what appears to be interbreeding.

Obviously. How else to get all our population from only Adam and Eve? The fact that we don't give a NAME to Cain's wife or hide from the story where she came from, just shows that they are embarrassed to admit how our entire population could come from only two people. The fact that most Christians never even thought of this before, or questioned where Cain's wife came from, show how easy it is to fool someone into this cult. Smart people catch that part of the story right at the beginning of the bible and question it right away.

What do you call a Christian that actually reads the Bible and comprehends what he/she is reading?
An Atheist.

> Yet later in the Bible it gives teachings
> against interbreeding. Ever noticed how interbreeding also leads to mental
> retardation.

The Bible mentions after a certain population exists, that god no longer wants any incest. It was ok before, now it is a sin. Just like you can't eat meat on Good Friday, but not a sin on other days. Such bullshit. Either something is ok to do, or it is not. Imagine if murder and rape was ok on certain days of the year, and not on others.

The Bible is nonsense to. There are no such things as fire breathing dragons or unicorns. There are no such things as people with white wings that can fly in the clouds.

Do you believe as strongly in the characters of Greek Mythology as you do those of Christian Mythology?

> bandwidth and bible quotes is not what I signed up for in this group.

Then why did you click on a post with the subject heading Re: Jesus' last words?

The rest of us usually don't click on the threads that contain subject lines that are not of interest to us. The fact that this thread is the longest one on the group, MOST people here are participating in it and don't feel as you do or it wouldn't be this long. Think about it.

If I don't want to read a post about some scanner I don't have, or anything else, I skip over it. I don't chime in that everyone should stop talking about it because it is of no interest to me.

I can just picture you around the water cooler at work. As soon as any topic comes up that is not work related, you tell them to shut up as you don't work at that company so that you have to listen to conversation about birds, politics, religion, or whatever off topic they are discussing at the time.

> Please move your heated conversation elsewhere so the rest of us can

The rest of us are talking about this right now, YOU can move elsewhere. Why not start your own thread? Don't expect anyone else to join you on it, the rest of us are all interested in this debate right now.

Please take your ORDERS and DEMANDS elsewhere, perhaps in some communist country or newsgroup.

FREE SPEECH, not censorship.

> Sir do you believe in any world history? Why? Because you read it in a
> book written by witnesses to the facts.

Depends. I read in school books that George Washington chopped down a cherry tree. Now I read in books that he never did this at all. Did he have wooden teeth or not? You can read books that say yes and no. If we can't even have accurate agreeable history of George Washington from 200 years ago, then how the hell can you believe anything from 2000 years ago?

> Are you aware of any other ancient
> book that has more manuscripts than the Bible? Or a greater body of
> witnesses?

Any book that has a witness that saw a dragon that breaths fire, a unicorn, and a dragon with seven heads is not a credible witness. You must now discount any of the other bullshit you read in the same book as we know and can prove other parts of it are false. The earth is NOT flat and does NOT have four corners as your "witnesses" have documented in this book you seem to think is a "history book" instead of the science fiction novel it really is.

> The Pope comment and the fact that these ungodly men are molesting children
> are correct, as is your comment about the collection plate. However, God has
> a long and storied history of moving armies against each other and using
> mankind to bring His wrath on people whom He thinks need a whoopin.

God has no history at all. Just because someone wrote a book about Santa Clause does not make him real either. According to your "history book" Bible, God spoke to people like Adam and Eve, and even had to speak exact dimensions to construct an Ark to Noah, so he is capable of speaking exact numbers and measurements to humans. Why do you suppose he is not able to speak to YOU? Surely as much faith as you have in God and how dedicated you are to him he would speak to YOU. But he doesn't.

You need to admit that to yourself and grow up. Santa, Jesus, Tooth Fairy, God, boogie monster, ghosts... they are all things fun for children to believe in, but not a grown up adult.

> > > JESUS IS LORD.

God has not told me SHIT! Neither has he told YOU anything!

> Yet you worship Jesus and the
> Pope.
> > SINS!
>
> I dont worship the Pope, nor do I support the Catholic religion in any way.
> Ever heard of the Reformation? Or Protestants?

Yeah, when is god going to pick one and tell everyone else to start worshiping the right religion? All the other people wasting their time in the wrong churches are going to end up in hell and all along they thought they were doing the right thing like you do.

Don't you see that if god really existed, you wouldn't have all these offshoot religions but only one?

Do you have children then hide from them all their life and expect them to know it is wrong to play with matches and not burn down the house, or do they know you exist and exactly what you forbid them to do?

God is not a very good parent of his children, is he?

> 1 John 5:7 For there are three that bear record in heaven, the Father, the
> Word, and the Holy Ghost: and these three are one.
>
> John 10:30 I and my Father are one.

You find nothing ridiculous about this? How can someone be his own father or son?

> John 14:9 Jesus saith unto him,

Why do you keep quoting more of this shit when I show you quotes like this?:

Isaiah 36:12
Hath he not sent me to the men that sit upon the wall, that they may eat their own dung, and drink their
own piss with you?

Should we all be drinking piss and eating shit because the bible tells us so? What if children read this stuff and start doing the stuff in this book? Perhaps we should only allow those over 21 to read it, and put a warning sticker on it that says: "Don't try any of this shit at home"

> > MANY gods. Read Genesis where God speaks to the other gods and has fear
> that
> > eating from the tree of knowledge has made Adam and Eve like them. (gods
> > plural)
>
> Yes, God's plural. The Father the Son and the Holy Spirit.

No, Jesus did not even exist yet. You don't even know your own bible stories. He was talking to his other god friends. I know you people don't like it that the bible has all that shit in it you don't want the rest of us to know about, and it appears have not even read or noticed it yourself, but if you are going to accept part of the book as fact, then you need to accept all the rest of the story too.

There is more than one god in the bible. He talks to them from the very first section in Genesis.

> I am a Conservative, and my parents are flaming Liberals.

That is the same thing! The Republicat one party system. There is no difference between a Clinton and a Bush. They both start wars, pass laws taking away more of our rights, and praise god and go to church.

Are your parent's Buddhists, Jews, or Christians like you are?

> > > So can you. Just believe it. Read
> > > your Bible, get on your knees and ask for forgiveness
> >
> > Forgiveness for what crime?

Treating the Bible as one book, that is either true or
false, is IMHO a fallacy. You're just as groundless, saying
it's all ficton, as someone is who says it's all fact. At
most, one can prove that some parts of some books -- as
preserved over millenia and translated many times -- contain
contradictions in places.

I suspect many bible scholars approach the Bible as it is,
as a collection of writings from many different sources,
spanning a vast expanse of time. Just as you wouldn't
dismiss a collection of short stories based on what's in
some of the chapters, so also it's unreasonable to judge the
Bible as just one book.

Beyond concluding that literal interpretation of the Bible
is not reasonable, you really can't discount the whole book
on the basis of this or that logical inconsistency.

It seems to me that an atheistic viewpoint is as
unsupportable by fact as a theistic one.

That's just it - this guy is as genuine as a 3 dollar bill. Didn't he claim to be a treasury agent too? I seem to recall hearing that somewhere. Dude needs help. Books, pills, rubber room, something.

"I highly recommend you save your $70 and steal this software instead because you can download it for free! Then you can be a jackass just like me and send email to my stupid webpage that accomplishes nothing! You'd better do as I say because I'm a <insert impressive BS claim here> so there! yuk, yuk, yuk, yuk!" -NoSpam, on any given day of the week.

I have the Bearcat 250 now, great scanner but want to get a better 800 Mhz antenna for it. I had one for the Pro 43 but cant remeber where I bought it. It was about 2 to 3 inch tall and work great. Any help.

Thanks
Mike

Look at the box in the picture it is for a 300 channel trunking scanner.
The picture is a PRO 2053

Does it seem extraordinary that man has the phenomenal
capacity to reason, imagine future consequences of his
actions, and make moral choices from that awareness, if God
wanted us to be slavish, ignorant drones that just follow a
set of rules in a book?

It seems to me that if God really wanted mindless dogmatic
devotion, He would have given created intelligent doggies.
It's *really* hard to imagine a worse choice than mankind.
Maybe cats. :)

I don't like to filter out a person. What happens if they decide to become troll-free and have something intelligent to say? Nobody will know. I do filter out words like sex, money, etc. but it still doesn't stop everything. I don't filter out "war" because I like to hear new announcements that I didn't hear about but somebody else did.

I was not aware that it comes up so much. I am new to the group. I still do find it interesting that it fires everyone up so much.

I did answer your question about Jesus NOT telling us to hate our fathers and mothers...etc. You look at the Bible as a collection of statements....verses if you will that stand alone. This is simply not the case. Just like any other book, information must be taken in context and with whatever else is written about the subject. Read the rest of the commentary by Jesus in the above mentioned verses....just go back to my previous message, and see the answer to your question. If you cannot understand the scripture.......only God can help you with that.

Where exactly does the Bible say that the world is flat with four corners? I have not seen, or otherwise do not remember reading that.

I am familiar with the dragons and unicorns.....both of which were seen in dreams and visions. Are all of your dreams true to life? I like to dunk basketballs in my dreams, and I could not be further from doing that in real life. The Bible is literal in places, figurative or allegorical in others. In my own experience, and that of many many others, the only way to understand it is to have been enlightened by God.

I am sorry that you do not hear God. I know of no one who hears an audible voice. I do not hear one either. The best way for me to describe the communication is more like an intuitive thought or feeling where you just know something is true or happening. Conscience is also (IMHO) tied to God. I believe that through your conscience God communicates to you. He is a part of everything he created. I also know that I can turn my conscience off. It is real easy for us to ignore it, and go about doing whatever we feel like doing. I think that this is exactly what most people do. I also think that God only tries to reel you in for so long, then he leaves you to the school of hard knocks. I once read a thought by some random philosopher that read something like: "Why is it that we feel guilty about certain behavior even if we have not been taught that it is wrong?" It is a very good question.

I have been down this road with other Atheists before. You are not (nor am I) someone who's mind will be changed here. I write for the benefit of others. All I can tell you is 10 years ago I was searching for answers. It was very obvious to me that the world was not here by mistake. That who or whatever was responsible is so much wiser and more powerful than I am. Even before I believed what the bible teaches, it seemed extremely arrogant for me to question God. Call me crazy if you like, but waving my fist in God's face did not seem prudent. Since he brought me into the world .....he can certainly take me out. It seemed wise for me to find out who He was, and get about trying to figure out what He wanted from me.

I understand that you find the whole concept of God nonsense. It is not possible in my mind (however feeble you may believe it to be) that we are just here.....and will just die, the end. I think most people believe something is going on after this for a reason. I think it is because God gave them the desire to find out....to seek Him.
As I studied it all while taking philosophy courses, world religion courses etc....I saw that (as Ross Archer alluded to) the scientific explanations were every bit as and even more untenable than faith in a God. The more of the Bible I read, and the more genuinely humble I was towards God, the more I started to understand what I was reading.

Now, I would love to write all night but need to close this for now. I have tried to explain to you in my language just a little of how I came to where I am. I can support any of what I said with scripture for anyone interested, but since you believe the Bible to be mythology, I would not expect you to be interested in that. There are others however who are reading and getting things from our debate. I know that God's word is much better at explaining the truth than I am, so I try to leave it to Him and His word to do His work. Scripture speaks to people, deep in their hearts. By design. Just as our conscience does. The question God asks is: Will we listen? Or will we be self absorbed. I am not accusing you in particular of being self absorbed, but most everyone I know is. I certainly am, and fight every day to change that. All I want to do is play with the radios, and satisfy myself. I believe God wants us to take our minds off of ourselves and focus it on Him.

Galatians 5:14 For all the law is fulfilled in one word, even in this; Thou shalt love thy neighbour as thyself.

> What a mess.

For one thing, the constitution is only one of four or five foundations of
our legal system.

Here are the major elements which i know of.

1. Inalienable rights - mentioned in our Declairation of Independence,
mentioned by Locke and Bacon and Jefferson and Frankiln and Mason in
personal letters and writtings. Also IMPLIED via our Ninth Amendment to
the Constitution.

2. Jury Power - notably the right of the jury to nullify. (render the
accused - who is beleived by the jury to be guily of breaking the law in
question - innocent because the members of the jury judge the law itself
as immoral and thus invalid). This right pre-dates the Constitution and is
also IMPLIED in our Nineth as one of the several "others" (rights)
affirmed. The British Magna Charta affirmed Jury rights and basic precepts
of rough equity (at least for the Lords)

3. Common Law Rights/Court rulings - both pre-1776 and post. (including Colonial
rullings in principle at least). It is important to note that wea re
talking about rulings (precident). These rulings have more power on the
whole than our Constitution. This is just how our system works. Rulings
can get reversed and the Supreme Court rulling have more wieght than
dictrict or State Court rulings.

Can't think of any other "rights" off hand.

4. We have State Constitutions also - mostly ignored I suspect however. My
State has an Amendment which allows for impeaching any representative for
drunkeness!!!!! lol.

The Original Road Island Constitution was the Colonial charter. This State
Constitution was valid under the court system from the 1650's up through
the mid 19th century!!! Even though a British document and pre-dating the
US Constitution!! It's fairness was questional, one had to own land to
vote, and Mr. Dorr (Dorr's rebellion - a small civil war in RI) and his
men drafted a new fairer constitution - ruled invalid and thus ignored by
th ewealthy in RI.....anyway after a short war, Dorr was tried for
treason and jailed and within a couple of yrs Dorr's State constituton was
voted in and the old one voted out!!! Well, enough history!

The Constitution implies many rights and explicitly affirms only a small fraction of the rights men are granted by the higher authority (higher than government or man). The Constitution doesn't "Grant" rights to The People, but it does grant powers to the federal Government - VERY VERY limited ones, which have been usurped over the many decades. (i.e. federalism).....probably unconstituional, but hey what can ya do?.....

Our Constitution is pro-People and anti-fed/government. The Ninth Amendment is the core and spirit of the entire document. Read the Nineth and you know the Constitution.

peace

And as long as a man will not humble himself.....he will not see God.

Proverbs 16:18-19 Pride goeth before destruction, and an haughty spirit
before a fall. Better it is to be of an humble spirit with the lowly, than
to divide the spoil with the proud.

r lee, respectfuly, what prize awaits you for being a "human being"? And
what does my pride gain me if in the end I am dust?

2107. Which is better : Ten-Tec RX-320 or PCR-1000

Newsgroup: rec.radio.scanner

I'm thinking about selling two scanners I have (Uniden BC890XLT and Radio Shack Pro-2026) to buy one of the receivers listed in the subject line. I realize the RX320 is HF only and the PCR-1000 goes through 1.3GHz. What I'm more interested in is the receive quality of the two. The assumption would be that the Ten-Tec receiver would be much better (noise suppression w/ DSP). I will be using the receiver w/ a laptop in a truck, so noise can be a problem, especially on HF. I would appreciate anyone's input on this...

Thanks for your time!

Do a search on e-bay under "Regency Scanner". Always have those
on auction. I picked mine up for $10 and it looks and works like new.

I just wonder if the US and England will be charged with war crimes as that they are the invading countries and they invaded without provocation. I do note that they have almost the entire country and have not found any chemical or biological weapons and that was their only justification. Also Iraq has never done anything to the US or any of its treaty allies. Thus this makes it an illegal invasion subject to war crimes charges.

No question, the '320 is a far better receiver.

In fact, it is probably the best price/performance ratio of ANY
shortwave receiver available. Yes, it is that good.

I tried both, but swear by my new WinRadio WR-1550e.
IMHO this is a much better alternative to PCR. (Which I sold after
acquiring the WinRadio.)

See http://www.winradio.com/home/1550e.htm .

Hope this helps
Rich

The RX320 is a GREAT SW receiver.
The PCR1000 is an OK SW receiver.
If your goal is the BEST SW, the the RX320 is the clear winner.
If you can accept SW reception on a par with a "good" portable,
then the PRC1000 will work fine. Unless you need SSB/CW you might
check out the PCR100.
Icom's control software is really, really, olympic class really
bad. There are several good 3rd party programs, and Icom supplies
the Bonito application for the PCR1000. But it requires a dongle,
and that means you laptop will need to have a parallel port.

But modern vehicals are really mobile noise sources. Unless you
are planning on parking each and every time you want to listen
to SW you are in for a BIG disapointment.

VHF and UHF reception will be somewhat better, but again
modern vehicals are mobile noise sources.

Terry

> line.

I recently narrowed my choices down to your exact two. ;) I went
with the Ten-Tec because...
1. I have a BC-780, which gives me about the same freq coverage with
the 320 as the 1000 alone.
2. The price/performance ratio is mind-boggling. Do some Googles.
3. It's made in the USA. By rednecks. (JOKE!)
4. The code is open-source and there's no squabbling going on about
writing software for the 320.

I'm more than happy with the thing - it makes my Sang 818 _seem_
deaf as a post (not knocking Sangean; I like it).

If you really need a wideband single box product, I'd guess the 1000
is about the best buy out there; I'd like to have a good wideband reciever,
myself, but, to be honest, to get the sort of quality I've got with these
two radios (the 870 and the 320) you've really got to spend a lot more money

Divine purpose is nothing but the projection of human need. Our vanity prevents us from accepting that we are no more than cosmic accidents. We need to know that we are here for some lofty purpose. Hence, the creation of a divine purpose. Yet noone can even conjecture as to what purpose God had in mind when creating man. It is illogical.

For sale 400 miniature-scanners price 25 Euro p/p

They are very small uhf scanners about the size of a pack of
camel-cigarettes without filter
New in box incl manual

Technical specs:
Model Scanap Ap-Micro 454
Freqrange: 454.0250 Mhz to 454.8250 Mhz (step 25 Khz)
33 channels
Lcd display
Sensitivity: 0,5 uV
If-freqs: 23,05Mhz and 450 khz
Powersupply: 2 x 1,5 penlites
Buttons and controls:
Volume/squelch/monitor/keylock/scan/up-down
Connectors: antenna/earphone
Inluded is 1 uhf-antenna

These scanners where made for the Uk "Wide Area Paging
Network" Maybe the can be used for something else or
modified,
frequencies are synthisized

Interested ? mail me at: comsecnl@hotmail

Look again for the exact title, there are no NEW copies from Amazon. It is OUT OF PRINT. Try to buy a NEW copy from Amazon. Ebay sells used copies and you did NOT just find several copies of it on Ebay! You are a LIAR. Anyone can go and check current and completed auctions and see what a liar you are. They come up on Ebay every so often, indeed. But there have not been any recently.

LIAR! and TROLL!

2131. Where did all the black soldiers go?

BEFORE the war, you would see all the troops on TV and they would all be interviewed and the
majority of them would be black. Every so often, you would see a white soldier walking around
in the background somewhere.

Now that the war is on. All the soldiers have turned white. I have only seen 2 black soldiers in our troops on TV during the war.

Does someone have an explanation to this very bizarre and mysterious observation?

Surely someone else has noticed this?

All the while those that ban books that don't even come close to this filth, wave this pornographic book in the air while they protest the much less offensive books. Like Tom Sawyer and the like.

> Not to
> mention the Song of Solomon etc. My comment in regards to the morals in the

> book to be that of a cruel God who creates his people so that they can
> eventually fail and suffer in some lake of fire even if they do not know his
> son. I find that all strange.

And look at where it all starts. He creates a man and woman without any knowledge of right or wrong. He then places an apple tree in front of them and tells them not to eat any sweet tasty apples from it. Then he goes away. He creates the humans with curiosity, but not with knowledge, and of course he knows what is going to happen. They eat from the tree and THEN gain the knowledge that it was wrong to do so, only after doing it.

This is worse than when a cop posses as a prostitute to entrap someone, at least the victim had knowledge that prostitution is illegal. (dressing up as a prostitute and soliciting sex is also illegal, but oh well)

If God REALLY didn't want them to have knowledge and remain stupid, why did he put the tree right in front of them? If you don't want your 3 year old playing with guns and matches, do you put them right in front of the child and then tell them NOT to touch them and then leave the house? That is what God does! But only because god is evil and knows exactly what happens when you do something like that.

So, now that man did exactly what he programmed them to do, he punishes them and makes all life hard. No more garden of Eden, you have to deal with hard dirt to plant and grow crops, child birth becomes extremely painful, etc., etc., all as the good book mentions god deliberately did to make life so unenjoyable because now man has the knowledge to appreciate all this pain and grief.

> Its just like the fact that there is a verse
> where soldiers are commanded to smash babies heads into the wall and Moses
> is ordered to kill all kinds of people. In addition, if God needed Moses to
> kill those people, then why didnt he do them himself

He did. He flooded the world and drowned most of mankind. Then he realized it was WRONG to do that, and promised to never do it again. Yet when does a year go by that somewhere in the world a major flood kills more people? How often does his tornados plow through churches full of people worshiping him and kill them all? He is a child with a jar full of insects that he likes to torture one by one.

Just as a squirrel or dog does, by the way.

> and make moral choices from that awareness, if God
> wanted us to be slavish, ignorant drones that just follow a
> set of rules in a book?

God CLAIMS he wanted man to remain stupid and not have any knowledge at all. But then he places the tree of knowledge in front of them, creates them with curiosity, then goes away. Just like if you put a loaded gun in front of a stupid 3 year old and told the child NOT to play with it, then left the house.

He CLAIMS to be angered that they ate a TASTY SWEET APPLE from the tree and gained knowledge, but is he really angry? Why even put a tree with tasty apples in the garden of Eden that would give them knowledge?

> It seems to me that if God really wanted mindless dogmatic
> devotion, He would have given created intelligent doggies.

Dogs are intelligent. But of course if you have a human child and just keep it locked up in the basement, don't ever talk to it intelligently and shove it a bowl full of food and water once a day and tell it to shut up and get down all the time, it would end up pretty stupid too. Dogs don't have the vocal cords for speaking English, but they sure understand English if you bring it up and raise it like you would a human. I had a dog I could tell in straight monotone English to do things, get things for me, etc. etc. It had to use body language to talk back, but it was no different than communicating with a human without the ability to speak. Too bad a dog doesn't have the hands we do too, or it could have done so many more things.

Then there are the birds many of my friends have had that COULD speak English and communicate very well with humans. I will never forget the argument of the one bird who wanted a cup of coffee while the owner kept telling it to wait until they get home, and the bird would just complain that he wanted it NOW just like an impatient child would. Once you experience things like this, you realize that humans are not so special and superior to any other animals. Even spiders given only one way in a room to get to something it wants, will sit for a while, figure out how to get there, and then go and execute this plan. You learn a lot if you watch TLC and the Discovery Channel instead of Basketball Games.

> It's *really* hard to imagine a worse choice than mankind.
> Maybe cats. :)

What about the choice that many claim created man and cats? Wouldn't GOD be the worse choice for creating such evil in the first place? Why is Satan still allowed to exist? Because he likes it the way it is.

No species can live and survive without KILLING. Sure you can have someone do your killing for you, but something still has to die (be it animal or plant) for you to continue to live. Now add a commandment that you are not allowed to kill, and we have a situation where all man must be sinners. By the time you are old enough to figure out this trap, it is too late.

The fact that evil things like killing are required in order for life to continue shows that if the Universe was created by a God, then God is one sick evil demented piece of crap.

I would have designed a Universe without evil. No one can die, pain does not exist. So no need for commandments. Just go and TRY to kill your neighbor. Can't do it, because no one can die! Stab him with a knife! No problem, pain is something only an EVIL god would create.

Yes, I could have made a much nicer existence.

If ALL people sin, and no one is perfect, then what happens when people get to heaven? All of a sudden no one has any bad thoughts, no one ever tries to kill anyone anymore or do anything bad? No crime in heaven, no pain in heaven, just eternal bliss???

Why not just bypass the shit part down here and just create everyone in heaven to begin with?

See how ridiculous this whole religious mumbo jumbo bullshit is?

The military rewards them for valor by converting them. The government has a machine they received from the aliens at area 51 that does the job for them.

I can't believe you just noticed this. The rest of us were aware of this years ago. Do you think Clinton started out white? He was the test case, conversion and elevation to the presidency, to insure it removed all barriers.

For fear of losing their constituency, the NAACP is demonstrating to have an end put to this operation. They are appealing to the UN, characterizing it as ethnic cleansing. Condition Orange is in effect as we expect an invasion from the French shortly in support of the NAACP.

Your government has been hiding all these facts from you! You are a mind numbed robot of the Bush take over. I can provide you with web sites that prove every thing I said is true. Let me know if you dare...

LOTS of books are out of print. That it was published in 1940 should tell you something. "My Boy Mo", published in 1959, is ALSO out of print.

Why insist on crying "conspiracy" or trying to "hush" something because it's out of print? Is the book not still available? Many books are out of print and can be purchased used. If someone was trying to prevent the sale or propagation of a certain text, there would be NO copies of the text available.

I'd tell you to use your head, but that would be pointless.

There efforts are doing no good. According to the Rev. Al Sharpton, Colin
Powell is in league with space aliens, hovering off the east coast, their
goal to eliminate all black people.

> I did answer your question about Jesus NOT telling us to hate our fathers
> and mothers...etc. You look at the Bible as a collection of
> statements....verses if you will that stand alone. This is simply not the
> case.

So then why do YOU try and answer questions by quoting a collection of verses from the Bible and allow them to stand alone. Do as you say, not as you do.

This AGAIN does not answer why Jesus made the statement to hate our parents, children, etc. It is just an attempt to twist the subject to something else. The bible tells us what Jesus said. It is a horrible statement no matter how you try and "interpret" it. Can you admit that?

> Just like any other book, information must be taken in context and
> with whatever else is written about the subject. Read the rest of the
> commentary by Jesus in the above mentioned verses....

As if I could say that "your mother is a whore" or "everyone should kill their parents" and then say something elsewhere that could make this "out of context" statement that I made to mean anything different than what I said.

From now on, anytime anyone finds fault with any of my statements, I will just say that they were taken "out of context"

Jesus said a really horrible thing there, and nothing else can possibly change the meaning of that statement.

It is bad, it is wrong, it is evil, it is the words of your beloved Jesus.

> previous message, and see the answer to your question. If you cannot
> understand the scripture.......only God can help you with that.

Great cop out. Especially since we BOTH know God can not help anyone with anything, so that puts a quick end to that discussion for you, doesn't it?

I know where you can find EXACT PROOF that God does not exist, but only those who ask Santa Clause for the proof will ever get to hear the proof. And only those that TRULY believe in Santa without doubt of his existence will ever get to see or hear him.

Does that sound ridiculous to you? Replace the words "Santa" with either "God" or "Jesus" and try and understand how ridiculous it looks to the rest of us.

> Where exactly does the Bible say that the world is flat with four corners? I
> have not seen, or otherwise do not remember reading that.

I know. You never read the Bible all the way through like us Atheists have, or you would be an Atheist too. You just like the few handful of quotes that are read allowed in your cult as they skip over all of the ones that contradict observed reality of the world we live in.

I can't find the exact one I was thinking about and looking for, but a quick search turned up this:

"After this I saw four angels standing at the four corners of the earth. . ."
--Revelation 7:1
It says four corners in two of the Revelation passages. there are also 16 references to the Sun revolving
around the Earth in the Bible

Many more bizarre mistakes in the Bible can be seen here:
http://www.skepticsannotatedbible.com/gen/sci_list.html

Check out some other Bible Verses you would also not be aware of since you never read the whole book:

"There she lusted after her lovers, whose genitals were
like those of donkeys and whose emission was like that
of horses. So you longed for the lewdness of your youth,
when in Egypt your bosom was caressed and your
young breasts fondled." - Ezekiel 23:20-21

"Therefore fathers shall eat their sons in the midst of you
and sons shall eat their fathers...I will send famine and
wild beasts against you and they shall rob you of your
children; pestilence and blood shall pass through you;
and I will bring a sword upon you. I, the Lord, have
spoken." - Ezekiel 5:10, 5:17

"But if the thing is true, that the tokens of virginity were
not found in the young woman, then you shall bring out
the young woman to the door of her father's house, and
the men of her city shall stone her to death with
stones..." - Deuteronomy 22:20

"Now therefore, kill every male among the little ones,
and kill every woman who has known man by lying
with him. But all the young girls who have not known
man by lying with him, keep alive for yourselves." -
Numbers 31:17 (Moses)

"Happy shall he be who takes your little ones and dashes
them against the rock!" - Psalms 137:9

"While the people of Israel were in the wilderness, they
found a man gathering sticks on the sabbath day...And
the Lord said to Moses, 'The man shall be put to death;
all the congregation shall stone him with stones outside
the camp.' And all the congregation brought him outside
the camp, and stoned him to death with stones, as the

Lord commanded Moses." - Numbers 15:32"

"...Hath he not sent me to the men that sit upon the
wall, that they may eat their own dung, and drink their
own piss with you?" - Isaiah 36:12

"I form the light, and create darkness: I make peace,
and create evil: I the LORD do all these things." - Isaiah 45:7

Yes, he creates evil all right. And straight from the Lord's mouth too.

> I am familiar with the dragons and unicorns.....both of which were seen in
> dreams and visions. Are all of your dreams true to life?

Yes these are dreams, visions and fantasy. So why were you making it appear
that you thought Jesus and God were reality before? Are you picking and
choosing which parts of the Bible you would like to be real and what you would
like to be fantasy? How do you make that determination? See your
problem? You admitted it is all dreams and fantasy, now you can't take any of
the rest of the book as fact or history. You lost the debate.

> I like to dunk
> basketballs in my dreams, and I could not be further from doing that in real
> life. The Bible is literal in places, figurative or allegorical in others.

And somehow, you are able to know which is which. God perhaps spoke to you and
no one else in the world for some reason? We both know you have never been
spoken to by God, have never seen God, and that you are trying to find a way to
justify why most of the Bible contains things so ridiculous that even you have
to admit they are just fantasy and dreams.

> In my own experience, and that of many many others, the only way to
> understand it is to have been enlightened by God.

Yet you have never been enlightened by God, so that makes no sense.

> I am sorry that you do not hear God.

So then you believe that it is a true fact. Good. Now why not pray real hard
to your God to speak to me, and then I can come back here and verify that he
really does exist and have the power to speak to humans.
I'll be waiting to hear from him.

> I know of no one who hears an audible
> voice. I do not hear one either.

There you go. Yet all the fictional characters in the Bible could. Doesn't
that seem strange?

> The best way for me to describe the
> communication is more like an intuitive thought or feeling where you just
> know something is true or happening.

How could Noah get the exact dimensions to build the Ark with an intuitive
thought or feeling? These were exact dimensions and specifications that God

spoke to him directly. Can you explain how that occurred, yet he has no desire to speak to a good dedicated follower of him as you are? I mean, we know why he won't talk to me, because I don't believe enough. But YOU do. So why is it he never spoke to YOU? Hmmmmmm?

> of hard knocks. I once read a thought by some random philosopher that read
> something like: "Why is it that we feel guilty about certain behavior even
> if we have not been taught that it is wrong?" It is a very good question.

An EASY question. For the same reason animals have the exact same feelings. From every action, you learn there is a reaction. An animal takes food from another animal, and that animal gets mad and attacks the animals that tried to take the food. After a while you LEARN that certain actions produce favorable results, and other actions produce unfavorable results. Animals don't need gods to know the difference between right and wrong.

When you first try to feed a bird or squirrel some food, it feels very guilty to take the food from you because of learned conditions. Once you finally convince it to take the food and show that you are giving it the food (something that no animal has ever done before) and runs away with it and sees you are not angry or going to chase it for taking your food, it learns the idea, and soon takes food our of your hand without any worry, fear, or guilt.

As a matter of fact, I would feed one squirrel every day at the same time of day. Usually I could see it out the window as it sat and waited for me. One day I thought I was going to be too busy and might not see it, so I just put the food outside for it. I did see the squirrel outside the window and figured it ate what I put out, and was waiting for me to bring more. To my surprise, when I opened the door and went outside, the food was still there. It looked at me, then went over and started to eat the food. It felt guilty to eat the food without my approval because it though it would have been stealing the food behind my back.

I have seen and experienced many situations of guilt in many types of animals as well as just about every other type of feeling we have. Gorillas that can talk to humans via sign language have told us how they feel sad when a loved one dies. This is documented fact and you can see it on television every so often, either on PBS, National Geographic, or such.

> I have been down this road with other Atheists before. You are not (nor am
> I) someone who's mind will be changed here.

So you are saying you don't have an open mind and will only believe one thing no matter what proof or contradictions can be shoved under your nose? We all start out as stupid children who are taught the religion of our parents and local society. It is only those that use their brains and figure things out, that find out that certain things they have been told do not make any sense with observed reality and don't fit the big puzzle.

> I write for the benefit of
> others. All I can tell you is 10 years ago I was searching for answers. It
> was very obvious to me that the world was not here by mistake.

But somehow God was just here by mistake? Why is it you are able to accept that?

> That who or
> whatever was responsible is so much wiser and more powerful than I am.

So then too, wouldn't there have to be someone so much wiser and powerful than God to have created God?

Don't you see the problem with your reasoning?

> Even
> before I believed what the bible teaches, it seemed extremely arrogant for
> me to question God. Call me crazy if you like, but waving my fist in God's
> face did not seem prudent.

What about when you did the same thing to Santa Clause? You didn't actually wave a fist in his face, but you gained the knowledge that Santa is not real and you no longer have to be good for his concern, you need to be good because it brings good results. Treat someone bad, and a not so favorable result may occur.

> I understand that you find the whole concept of God nonsense. It is not
> possible in my mind (however feeble you may believe it to be) that we are
> just here.....and will just die, the end.

And therefore, because you don't want to accept observed reality, you find the desire and need to create a theory to try and make death a less horrible to think about, because you now have a fantasy to help you through a very unpleasant reality that you don't want to accept.

Think about the Alzheimer's patient that doesn't know or remember one thing you tell them from the next. Their mind is rotting away and becoming defective. Yet somehow when they die and the brain completely gets destroyed, they will go to heaven and not have Alzheimer's anymore but full functioning minds again?

Try reading this carefully and see if you can understand how the human mind or "soul" works:

"Nothing enters our minds or determines our actions which is not directly or indirectly a response to stimuli
beating opon our sense organs from without. Owing to the similarity of our construction and the sameness of
our environment, we respond in like manner to similar stimuli, and from the concordance of our reactions,
understanding is born. In the course of ages, mechanisms of infinite complexity are developed, but what we
call "soul" is nothing more than the sum of the functioning's of the body. When this functioning ceases, the
"soul" ceases likewise."

"There are three ways by which the energy which determines human progress can be increased: First, we may
increase the mass. This in the case of humanity, would mean the improvement of living conditions, health,

eugenics, etc. Second, we may reduce the frictional forces which impede progress, such as ignorance,
insanity, and religious fanaticism. Third, we may multiply the energy of the human mass by enchaining the
forces of the universe, like those of the sun. the ocean, the winds and tides.

There is no conflict between the ideal of religion and the ideal of science, but science is opposed to theological
dogmas because science is founded on fact. The universe is simply a great machine which never came into
being and will never end.

> I think most people believe
> something is going on after this for a reason. I think it is because God
> gave them the desire to find out....to seek Him.

It is because our thinking and reasoning process has come to the point to where we can think about death and have the knowledge that we are going to die, and there is nothing anyone can do to stop it. You are going to die. This thought is so unbearable, that every civilization of humans comes up with some sort of god and theory of an afterlife to try and mute this very disturbing thought. But that also explains why every religion and god is so different throughout different civilizations. Yet they all seem to have a pleasant afterlife theory to comfort themselves with.

What is so wrong with just accepting death and realizing that all the pains and evil of life will be gone as soon as you die? That is not so horrible. It is scary if you have dependents and you worry for them, but for yourself there is nothing to fear. Eternal sleep with no work, no pain, no grief, no nothing.

> As I studied it all while taking philosophy courses, world religion
> courses etc....I saw that (as Ross Archer alluded to) the scientific
> explanations were every bit as and even more untenable than faith in a God.

No argument there. Do you know WHY that is? Because the church always had a strong control over science throughout history. Any scientist who had a theory that contradicted religion would be hung! Even today, it is forbidden to clone humans and abortions and stem cell research is still taboo.

But when science came up with the Big Bang Theory, the church embraced it, as it did not contradict the creationism theory, it only reinforced it. God created the Universe, the Universe was created with a Big Bang.

So your statement is correct, that today's science theories like the Big Bang Theory are nothing but bullshit.

The only reason we are allowed to think the world is round and not flat, is that you can't hide that reality anymore as we have photographic evidence of that now. We also don't hang scientists for theories anymore, so you will see the Big Bang Theory finally dropped, most likely, in your lifetime.

Without getting into a giant explanation into another topic, the Universe was not created, did not have a beginning or birth, and will not have an end. You can't NOT have existence. Else, no place to create or give birth to an existence, or any place for a god or creator to exist in. Simple really, if you just think about it.

> The more of the Bible I read, and the more genuinely humble I was towards
> God, the more I started to understand what I was reading.

Now that is very hard to believe. If you read the Bible, you see how evil and horrible the character of God behaves in the story and can not finish the book thinking any good thoughts of that character. Unless you are completely sadistic.

> There are others however who are
> reading and getting things from our debate.

And why I bother to take time to explain these things. If it wakes just one person up, it will have been worth it.

> I know that God's word is much
> better at explaining the truth than I am, so I try to leave it to Him and
> His word to do His work.

If every God believer would just hold to that thought, the religion would finally cease to exist.
Without Man, there is no one that can brainwash future generations with the Christian Mythology, or any other cult religion.

WITHOUT MAN, WHAT WOULD GOD'S PURPOSE BE?

Depending on your local Trunking, the Control Channel (noisy channel) will change each day. Don't lock them all out or you will loose working channels. It's kind of a pain in the butt, but each day as the control channel changes, unlock that one and lock the new one.

I put up with this for a few years and got feed up and bought a Trunking radio. The added advantage is, the control channels are hidden and you get to follow all the talkgroup's conversations. With a conventional scanner, listening to the trunk frequencies can be broken and confusing.

Good luck,

Jim

I don't own one (yet), but from everything I've read, I don't think the RX320's DSP is used for noise reduction, just as a final IF filter and demodulator. You can buy a noise-reducing DSP for the PCR-1000 for about $100, but I don't have one in mine so I can't say whether it's very good.

If you're only using it for HF, I would definitely get the RX320. Everybody says it's great.

However, I've never attempted to receive HF in a vehicle. You might want some heavy-duty noise reduction.

It is the same unit used in the ICOM 706MKII ham transceiver. I find that it is of marginal use compared to the DSP unit in my Kenwood.

If HF is what your after, you can't beat the Ten-Tec.

I absolutely agree with your goals as a human being and share them. When I speak of dust, I speak of myself compared to God. That God said he made me from dust, and that I will return to it. Again, humility. Which goes far in following the most important commandment, Loving God with all your heart soul and mind, and loving your neighbor as yourself.
My main concern is what I will be doing after this life, and obviously with pleasing God in this one. If I thought my life were eternally over when I die, I really cant think of much reason to leave a legacy. Why not just do what ever I want? Look out for number one and have the most possible fun. I suppose I would go back to the partying lifestyle I once lived. What would it matter what someone thought of me when I died? They would just end up dead too.
I cant honestly imagine a life where all I have is what I did on earth. Where there would be nothing afterwards. Nothing learned for later use, no experience to pass on to others. No hope for tomorrow. I am so glad that I do not have to live like that anymore. I have hope. Hopeful expectation of what is next. Proof positive in my heart that I will be rewarded for being a good steward of what God has given me, and the blessed ability (and responsibility) to share that hope with others.

Who will bring the charges is the question but with the world wide community against the US it could come from a large group of countries and mean jail time for George, Tony and generals like Tommy.
I use to have a NBC suit and a gas mask and almost every military person is issued one in any army in the world. This is standard issue especially when you are going to war against the largest producer of biological, chemical and nuclear weapons in the world, (the US).
The US military has the same treatment for their people for desertion, they shoot them on the spot if they try to walk over to the other side but it is very seldom used.
Scuds vs. ICBMs, hum. You must agree that every country has the right to defend themselves from invasion by whatever means possible. This is the American way isn't it and kill anyone that doesn't agree with them.

==========

Positive test for terror toxins in Iraq

Evidence of ricin, botulinum at Islamic militants' camp

SARGAT, Iraq, April 4 - MSNBC.com tests reveal evidence of the deadly toxins ricin and botulinum at a laboratory in a remote mountain region of northern Iraq allegedly used as a terrorist training camp by Islamic militants with ties to the al-Qaida terrorist network. The U.S. Central Intelligence Agency is conducting its own tests at the same area, but has not yet released the results, according to officials in northern Iraq.

MSNBC.COM'S TESTS were conducted over a two-day period at Sargat, an alleged terrorist training camp a mile from the Iraq-Iran border. The camp, set back in an isolated valley and surrounded by snowcapped peaks, was home to the radical Islamic militant group Ansar al-Islam, which counts among its some 700 followers scores of al- Qaida fighters.
In a Feb. 5 speech to the U.N. Security Council, U.S. Secretary of State Colin Powell showed a satellite photo of the Sargat camp and described Ansar al-Islam as "teaching its operatives how to produce ricin and other poisons." U.S. officials have repeated the allegations in recent weeks.
In an operation timed to coincide with the war on Iraq, U.S. special operations forces have targeted Ansar al- Islam's militants in northern Iraq. Hundreds of Islamists, including al-Qaida fighters who took refuge in northern Iraq after the fall of the Taliban in Afghanistan, have been killed.
Although U.S. officials for months have leveled charges that the Ansar al-Islam and al-Qaida militants were producing poisons in northern Iraq, it wasn't until this week that specialist American teams were able to gain access to the Sargat camp to test for traces of biological and chemical weapons.
Experts believe the Islamic group was producing the substances in the camp as both toxins can be created from everyday products and simple procedures.

TERRORISTS TEMPTED BY TOXINS
MSNBC.com's samples of ricin and botulinum, two deadly biological agents, were taken from the soles of a boot and a shoe recovered from the Sargat camp. The facility has been flattened by several Tomahawk cruise missiles, fired as part of the U.S. campaign against Ansar al-Islam.

The thick rubber boot twice tested positive for ricin, a toxin derived from castor beans. Ingesting a pinch of ricin, which causes shock and respiratory failure, can kill a human being within 72 hours. There is no cure.
A black running shoe, shredded by the U.S. bombing, tested positive for botulinum. U.S. officials say terrorists have a particular interest in botulinum and ricin toxins, which may be delivered through release in food

and water.
Botulism, the illness resulting from botulinum ingestion, is a muscle-paralyzing disease that can cause a person to stop breathing and die, according to the U.S. Centers for Disease Control.

Since Sept. 11, 2001, law enforcement officials have seen an increase in attempts to produce deadly toxins like ricin and botulinum.
In Britain, anti-terrorism authorities in January charged four men with producing deadly agents after they found traces of ricin in a north London apartment. More than a dozen arrests have been made in the investigation.
On Thursday, the FBI issued a warning to Americans that deadly agents like ricin and botulinum could be used to contaminate the nation's water or food supply.
And in France, police are on alert after recently finding traces of ricin in flasks in a train station locker in Paris.
The territory of northern Iraq where the traces of ricin were detected is not under the control of Iraqi leader Saddam Hussein.
Baghdad admitted to U.N. weapons inspectors in the 1990s that it had successfully weaponized ricin, botulinum and anthrax. There is no immediate evidence that suggests Saddam's regime provided the easily produced toxins to Ansar al-Islam or al-Qaida.
A test for anthrax at the Sargat camp gave a negative result.

WIDELY USED TEST
The tests, developed by Osborn Scientific Group in Lakeside, Ariz., are widely admired by experts. Called BioWarfare Agent Detection Devices, they were used by U.N. weapons inspectors in Iraq before their departure ahead of the U.S.-led war against Saddam.
Dr. Robert Bohannon, the inventor of the test, said in a phone interview that numerous U.S. federal agencies employ the tests in the field. He said the tests were developed to give a rapid "yes-no" result.
In recent days, specialist chemical-biological survey teams, some from the CIA, have collected samples from camps used by Islamic militants in northern Iraq. At least two teams visited the Sargat camp, taking similar rapid fields tests and collecting samples to be sent to the United States for further analysis, according to U.S. special operations forces officers speaking on condition of anonymity in northern Iraq.
"To swab a boot is perfectly acceptable," Bohannon said. "[The test] will tell you with almost 100 percent certainty if it is ricin or botulinum. There is a high probability they were there."
Bohannon, a former U.S. military scientist at the Dugway Proving Ground in Utah, said government experts would likely also subject their samples to a Gas Chromatography Mass Spectrometer, an apparatus that gives breakdown of the elements and composition of the sample. The GCMS is used also used to analyze urine samples for the presence of drugs.
The Osborn Scientific Group's test is widely used by federal agencies as first step in the "evidentiary chain," Bohannon said. "It will tell you very, very fast if it's got a credible amount of material."
U.S. special operations forces officials said this week they had found recipes for ricin and other toxins at camps in northern Iraq.
In several visits to the Sargat camp, MSNBC.com uncovered material that

could be used for terrorist purposes, including a list of chemical elements frequently found in explosives.
The list, written in Arabic, also includes notations on where chemicals like nitric acid, which can be used to make components of the explosive Semtex, can commonly be found.

We're still looking for weapons of mass destruction Remember?
I guess their bullets would count as a WMD, the same as Ricin, if they have enough bullets or beans.

Correction:

He says hate our parents because we have to LOVE Him above all else,. even
our
families. Don't let the word hate hang you up.

- Jesus never made a typo

"Cordell Ward" <dd@asdf.com> wrote in message

the
> > case.
>
> So then why do YOU try and answer questions by quoting a collection of
verses
> from the Bible and allow them to stand alone. Do as you say, not as you
do.

What are you talking about? Did you even read the passages, or the answer? The point is you are not reading the whole point of Jesus in the passage, nor have you read or understood many other passages in scripture that deal with the same issue. Again, I cant help you if you cant understand things that are spiritualy discerned. Call it a cop out , call it whatever you like.

> This AGAIN does not answer why Jesus made the statement to hate our
parents,
> children, etc. It is just an attempt to twist the subject to something
else.
> The bible tells us what Jesus said. It is a horrible statement no matter
how
> you try and "interpret" it. Can you admit that?

Absolutely not. I understand what He means. Let me spell it out again. When you follow Jesus, you must be willing to forsake EVERYTHING to follow Him. That means that if your dad is a rebellious jerk, you avoid him. If your child worships Satan, or is an athiest, you have no real relationship with him. Its like oil and water. They do not go together. It is clear that our minds are nothing alike here. It is like we are speaking different languages.

Let me ask you something. Pick your best subject....whatever it may be. Lets say for the sake of giving me something, you said that your most understood topic in the whole world was Botany. You are an expert in the field (no pun intended). Now of all you know about Botany, what percentage of all there is to know about it do you actualy claim to know? Even the most learned Botanist in the world would have to say he or she knows only a small percentage of what is knowable on the subject. With that in mind, how much

of what is knowable in the universe do you know? Perhaps some microscopic fraction?
So then is seems quite unresonable to suggest that you have everything all figured out with respect to the Bible for one, and certainly our ultimate purpose on earth. Were you here when it started? Are you eternal as to know that the universe has always been? If the universe has always been, and always will be, how do you explain entropy? The fact that everything is in a state of decay? Everything including morality? I think it is the 2nd law of thermodynamics is it not?

> > Just like any other book, information must be taken in context and
> > with whatever else is written about the subject. Read the rest of the
> > commentary by Jesus in the above mentioned verses....
>
> As if I could say that "your mother is a whore" or "everyone should kill their
> parents" and then say something elsewhere that could make this "out of context"
> statement that I made to mean anything different than what I said.

Again, it is like you are reading a language that you have not learned, and are suddenly able to write a lexicon on the language. It is a spiritual language, and you have not learned the alphabet yet. I think you might benefit from a class or two in theology, then you would at least know what Christians "say" they understand from scripture....that way you could rip all of that to logical shreds too.

> From now on, anytime anyone finds fault with any of my statements, I will just
> say that they were taken "out of context"
>
> Jesus said a really horrible thing there, and nothing else can possibly change
> the meaning of that statement.
>
> It is bad, it is wrong, it is evil, it is the words of your beloved Jesus.

See statement above, and yes. He is my Lord and Savior, He is Lord, and will be back to explain it all to you with the wrath of God behind Him.

> > previous message, and see the answer to your question. If you cannot
> > understand the scripture.......only God can help you with that.
>
> Great cop out. Especially since we BOTH know God can not help anyone with
> anything, so that puts a quick end to that discussion for you, doesn't it?

Claiming to know what I really think deep down inside is pretty arrogant. I suppose that you are an empath then? If you think the rest of the world has the same thought proccess that you do, you are sadly mistaken. Equally as mistaken if you think that yours is the only logical answer....just because it seems so to you. There is very little about anything you are saying here that seems logical to me.

> I know where you can find EXACT PROOF that God does not exist, but only
those
> who ask Santa Clause for the proof will ever get to hear the proof. And
only
> those that TRULY believe in Santa without doubt of his existence will ever
get
> to see or hear him.

That in itself is an amazingly arrogant statement. There is no way any logical human being can state exact proof of anything that is not seen or experienced. Hence you have as much faith in nothing as I do in God. I thought faith was for the "week minded". At least I acknowledge it as faith.

> Does that sound ridiculous to you? Replace the words "Santa" with
either
> "God" or "Jesus" and try and understand how ridiculous it looks to the
rest of
> us.
Thats right.....just like the scripture says, the wisdom of God is foolishness to men. Check this out....and try to let it sink in:

1 Corinthians 1:18-21 For the preaching of the cross is to them that perish foolishness; but unto us which are saved it is the power of God. For it is written, I will destroy the wisdom of the wise, and will bring to nothing the understanding of the prudent. Where is the wise? where is the scribe? where is the disputer of this world? hath not God made foolish the wisdom of this world? For after that in the wisdom of God the world by wisdom knew not God, it pleased God by the foolishness of preaching to save them that believe.

> > Where exactly does the Bible say that the world is flat with four
corners? I
> > have not seen, or otherwise do not remember reading that.
>

have, or
> you would be an Atheist too. You just like the few handful of quotes
that are
> read allowed in your cult as they skip over all of the ones that
contradict
> observed reality of the world we live in.

Whew....there you go again. Guess you have a hidden camera in my house since you know all about me. Did it show you that I do not attend an organized church? Did you see me in my study EVERY morning at 5:30 am reading scripture? I have indeed read the Bible more than 20 times over. Your insight is obviously flawed. A cult is a group that among other things builds doctrine around single scriptures (sounds kinda like you making outrageous claims about the statements of Jesus of whom you know NOTHING). Your statements about what the average person who SAYS they are a Christian are generaly true. Most Christians do not read the Bible. Most do not put their butt behind what they say they believe. Most are fakes, and hypocrites. Until you stop by the house and hang out with me for a

while....do not assume anything.

> I can't find the exact one I was thinking about and looking for, but a
quick
> search turned up this:
>
> "After this I saw four angels standing at the four corners of the earth. .
."
> --Revelation 7:1

And from this you assume that the passage is saying that the world is flat? Have you ever read Shakespere? Are you familiar with any writing that tries to paint a vivid picture? Here is a passage to be taken literaly. First....a hint since you have not studied theology. The "Word" referenced here is speaking of Jesus. From the Greek word "logos". Try a theological search of that word....just for fun.

John 1:1-5 In the beginning was the Word, and the Word was with God, and the Word was God. The same was in the beginning with God. All things were made by him; and without him was not any thing made that was made. In him was life; and the life was the light of men. And the light shineth in darkness; and THE DARKNESS COMPREHENDED IT NOT. (caps added for emphasis, not shouting)

any of
> the rest of the book as fact or history. You lost the debate.

I lost nothing, and you have absolutely no clue what you are talking about. You are the one who has not read the Bible. Nor have you tried to understand it. Much of the Bible, mainly the Old Testament, (where all of your quotes are coming from) is written in stories. Just like any other book, you need to read the whole story to know what the point is. Perhaps you should try reading it in a more modern version, so the old english does not cause you

problems. I will not bother here explaining every story to you. READ THE BIBLE. And maybe you will be able to take some of these scriptures off of your "what the hell does this mean" list.

> justify why most of the Bible contains things so ridiculous that even you have
> to admit they are just fantasy and dreams.

Yes for the most part I do know which is which. And you could know it too. Even if you just studied theology and had others explain it to you. And.....no I am not the only one.

> > In my own experience, and that of many many others, the only way to
> > understand it is to have been enlightened by God.
>
> Yet you have never been enlightened by God, so that makes no sense.

And you know this because......all knowing John hath spoken?

> > I am sorry that you do not hear God.
>
> So then you believe that it is a true fact. Good. Now why not pray real hard
> to your God to speak to me, and then I can come back here and verify that he
> really does exist and have the power to speak to humans.
> I'll be waiting to hear from him.

I have no doubt that you do not hear Him. You turned Him off long ago. I WILL pray for you. For you to humble yourself for just 5 minutes, take yourself down from your "I am as wise as God" attitude, and ask God for wisdom.
I will also pray that when He starts pouring His wrath upon you and all of the other unbelievers, that you will then see that He is God and repent. AND you WILL hear from him....Every knee will bow (including yours) and every tounge confess that Jesus is Lord to the glory of the Father. Either willingly or by fear and trembling.

> > I know of no one who hears an audible
> > voice. I do not hear one either.

>
> There you go. Yet all the fictional characters in the Bible could.
Doesn't
> that seem strange?

No, if God wants to communicate to His creation one way at one time in
history and another way at another....who are we to question it?

need
> gods to know the difference between right and wrong.

Cool, Im glad that you understand all of the deep things of philosophy....I
eagerly await your next book, so the world can worship you and I can watch
in amazement.

If there is no God, what good is right and wrong? Live it up baby! You
have nothing to prove to anyone or anything. Nor are you responsible to
anyone or anything. You have no legacy or "life of goodness" to leave to
anyone, cause they will just be dead anyway. And, after 200 years of

history, no one will ever really know what happened anyway, whether it did or not. I think you should kill anyone you want, sleep with anyone you want, take everyones money you want.....just party it up. Might as well. There is no controling moral authority anyway. Your values are good for you, and mine are good for me. So you wont mind when that prison escapee steps into your house and blows you away. Who are you to impose your morality on him? If he wants to blow you away thats his perogative. We cant send him to jail either, after all he thinks its ok to kill people.
So your goodness then gets you what? A longer wait to be fertilizer? Oh boy, where do I sign up. Thats what I want, who can delay the fertilization of the planet the longest. That would be a life not worth living......what a horible way to live....thinking that when you die there will be eternal nothingness......I really feel sorry for you.

Your mind is no more open than mine is. I am really exited about figuring out that the big puzzle is completely meaningless. I am particularly looking forward to teaching my son that other than the good stuff he does for people that no one will remember, his life will be over and thats it. And we wonder why kids want to kill themselves so often these days? WOW.

> > I write for the benefit of
> > others. All I can tell you is 10 years ago I was searching for answers.
It
> > was very obvious to me that the world was not here by mistake.
>

accept
> that?

Because I am not arrogant enough to think that I must understand every concept in order for it to be so.

> > That who or
> > whatever was responsible is so much wiser and more powerful than I am.
>
> So then too, wouldn't there have to be someone so much wiser and powerful
than
> God to have created God?
>
> Don't you see the problem with your reasoning?

No, I can see the distinct possibility that I only understand a small fraction of what I see touch and feel.

Does an ant have any idea of the big picture and what is really happening when the Car rolls over him in the driveway? In the vast universe you live in, do you really think you understand much more than the ant does?

I suggest to you that God is higher above you than you are above the ant. If that is the case, do you really think you can understand anything fully without God's help?

> > Even
> > before I believed what the bible teaches, it seemed extremely arrogant for

> you no longer have to be good for his concern, you need to be good because it
> brings good results. Treat someone bad, and a not so favorable result may
> occur.

The Bible is not about santa, nor are all of the thousands of manuscripts of evidence suporting it. Santa was and is a pagan secular substitute for true worship of God, as is Easter. The two are not even slightly similar.

> > I understand that you find the whole concept of God nonsense. It is not

> think about, because you now have a fantasy to help you through a very
> unpleasant reality that you don't want to accept.

It is not that I dont want to accept it, its that something inside tells me that death wont be the end. I have no trouble at all with death. I am actually kind of looking forward to it. How will you feel about it as you draw your last breath knowing that you are done forever? You can rest easy though. You are eternal, and you still have time to make that eternity pleasant.

> Think about the Alzheimer's patient that doesn't know or remember one thing you
> tell them from the next. Their mind is rotting away and becoming defective.

> machine which never came into
> being and will never end.

Wow, that makes alot of sense now doesnt it? And my view is a cop out? Science has not proven anything. They cant even follow their own rules with regard to anything of importance. You have faith in nothing, and I have faith in God.

Since you have nothing to look forward to anyway....why not try to believe God? You have absolutely nothing to loose.
>
> > I think most people believe

book
> thinking any good thoughts of that character. Unless you are completely
> sadistic.

Actualy, in the Old Testament, God is just trying to get people to wake up and smell the coffee. They worship Him as God for a while...everything is fine....then they drift away to do their own thing again, He smacks them around and they come back. He is still doing that today. God is good way beyond measure, merciful beyond measure and has forgiven me way more than I deserve. If that makes me sadistic in your eyes....so be it.

This has all been very entertaining, and for some im sure very irritating.
I have said what I think has to be said and I think you have as well. This
will be my last post on this topic. Maybe next time we can talk about or
trade radios. Till then 73

Uniden MR8100 scanner

Used but excellent condition Uniden MR8100 scanner with 800mhz
etc.Works great,comes with manual and software for computer use.Comes
with computer cable also.see pics.

BEST REASONABLE OFFER

http://mysite.verizon.net/vze1p5vc/radios/mr8100.jpg

Dunno, but I do agree that we could argue forever about what "heaps"
means... :-)

For me, anything within roughly $300-$500 falls in the same price
category.
When buying a new radio I certainly would not sacrifice on performance
only to save $100 (and then live with the mediocre consequencies of my
decision for the next few years). While I do admit I would think hard
if the radio was say $1000 more, $100 or $200 really make no
difference if the result means greater listening indulgence and
operating pleasure every night... ;-)

I must agree but have we ever had a conflict like this one? A new type of conflict could bring a new set of punishments. One other thing didn't the US in the 70s pass a law that the military can't be used to assassinate heads of state of other countries? So Bush has not only violated international law but the laws of his own country. If I were an American I would be very worried about that.

Positive test for terror toxins in Iraq

Evidence of ricin, botulinum at Islamic militants' camp

SARGAT, Iraq, April 4 - MSNBC.com tests reveal evidence of the deadly toxins ricin and botulinum at a laboratory in a remote mountain region of northern Iraq allegedly used as a terrorist training camp by Islamic militants with ties to the al-Qaida terrorist network. The U.S. Central Intelligence Agency is conducting its own tests at the same area, but has not yet released the results, according to officials in northern Iraq.

MSNBC.COM'S TESTS were conducted over a two-day period at Sargat, an alleged terrorist training camp a mile from the Iraq-Iran border. The camp, set back in an isolated valley and surrounded by snowcapped peaks, was home to the radical Islamic militant group Ansar al-Islam, which counts among its some 700 followers scores of al- Qaida fighters.
In a Feb. 5 speech to the U.N. Security Council, U.S. Secretary of State Colin Powell showed a satellite photo of the Sargat camp and described Ansar al-Islam as "teaching its operatives how to produce ricin and other poisons." U.S. officials have repeated the allegations in recent weeks.
In an operation timed to coincide with the war on Iraq, U.S. special operations forces have targeted Ansar al- Islam's militants in northern Iraq. Hundreds of Islamists, including al-Qaida fighters who took refuge in northern Iraq after the fall of the Taliban in Afghanistan, have been killed.
Although U.S. officials for months have leveled charges that the Ansar al-Islam and al-Qaida militants were producing poisons in northern Iraq, it wasn't until this week that specialist American teams were able to gain access to the Sargat camp to test for traces of biological and chemical weapons.
Experts believe the Islamic group was producing the substances in the camp as both toxins can be created from everyday products and simple procedures.

TERRORISTS TEMPTED BY TOXINS
MSNBC.com's samples of ricin and botulinum, two deadly biological agents, were taken from the soles of a boot and a shoe recovered from the Sargat camp. The facility has been flattened by several Tomahawk cruise missiles, fired as part of the U.S. campaign against Ansar al-Islam.

The thick rubber boot twice tested positive for ricin, a toxin derived from castor beans. Ingesting a pinch of ricin, which causes shock and respiratory failure, can kill a human being within 72 hours. There is no cure.
A black running shoe, shredded by the U.S. bombing, tested positive for botulinum. U.S. officials say terrorists have a particular interest in botulinum and ricin toxins, which may be delivered through release in food

and water.
Botulism, the illness resulting from botulinum ingestion, is a muscle-paralyzing disease that can cause a person to stop breathing and die, according to the U.S. Centers for Disease Control.

Since Sept. 11, 2001, law enforcement officials have seen an increase in attempts to produce deadly toxins like ricin and botulinum.
In Britain, anti-terrorism authorities in January charged four men with producing deadly agents after they found traces of ricin in a north London apartment. More than a dozen arrests have been made in the investigation.
On Thursday, the FBI issued a warning to Americans that deadly agents like ricin and botulinum could be used to contaminate the nation's water or food supply.
And in France, police are on alert after recently finding traces of ricin in flasks in a train station locker in Paris.
The territory of northern Iraq where the traces of ricin were detected is not under the control of Iraqi leader Saddam Hussein.
Baghdad admitted to U.N. weapons inspectors in the 1990s that it had successfully weaponized ricin, botulinum and anthrax. There is no immediate evidence that suggests Saddam's regime provided the easily produced toxins to Ansar al-Islam or al-Qaida.
A test for anthrax at the Sargat camp gave a negative result.

WIDELY USED TEST
The tests, developed by Osborn Scientific Group in Lakeside, Ariz., are widely admired by experts. Called BioWarfare Agent Detection Devices, they were used by U.N. weapons inspectors in Iraq before their departure ahead of the U.S.-led war against Saddam.
Dr. Robert Bohannon, the inventor of the test, said in a phone interview that numerous U.S. federal agencies employ the tests in the field. He said the tests were developed to give a rapid "yes-no" result.
In recent days, specialist chemical-biological survey teams, some from the CIA, have collected samples from camps used by Islamic militants in northern Iraq. At least two teams visited the Sargat camp, taking similar rapid fields tests and collecting samples to be sent to the United States for further analysis, according to U.S. special operations forces officers speaking on condition of anonymity in northern Iraq.
"To swab a boot is perfectly acceptable," Bohannon said. "[The test] will tell you with almost 100 percent certainty if it is ricin or botulinum. There is a high probability they were there."
Bohannon, a former U.S. military scientist at the Dugway Proving Ground in Utah, said government experts would likely also subject their samples to a Gas Chromatography Mass Spectrometer, an apparatus that gives breakdown of the elements and composition of the sample. The GCMS is used also used to analyze urine samples for the presence of drugs.
The Osborn Scientific Group's test is widely used by federal agencies as first step in the "evidentiary chain," Bohannon said. "It will tell you very, very fast if it's got a credible amount of material."
U.S. special operations forces officials said this week they had found recipes for ricin and other toxins at camps in northern Iraq.
In several visits to the Sargat camp, MSNBC.com uncovered material that

could be used for terrorist purposes, including a list of chemical elements frequently found in explosives.
The list, written in Arabic, also includes notations on where chemicals like nitric acid, which can be used to make components of the explosive Semtex, can commonly be found.

You have confused two different reports. The one your referring to is the materials found in the underground tunnels at the airport.

The materials found in the north have not been refutiated.

As I type this I am watching our tanks rolling through Baghdad. :>)

Brig. Gen. Vincent Brooks told reporters during a U.S. Central Command briefing in Qatar Friday that special forces in Iraq's western desert also found what they believed to be a training school for handling nuclear, chemical and biological warfare in the western desert of Iraq.

At least one bottle of the deadly chemical weapon, Tabun, was reportedly found. Tabun is a clear, colorless and tasteless liquid with a slightly fruity odor, and is lethal.

If skin absorption is great enough, death may occur in one to two minutes, or it may be delayed for one to two hours. Lethal respiratory dosages kill in one to 10 minutes, and liquid in the eye kills almost as rapidly.

Earlier this week, Fox News reported that evidence was found in the regions of northern Iraq that the Islamic militant group Ansar al-Islam was working on three types of chlorine gas and ricin and has ties to Al Qaeda.

U.S. sources said that documents and equipment were found in the rubble of an Ansar facility were described as "a cookbook and kitchen" for chemical weapons

Earlier this week, Fox News reported that evidence was found in the regions of northern Iraq that the Islamic militant group Ansar al-Islam was working on three types of chlorine gas and ricin and has ties to Al Qaeda.

U.S. sources said that documents and equipment were found in the rubble of an Ansar facility were described as "a cookbook and kitchen" for chemical weapons

Brig. Gen. Vincent Brooks told reporters during a U.S. Central Command briefing in Qatar Friday that special forces in Iraq's western desert also found what they believed to be a training school for handling nuclear, chemical and biological warfare in the western desert of Iraq.

At least one bottle of the deadly chemical weapon, Tabun, was reportedly found. Tabun is a clear, colorless and tasteless liquid with a slightly fruity odor, and is lethal.

(This HAS been confirmed)

Again, military analysts haven't yet CONFIRMED the other finds that MSNBC has analyzed. It's been reported that in addition to the ricin and botulinum mentioned, cyonide and mustard gas have been found as well at the Euphrates.

All disrespect intended "Q". If it doesn't come directly out of the mouth of a military officer I just don't believe it.

The media is in the business of hyping up the news to sell the news.

Now back to RADIOS when we should have been in the first place.

- i don't buy *anything* with 'Win' in the product name...

- where are the open source drivers for the G303i?
(www.linradio.org does not have any, and its projects
appear dormant)

- Ten-Tec supplies docs on the protocols used for the RX-320,
and it works with *any* operating system, even PalmOS; this
means that the RX-320 will be useful and will work with any
OS for as long as the hardware works...

- i'm sure the G303i is a nice piece of hardware, but if it
comes to locking myself into a particular OS, forget it;
i'd rather do with less features and be able to use a
product with any or all platforms...

- this is one reason i like the pro-92 scanner, icom ic-r2,
yaesu vr-120d, and yaesu vr-500 wideband HHRs...

> > time for George, Tony and generals like Tommy.
==========
No. 1 the whole world isnt against the US. Germany is even now coming around
to the US's position and even France is starting to put their tail between their legs.
There will be no war crimes trials against ANY of the coalition forces. Wont happen.
Any bets???

> > I use to have a NBC suit and a gas mask and almost every military person

==========

Yea hell Ive got one hanging in my closet. And your term of "almost" every
military person being issued one is simply not true. Been there done that.

> > you are going to war against the largest producer of biological, chemical
> > and nuclear weapons in the world, (the US).
==========
The US has not produced any chemical, biological weapons in years if not decades.
We are now faced with the problem of how to safely get rid of the stores we have
produced years ago.

> > The US military has the same treatment for their people for desertion,
> they
> > shoot them on the spot if they try to walk over to the other side but it

> > very seldom used.
==========
Watch the news dweeb,, we're not talking about shooting deserters we're talking
about the wholesale slaughter of civilians, that has been going on for 2 decades.
I think the count is up to about 2 million people hussein has had killed. Lets compare
apples to apples, which you are not doing, or dont have a clue about.

> > Scuds vs. ICBMs, hum. You must agree that every country has the right to
> > defend themselves from invasion by whatever means possible. This is the
> > American way isn't it and kill anyone that doesn't agree with them.
==========

The US is not prohibited to have ICBMs. Nor is the US a belligerant or aggressive
country, nor are we sponsors or backers of terrorists. Iraq by the UN resolution THEY

signed is/ was prohibited from having them. No they didnt have the right to have them. As well as the chemical/ biological agents that have been found within Iraq, not supposed to have them either by the same UN resolution they signed. Get a clue

That is the white powder at the airport. They never reported that
as a biological chemical. They first thought it might be something
used to make explosives.

This was before the colonization and take over of moslem countries by
european powers. Under threat, they became more extreme and intolerant.
Seems to happen when ever a country or nationality feels threatened.

So you're trying to argue fundamentalism from a nontheistic standpoint. No educated person accepts the genesis stories as factual unless they are of the unique brand of radical protestantism termed fundamentalist, uniquely found only in the US, though unfortunately being spread throughout Latin America presently. These bible stories were attempts to make sense of the world, to understand, they are not facts in the same way as radio theory. Its a story of faith and reflects their understanding of god much of the time versus anything ultimate. We have other myths and stories now, b/c we have more information. None of this makes any difference to the basic spiritual beliefs of christianity. The bible is not a rule book, a reference of all truth, but one pillar, the others being tradition, faith and conduct. The fundamentalists spend far too much time arguing about ideas, leaving out things like ethical behavior both personal and beyond the individual. I think they have far too much influence on US culture and policy. And it appears they have caught you and had you argue with them within their confining little box.

We have endless freewill to make choices and often, lately, make poor ones both as individuals and societies. Interference from a deity would be to make plain the will of that god regarding your behavior, and you would not be free to choose a direction any more.

As for the song of solomon - sex IS dirty if you do it right!

Most in the military today are minorities (the majority). However, in units where skill standards are very high (special forces, armored, airborne - the units often featured on television), the majority are white. However, the military now seems aware of the impression this creates and is now using officers "of color" at many press conferences.

2202. Wanted - EF Johnson Mobile Radios

Newsgroup: rec.radio.scanner
Date: 2003-04-05 23:28:57 UTC
From: n9nlu_REMOVE_THIS_@charter.net
Message-ID: <v8uprgoprp283e@corp.supernews.com>
Source record: 33417

I'm looking for a couple EF Johnson Challenger Mobile radios ... in the VHF and UHF range. 15W, 40W or high power ... don't matter... just not the very low power 2W versions.

7151 VHF 15W
7152 VHF 40W
7155 VHF High Power
or various other versions

7171 UHF 15W
7172 UHF 35W
7175 UHF High Power
or various other versions

I'm also looking for a 1 or 2 of the remote Alpla heads for the challenger series radios.

Contact me at n9nlu_NO_SPAM_@charter.net .. .remove the _NO_SPAM_ when e-mailing

Thanks

Dave

I agree that the "win-" in the name may be somewhat misleading in this case. I am using WR-1550e both on my Windows PC as well as an experimental Red Hat - based Linux system. You can get open source protocols for the 1550e on http://www.linradio.com . Besides, Winradio even offer native software for the Mac (where is TenTec's equivalent for that?).

As to G303i, I have it from good sources that Linux support is coming soon. As with any Winradio product I have tried so far, I am sure it will be worth the wait. I the meantime I am enjoying their Windows interface which is better than anything anybody has done in PC-based radios to-date, plus RF performance I have never experienced even on much more expensive receivers. Read the review in the Feb 2003 issue of the Shortwave Magazine for details.

: any help would be appreciated

It won't do you any good unless you have a receiver that can set PL tones (but I'll assume you do) .. I'll also assume that you prefer to listen to your own town's broadcasts .. so *those* are the PL tones you need, not the out-of-towners.

I seems a bit unusual for "surrounding" towns to share the same freq .. even if they have different PL tones. (unless they use that freq to talk to each other) PL does not stop interference ... it only stops you from hearing other signals if your local station is not transmitting.

That is to say .. if another station has a strong enough signal to interfere with a local station .. then it WILL interfere PL or not. All PL will do is keep your speaker quiet if the local station is not transmitting.

How to find the PL tones? Well, for starters, let us know where you are.

Depends on a couple things...

First, if you have the right scanner, such as a BC780/785/250 or perhaps a RS Pro92/2067 the radio can decode and display the PL or DPL used. You can then program that PL or DPL into the radio to exclude all others.

If your receiver does not have PL or DPL capability then you are out of luck anyway.

There are other devices that will display PL or DPL information but you need a scanner that will allow you to use that info.

Also, it is more common for neighboring towns to use the same PL on shared dispatch frequencies. This reduces problems with one town covering the other and allows for easier mutual aid. Sometimes "back channels" or secondary channels may have separate PL's however.

I just bought one at a BB yesterday. Since it was the last one in the
store and missing some parts, BB sold it to me for $39.99 Here's a
review at Strong Signals.

http://www.strongsignals.net/access/reviews/reviews.cgi?type=display&rtype=rev&class=recv&
num=034

Check the Strong Signals message board for comments on the SC180B.

The first think I noticed about is that I heard the normally beyond
scanner range dispatcher on the old B&O Railroad.

Are you saying you have a BC895XLT? If it's an 895XLT and not 89XLT, try the following. Press the CTCSS button for 2 seconds. It will start scanning through the numbers when your station is talking. When it gets to the proper tone it will stop on that number. That will be the number you're needing.

Hope that helps.

There has been some coverage. However, the deceased are being flown in and out of military bases during the trip back to the United States. Obviously, access to these military bases is restricted. On occasion, members of the press are allowed entry to cover special news events under very tight rules. In the case of coverage of deceased personnel, these rules include no identification until family members are notified, no photographs of the deceased, no description of the injuries, no mention of the deceased's final destination, and so on. In many cases, these rules are designed to protect the dignity of the deceased and the privacy of the surviving family members.

I completely agree. People says they use their scanners/shortwave
radios for 20 years. I wonder how many in this newsgroups uses
even a 10 year old PC, or 10 year old OS (Windows 3.11).

> - this is one reason i like the pro-92 scanner, icom ic-r2,

Agree. Normally the only excuse for buying a win product
is stupidity, and that is a pretty bad excuse.

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

The following are from independent human rights organizations about Saddam's crimes:

Human Rights Watch

"The Iraqi government of President Saddam Hussain perpetrated widespread and gross human rights violations, including arbitrary arrests of suspected political opponents and their relatives, routine torture and ill-treatment of detainees, summary execution of military personnel and political detainees as part of a "prison cleansing" campaign, and forced expulsions of Kurds and Turkmen from Kirkuk and other regions." (2002 Report)

UN Commission on Human Rights

Adopted a resolution strongly condemning "the systematic, widespread and extremely grave violations of human rights and of international humanitarian law by the Government of Iraq [Saddam Hussein], resulting in an all-pervasive repression and oppression sustained by broad-based discrimination and widespread terror." (4/01)

Amnesty International

"Political prisoners and detainees were subjected to systematic torture. The bodies of many of those executed had evident signs of torture. Common methods of physical torture included electric shocks or cigarette burns to various parts of the body, pulling out of fingernails, rape, long periods of suspension by the limbs from either a rotating fan in the ceiling or from a horizontal pole, beating with cables, hosepipe or metal rods, and falaqa (beating on the soles of the feet). In addition, detainees were threatened with rape and subjected to mock execution. They were placed in cells where they could hear the screams of others being tortured and were deliberately deprived of sleep." (Latest Report)

Try the OptoElectronics OptoTracker or DC4xx series decoders or the CSI
CD-1 or CD-2 decoders. While they both require discriminator jacks
(pretty easy to install) they will display PL and DPL directly as soon
as the comm comes up.

I have 4 of the CD-1's and they work great.

I have an very old radio shack scanner and am looking to replace it. I don't want to spend hundreds of dollars, but I do want something that offers a lot of frequency range. What would you all recommend?

I'm told most modern scanners go over 900 mHz? Do any go higher? Do any link to a PC for easier programming (i.e. "upload" a frequency list to program.)

I'm open to any recommendations.

Thanks all.

Yes, it does take some cojones to put up a cyber-begging page and ask for handouts, especially when one is a highly-paid self-proclaimed mathematical genius.

It takes cojones to post a link to that page in a public newsgroup.

It takes cojones to act offended when someone points out said webpage, even though it stated clearly on that page that one is not ashamed to beg.

It takes cojones to spew forth hateful lies in response, even though one proclaimes to be a "lover."

It takes cojones to call oneself a mathematical genius with no proof whatsoever, while at the same time looking down one's nose at the rest of the world.

It takes cojones to claim that all of this is a gender-based issue, and that if I was a real "gentleman" I would have just "tipped my hat" and said nothing.

It takes cojones to insult the long-standing members of this board by calling the majority of them stupid rednecks.

It takes cojones to post song lyrics, acting as though one is making a profound statement, when actually one can not defend oneself for being the phony that one is.

Yep, that's a lot of cojones alright.

Here's what DOESN'T take any cajones at all: removing the webpage in question - although I will say that it was the right thing to do.

>Agree. Normally the only excuse for buying a win product
>is stupidity, and that is a pretty bad excuse.

Oh really? Let's see....

There is no difference between Icom PCR-1000 and Winradio WR-1550e
in terms of platform interfacing - they both have serial interface
(except the Winradio also has PCMCIA interface and optional USB

interface). Both also come with Windows software.

EXCEPT:

1. The Winradio already comes bundled with first class software, while the Icom comes with a shitty one, so any serious user must necessarily rely on third party software.

2. The Winradio is also supported under Mac (natively, free software available for download on their Web site), while Icom is not.

3. The Winradio is also supported under Linux (driver source codes available freely on their Web site), but Icom is not.

4. API for the Winradio is freely available on Winradio Web site, with many source code examples, for free. And guess where is Icom's support: non-existent.

5. There are plenty of *free* software utilities for the Winradio such as numerous XRS plugins, the Radio Basic, etc. (What, you have not heard of Radio Basic? Just don't ask Icom.... ;-)

There is more, but this should be enough. So you see, before you make any further ignorant comments referring to anyone's "stupidity" when making a purchasing decision, I would suggest that you get properly acquainted with the subject matter first.

Richard

Does anyone know how to do a search on a bearcat 200XLT. You know where it scanns through a series of frequencies? I can find the manual to mine and can't remember how to do it.

I have a 386SX (a secondary computer) which I still use for some DOS based programs, running Windows 3.0. To the best of my recollection, it's at least 15 years old, maybe more. I have an RX-320 running on a Pentium 100 mhz box. It's a great little radio--the noise has been tamed with an attic antenna using coaxial lead-in. I want to dedicate the 386 for use with the 320 but I need to lay my hands on a copy of Win 3.1. BTW-I still have an early Apple II and XT clone in working order.

Sure, and you obvoiusly already own one. Just get the Wintone program
and run the audio into your soundcard. Works great with a
discriminator tap, though I've never tried it with the earphone out
jack.

> Most in the military today are minorities (the majority).

Wrong. The enlisted ranks of the military services are about 60%
white, 22 percent black, the rest Latino and "other." Minorities may
be overrepresented in proportion to their share of the total
population, but they are not a majority of the military. The officer
ranks remain overwhelmingly white.

A more interesting issue is the class and geographical background of
service personnel. They are disproportionately from small towns,
inner cities, and the deep South, and from blue-collar families of
whatever ethnicity.

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why are we picking on Iraq
on human rights grounds, particularly when there are so many other repressive regimes
Washington supports?

Where did you get that?

"Significant racial/ethnic differences exist among the Services.
Approximately 40 and 41 percent of Army and Navy accessions, respectively,
are minorities, as compared to 32 percent of Marine Corps recruits and 31
percent of Airforce recruits. The services have maintained their 37 percent
rate of minority recruitment. The proportion of Hispanics and "Other"
minorities increased as the proportions of African-American and
Anglo-American decreased, generally mirroring the trend in the comparable
civilian population. "

Minority participation in the armed services is well over 30%.

Got a weird problem I'm hoping someone can figure out. I have a Radio Shack (Realistic) Pro-43 scanner that has been modified to recieve the cell band. I was listening to some of the cells calls last night and after about 15 minutes I couldn't pick any of them up. I have the limit set from 868.000 - 896.000 and it just keeps searching and searching but will not pick up any of these calls. I can still listen to the 800 MHZ trunking police frequencies with no problem. Anyone know what could have happened to this thing?

Thanks,
Chris

Indeed. Saw a statistic a few months ago that while blacks make up about 14% of the general population of N.Am., they make up nearly 23% of American military personnel. Not a HUGE difference, perhaps, but it is interesting.
But what it has to do with scanners, I don't know! :-)

Maybe you spontaneously moved into the 21st century and everyone's cell phones
turned digital!? ;)

I am not sure that there is even any analog traffic on the cell frequencies
around here anymore.

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

Umm...
http://www.thesandiegochannel.com/news/1958753/detail.html
"Whites still make up the majority of those serving in the military, but by
a much smaller margin. In 2000, minorities made up 40 percent of the Army,
35 percent of the Navy, 32 percent of the Marine Corps, and 25 percent of
the Air Force. "

http://www.military.com/Resources/ResourceFileView?file=guard_help_pages.htm
The National Guard mirrors America more accurately than ever -- the Army
National Guard now consists of 26.1 percent minorities and 10.5 percent
women, while the Air National Guard is composed of 20.3 percent minorities
and 16.3 percent women.

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

So.... the following is God's word I guess....

Isaiah 36:12
Hath he not sent me to the men that sit upon the wall, that they may eat
their own dung, and drink their own piss with you?

Malachi 2:3
Behold, I will corrupt your seed, and spread dung upon your faces!

Ezekiel 4:12
And thou shalt eat it as barely cakes, and thou shalt bake it with dung that
cometh out of
man..."

Ezekiel 4:15
"Lo, I have given thee cow's dung for man's dung and thou shalt prepare thy
bread
therewith"

JOB 41:19.....
Out of this mouth go burning lamps, and sparks of fire leap out. Out of his
nostrils goeth smoke, as out of a seething pot of caldron. His breath
kindleth coals, and a flame goeth out of his mouth.

Isaiah 34:7
And the unicorns shall come down with them, and the bullocks with the bulls;
and their land shall be soaked with blood, and their dust made fat with
fatness.

Revelation 12:3 "...and behold a GREAT RED DRAGON, having SEVEN HEADS and
ten horns, and seven crowns upon his heads."

Luke 14:26
"If any one comes to me and does not hate his own father and mother and wife
and children and brothers and sisters, yes, and even his own life, he cannot
be my disciple." -

If god can prevent evil, but doesn't, then He isn't all-loving.
If god intends to prevent evil, but cannot, then He isn't omnipotent.
If god both intends to prevent evil and is capable of doing so, then how can
evil exist?

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

The basic intent of my post was..... If you listen to it (and listen only, no interfering with those signals..) and keep it to yourself, I see no problem with listening to anything. The problem comes when that information listened to is used. Simply put... have a scanner capable of cell-phone reception?? SHUT UP and enjoy the damned thing, don't tell anyone about it!!!

You're right, that is strange. A defect in the circuitry for those frequencies would almost certainly affect the police frequencies also. Have you tried resetting the scanner (watch out - will erase all memories also)? Check your antenna and antenna connector also (especially if you were moving the scanner around at that time). Beyond that, I have no idea what to suggest.

You're looking too closely at race alone - minorities within the military include women, those of different ethnic backgrounds, those of different nationalities, and so on (with black males the largest minority group). A recent Stars and Stripes article showed the breakdown of active duty personnel by race, sex, nationality, ethnic background, rank, and so on. One of the key pronouncements of that article was that minorities were then the majority within the Army and quickly becoming so in the other branches (with charts showing past, present, and future growth of minorities with intersecting points where that had or was projected to change in each branch). After the first sentence, I focused on blacks and whites alone because that seemed to be what he was most interested in.

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having
to do with the Persian Gulf. In addition, I headed a 1991 Army

investigation into how the
Iraqis would fight a war against the United States; the classified
version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came
about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try
to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian
border. The Kurdish
civilians who died had the misfortune to be caught up in that
exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United
States Defense Intelligence
Agency investigated and produced a classified report, which it
circulated within the
intelligence community on a need-to-know basis. That study asserted
that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the
battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been
killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use.
The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have
possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily,
as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article
in The New Yorker last
March did not make reference to the Defense Intelligence Agency report
or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is
brought up, there is
usually speculation, with no proof, that it was skewed out of American
political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He
has much to answer for in
the area of human rights abuses. But accusing him of gassing his own
people at Halabja as an
act of genocide is not correct, because as far as the information we
have goes, all of the
cases where gas was used involved battles. These were tragedies of
war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having
to do with the Persian Gulf. In addition, I headed a 1991 Army

investigation into how the
Iraqis would fight a war against the United States; the classified
version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came
about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try
to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian
border. The Kurdish
civilians who died had the misfortune to be caught up in that
exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United
States Defense Intelligence
Agency investigated and produced a classified report, which it
circulated within the
intelligence community on a need-to-know basis. That study asserted
that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the
battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been
killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use.
The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have
possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily,
as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article
in The New Yorker last
March did not make reference to the Defense Intelligence Agency report
or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is
brought up, there is
usually speculation, with no proof, that it was skewed out of American
political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He
has much to answer for in
the area of human rights abuses. But accusing him of gassing his own
people at Halabja as an
act of genocide is not correct, because as far as the information we
have goes, all of the
cases where gas was used involved battles. These were tragedies of
war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

battle between Iraqis and Iranians. Iraq used chemical weapons to try
to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian
border. The Kurdish
civilians who died had the misfortune to be caught up in that
exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United
States Defense Intelligence
Agency investigated and produced a classified report, which it
circulated within the
intelligence community on a need-to-know basis. That study asserted
that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the
battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been
killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use.
The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have
possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily,
as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article
in The New Yorker last
March did not make reference to the Defense Intelligence Agency report
or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is
brought up, there is
usually speculation, with no proof, that it was skewed out of American
political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He
has much to answer for in
the area of human rights abuses. But accusing him of gassing his own
people at Halabja as an
act of genocide is not correct, because as far as the information we
have goes, all of the
cases where gas was used involved battles. These were tragedies of
war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

January 31, 2003
A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having
to do with the Persian Gulf. In addition, I headed a 1991 Army

investigation into how the
Iraqis would fight a war against the United States; the classified
version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came
about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try
to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian
border. The Kurdish
civilians who died had the misfortune to be caught up in that
exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United
States Defense Intelligence
Agency investigated and produced a classified report, which it
circulated within the
intelligence community on a need-to-know basis. That study asserted
that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the
battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been
killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use.
The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have
possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily,
as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article
in The New Yorker last
March did not make reference to the Defense Intelligence Agency report
or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is
brought up, there is
usually speculation, with no proof, that it was skewed out of American
political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He
has much to answer for in
the area of human rights abuses. But accusing him of gassing his own

Nonetheless, extracting women that are not minority group members
themselves, the percentage of Blacks, Latinos and other minorities exceeds
the incidence of these groups in the general population. In other words,
theya re overrepresented.

Women are not a minority. They are a majority of the U-S population.

Can't say that I blame him. 94.3% of messages in last week had nothing to do with scanners. Why waste the time to download a couple hundred of messages just to have them go to the bit bucket instead of reading them?

I think I'll join him and forget about this group also.

Bush Sr banned television from showing flag draped coffins, and later Clinton continued the ban. Apparently Bush Junior is continuing the ban as well.

Do a google search on keywords: bush clinton banned coffins tv (or) television for verification of this ban.

Yes, the black at central command giving the press conferences is the only black I have seen on television in a military outfit during this war. With 40,000 illegal aliens in our military in a deal to get free citizenship into our country as a reward, thanks to the bill Bush signed allowing for this deal, you think you would see some of them in this war too. Where are they hiding them?

Thanks much for this link! I suggest everyone copy these pictures while these are still up. All the sources and websites that I found pictures from before have since been shut down. Save them to your hard drive or CD rom while you can, and email them to everyone you can. Bush can try to stop you from seeing the truth, but until he shuts down the internet, we can make sure as many people get to see what the rest of the world is seeing on their tv sets everyday in all the other countries.

I am so tired of hearing the US networks trying to show some clips from other international networks have to always say that they edited out certain pictures as they are too graphic to be shown on American television. Why is it that the "Most Free Country in the World" doesn't have the freedom to show video that is being shown on television in every other country of the world?

Tired of the censorship, propaganda and lies.

Thanks for posting this link. Pictures of the war Bush doesn't want anyone to see.

Forget about trying to argue about the ACTUAL percentages. Look at the
TELEVISED percentages.

Before the PUBLICLY announced war started: 98% Black military
After the PUBLICLY announced start of the war: 100% White military

Hey, some real nice pictures of the war that are censored and not allowed to be shown on US media.

Thanks for the link!

What a maroon. You back? Looking at pictures from 1988 that had NOTHING to
do with what's happening NOW?

(Don't look for those "links" to be up for long...)

First he says you can't believe anything reported on television,
then he say get the facts from television. Johnnyboy picks and
chooses what agrees with his argument and then presents it as fact
while everything else is false. This guy is a real piece of work.
Wonder how much Saddam pays him?

The events unfolding today have to really upset you!

WMD are discovered and shown on TV, the Iraqi people are rising up, Saddam is falling down...

Ain't life a bitc&...

May the fleas of Saddams moustache infest your tent.

You have quoted things not only out of context, but changed the wording as well.

But! you already knew that and are either a troll, or are too stupid to read the actual text.

My guess is that you have found this listed on one of the "God is dead sites" and quoted it verbatim with no investigation on your part.

Mores the pity...

Oh really? Then why didn't Iraq USE them on us?????????

Trust logic! If they had any chemical weapons, they would have used them.
What would they be saving them for? THINK! If any chemical weapons are
"found" they will be planted first.

Just try and come up with some sort of LOGICAL explanation as to why they didn't
USE any chemical weapons if they had any.

Plus this story is too new! If you haven't learned by now, this is what
happens. The US media announces something, then later it is proven false.
How many times a day over how many weeks until you figure this out?

Does it really matter what context "eating shit and drinking piss" came from?
Or Jesus telling us to HATE our family? What part of the rest could possible
change the meaning of these quotes? Perhaps something like:
John 3:876.2: "Oh, sorry, I was only kidding about that last part."

Perhaps all those quotes about needing to worship God, or follow Jesus were "out
of context" too.

The next time YOU try to quote anything from the Bible to help YOUR statements,
then we shall accept them as being not what they say either, because you took
them "out of context" and changed the wording!

For the record, THE WORDING WAS NOT CHANGED!! Go to the bookstore and pick up
a few Bibles to see that each Bible by each publishing company is worded
different. The part about DRINKING PISS was changed in some versions, because
they found the original text "offensive" Imagine, the word of God offensive!

> My guess is that you have found this listed on one of the "God is dead
> sites" and quoted it verbatim with no investigation on your part.

While you "guessed" that, now we all KNOW that you have never READ the bible or
bothered to look up the quotes to see they are indeed accurate.

John, go find a girl friend or boy friend(according to your sexual
preference) and leave the big kids alone...

You are rapidly becoming a petulant child and an annoying pest.

Just as much "freewill" as a slave had to disobey his master. You can call it "freewill" if that makes you feel better about life, but if certain "choices" result in punishment, then you really don't have any freewill at all.

"Hey niggah! Pick that cotton NOW! You have the freewill NOT to, and take my whip instead. Make your freewill choice!"

And when YOU try to show them quotes in the bible they don't like, then they claim you took them "out of context"!

There really is no way to take out of context the part about eating shit and drinking piss, or Jesus telling you to hate your parents and family, unless somewhere later in the bible it says: "Only kidding!" Which it doesn't.

I will remember that the next time someone cries "murder" over an abortion. That is NOT a child or a baby, it is just DUST!

If you want to see REAL murder, take a look at what born again Christian Bush is doing to REAL children and adults in Iraq! That Dust is bleeding and losing their arms and legs.

LOOK at them here:
http://www.robert-fisk.com/iraqwarvictims_mar2003.htm

Your Christian leader Bush doesn't want you to see these photos, but everyone else in the rest of the world has seen them, it is time you took a look.

Why worry, the bible says you will return to the dust of the earth.
That's it, no afterlife in the upper atmosphere with the clouds and other
dead people with big white wings playing harps.

How come when you are in an airplane, you don't see any of these angels or
harps in or above the clouds?

Such bullshit. Then when he says Thou Shalt not Kill. He means you should
just not kill Him. Don't let the word KILL hang you up either.

You are changing the subject to something about loving him, when it does not say
that, YOU say that, and then you forget that even loving him does not change the
DIRECT ORDER from him to HATE our parents!

UP TO 7,000 KILLED INSTANTLY

Experts estimate that between 5,000 and 7,000 residents were killed immediately while tens of thousands more were exposed over the years by drinking contaminated water or eating contaminated food. A photograph of a man shielding an infant with his body -- both were killed by the gas -- has become an icon of Kurdish suffering and a monument here.

Halabja, a city some 150 miles northeast of Baghdad in the southern part of so-called Iraqi Kurdistan, is situated at the foot of mountains that separate Iraq from Iran. It is below the 36th parallel and thus outside the protected area of the American and British fighter-patrolled U.N. "no-fly" zone established after the Gulf War.

Halabja was once a vibrant market town of 80,000. Today, the population has dwindled to about 43,000. Doctors say residents suffer from a range of cancers, respiratory disorders such as asthma and pulmonary fibrosis, skin rashes, birth defects, Down syndrome, infertility and mental health problems.

Christine Gosden, head of Medical Genetics at Liverpool University in northwest England, is one of the few scientists to research the aftermath of the 1988 attack. She estimates that more than half the population suffers from respiratory problems and that major chromosomal disorders such as cleft palates and spina bifida appear in three times the number of people than in the nearby city of Sulaymaniyah, 10 times the size of Halabja.

Karem and Gosden co-wrote a 1998 study of the aftereffects of the Halabja incident. It showed that the situation gets worse each year as the chemicals alter a victim's DNA.

The Kurdish physician pointed out that in April, there were four stillborn and four anencephalic (born without most of the brain) babies out of 108 deliveries. "Even two years ago, it was not like this," he said.

The report also showed that the gas attack had a profound psychological effect in a city that lacks even a single mental health worker.

Depression and anxiety are common, and the rates of suicide are higher than average. It is not uncommon for some people to feel the need to keep a suitcase packed in case of another gas attack.

In 1999, Karem asked the World Health Organization to do an environmental study but was told the subject was too "sensitive." Although the Kurds run the local government, U.N. agencies are here by invitation of the Iraqi government, and such research could alienate their hosts.

Although new and clean, Halabja Martyrs Hospital lacks basic equipment such as surgical gloves and antibiotics, let alone chemotherapy to treat cancer or equipment to transplant a diseased lung. As a result, victims like Mohammed, now 84, receive no treatment and die slowly at home.

Mohammed, however, will not die in peace. He has a new worry -- another chemical attack by Iraqi planes if the United States opts to take out Hussein militarily. It's a fear that is not uncommon in Halabja.

"People here have a phobia for Saddam Hussein," said Karem. "And they have a phobia for the future."

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?
Stephen C. Pelletiere is author of "Iraq and the International Oil
System: Why America Went to
War in the Persian Gulf."

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an

Yep, I tried resetting it and it cleared everything out with no
problems. But still same problem. I've tried another antenna and that
didn't work. I am going to let a good griend of mine look at it who is
an electronics guru. Will keep everyone posted on what he finds with
it.

Chris

johnny...and logic...in the same sentence...

illogical...

Why didn't they use them?

BECAUSE SADDAM'S "ELITE" REPUBLICAN GUARDS WERE TOO BUSY RUNNING!!!

Iraqi EPWs pointed US troops to the cache. Look - these guys aren't THAT stupid - give them a LITTLE credit. Even THEY know that using that crap would be a REAL bad idea. Saddam might force them to serve in his military, but, especially NOW, they won't follow orders like THAT.

Just for once, johnny, TRY to use your head.

Oh, what's the use...

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

To johnny, truth is irrelevant. It means whatever he wants it to mean at any
given moment.

A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must
show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian
Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why
are we picking on Iraq
on human rights grounds, particularly when there are so many other
repressive regimes
Washington supports?

> nor have you read or understood many other passages in scripture that deal
> with the same issue.

No, it is more that I understand them better than you do, mostly because you have never read the book from front to back in the first place! That was obvious when you wanted to know where the bible ever mentioned the earth had four corners when it is mentioned in that book more than once.

> Again, I cant help you if you cant understand things
> that are spiritualy discerned. Call it a cop out

You don't "spiritually discern" science, laws, or any documents that are to be taken seriously.

> > This AGAIN does not answer why Jesus made the statement to hate our
> parents,
> > children, etc. It is just an attempt to twist the subject to something
> else.
> > The bible tells us what Jesus said. It is a horrible statement no matter
> how
> > you try and "interpret" it. Can you admit that?
>
> Absolutely not.

And that is your problem. Until you can, you can not tell others anything about this topic as you are unable to accept what it says, and instead are changing parts you don't like, in the way that YOU decide they should be.

> Let me ask you something. Pick your best subject....whatever it may be.
> Lets say for the sake of giving me something, you said that your most
> understood topic in the whole world was Botany. You are an expert in the
> field (no pun intended). Now of all you know about Botany, what percentage

> of what is knowable in the universe do you know? Perhaps some microscopic
> fraction?
> So then is seems quite unresonable to suggest that you have everything all

> figured out with respect to the Bible for one,

The Bible is hardly comparable to either of your other two examples. Here, this would be a BETTER and more REALISTIC analogy:

Let's say that someone claims to be an expert of "Twas the Night Before Christmas" and read the book several times. If he tells you that Santa came down a chimney, you can't argue that this is taken out of text, and that Santa really came through the front door. Knowing the story of Santa is no harder than knowing the story about Jesus.

Santa said "Merry Christmas" and Jesus said "Hate your mother and father"

Deal with it.

> and certainly our ultimate
> purpose on earth. Were you here when it started?

When what started? The universe did not start. The universe is not a container, it is existence.

> Are you eternal as to know
> that the universe has always been?

One only needs to THINK and realize that the universe can NOT have a beginning, to come to the only left conclusion that it therefore has always existed. So Simple.

> If the universe has always been, and
> always will be, how do you explain entropy? The fact that everything is in a
> state of decay?

What does one topic have to do with the other? Nothing. The universe is not an object that can decay, nor does anything that decays have anything to do with the fact that the universe (existence) did not have a beginning.

> > > Just like any other book, information must be taken in context and
> > > with whatever else is written about the subject. Read the rest of the
> > > commentary by Jesus in the above mentioned verses....
> >
> > As if I could say that "your mother is a whore" or "everyone should kill

> > parents" and then say something elsewhere that could make this "out of
> context"
> > statement that I made to mean anything different than what I said.
>
> Again, it is like you are reading a language that you have not learned,

I know the English language well enough to understand what was said. I read the language and COMPREHEND the statements made. YOU take the text and twist it into some other meaning so that it means something that you like much better.

> > From now on, anytime anyone finds fault with any of my statements, I will
> just

> > say that they were taken "out of context"
> >
> > Jesus said a really horrible thing there, and nothing else can possibly
> change

>
> See statement above, and yes. He is my Lord and Savior, He is Lord, and will
> be back to explain it all to you with the wrath of God behind Him.

More threats from your "all loving" god. Don't you understand that the whole threats and fear thing are what gets weak minded people to follow this cult to begin with? Even with Santa, you get the threat of no presents if you don't do as his religion says. Why else would children with weak intelligence follow the orders of Santa or Jesus?

> > > previous message, and see the answer to your question. If you cannot

> I suppose that you are an empath then? If you think the rest of the world
> has the same thought proccess that you do, you are sadly mistaken. Equally
> as mistaken if you think that yours is the only logical answer....

It is a FACT that one of the following statements MUST be true:

1) There is no god.
2) God is evil.

We know just by using our eyes ears and brain and OBSERVING the world around us that no god fitting the Christian mythology exists. That is just pure fact that anyone can see right now.

> just
> because it seems so to you. There is very little about anything you are
> saying here that seems logical to me.

Then here is something else you won't be able to comprehend or understand:

Two plus two equals four.

> > I know where you can find EXACT PROOF that God does not exist, but only
> those

> experienced.

That is the whole point. Yet you are the one talking about gods and jesus in a
way contradicting your own statement here. :)

> > Does that sound ridiculous to you? Replace the words "Santa" with
> either
> > "God" or "Jesus" and try and understand how ridiculous it looks to the

> Thats right.....just like the scripture says, the wisdom of God is
> foolishness to men. Check this out....and try to let it sink in:
>
> 1 Corinthians 1:18-21 For the preaching of the cross is to them that perish

You took all of this out of context. (see, two can play at that game) Plus
you forgot to INTERPRET it first, and change the meaning so that it ends up like
this:

"And he that believeth in gods is a complete fool and moron."

> > > Where exactly does the Bible say that the world is flat with four
> corners? I
> > > have not seen, or otherwise do not remember reading that.
> >
> > I know. You never read the Bible all the way through like us Atheists

> contradict
> > observed reality of the world we live in.
>
> Whew....there you go again. Guess you have a hidden camera in my house
> since you know all about me.

You stated you have not seen or otherwise remember reading that in the bible,
even though it occurs more than once. No hidden camera is needed to now
conclude you have not even read the book you like to choose certain quotes out
of, and therefore are taking them out of context from the whole story.

> Did it show you that I do not attend an
> organized church? Did you see me in my study EVERY morning at 5:30 am
> reading scripture? I have indeed read the Bible more than 20 times over.

So either you are full of shit NOW with this statement, or you were full of shit
BEFORE when you said you don't remember any part about the earth having four
corners. Which is it? BOTH statements you made can not be true. You are a
liar in one of them, and now have just lost all your credibility in this
debate! :)

I only had to read the bible the first time to remember the parts about the earth being flat and having four corners. MOST people who read this don't forget it! How can anyone just read past that and not jump out of their seat and say "what the hell is THIS bullshit?!"

> > "After this I saw four angels standing at the four corners of the earth. .
> ."
> > --Revelation 7:1
>
> And from this you assume that the passage is saying that the world is flat?

Read the whole book. From a mountain top, you can see the entire world. This can only happen if the world is flat. In our REAL world, you can't see the entire world from a mountain top. Of course back in the stone age when this book was written, they didn't know the world was not flat yet. But one would think the god that created the world would know this, wouldn't you? Thus we know by PROOF that the book was written by primitive man, and not any god! PROOF!

> John 1:1-5 In the beginning was the Word, and the Word was with God, and
> the Word was God.

Where did God come from? Did he just appear from random occurrences or by accident? Did he evolve from Apes? If you go under the FALSE theory that there was a beginning, then you have to go back even farther to the beginning of God when he came into being.

Funny how you have no problem accepting that God always was, yet find it so hard to comprehend that the universe (existence) always was. God had to be in some sort of universe or existence in order to create a world.

> The same was in the beginning with God. All things were
> made by him; and without him was not any thing made that was made.

So then he made his parents??? We know by the book, that Man is in the exact image of God. Therefore, God has a penis, reproductive organs and everything man has. Thus he came from parents just like the rest of us did. In reality, man created God in his own image. Before any planets and gravity were created, he would not have any use for his legs.

> > like to be fantasy? How do you make that determination? See your
> > problem? You admitted it is all dreams and fantasy, now you can't take
> any of
> > the rest of the book as fact or history. You lost the debate.
>
> I lost nothing,

You sure have. You say you read the bible 20 times, you also said you don't remember any part about the world being flat and having four corners. You have been caught in a LIE.

> and you have absolutely no clue what you are talking about.
> You are the one who has not read the Bible.

Yet I am able to remember that the bible said this several times by memory.

You are a liar again.

> > > I like to dunk
> > > basketballs in my dreams, and I could not be further from doing that in
> real
> > > life. The Bible is literal in places, figurative or allegorical in
> others.
> >
> > And somehow, you are able to know which is which. God perhaps spoke to
> you and
> > no one else in the world for some reason? We both know you have never
> been
> > spoken to by God, have never seen God, and that you are trying to find a
> way to
> > justify why most of the Bible contains things so ridiculous that even you
> have
> > to admit they are just fantasy and dreams.
>
> Yes for the most part I do know which is which.

Even in your ridiculous reply, you admit you don't know all for sure. Yet, you are able to argue and discuss this with someone who does know as if you are qualified to do so, which you just admitted, in your own statement, that you are not.

> Even if you just studied theology and had others explain it to you.

Aha! That is your problem. You are not studying anything if afterwards you need someone to explain it to you. Instead of having someone brainwash me, I did study and research for myself. YOU can only go by what others have told you, I have observed fact for myself and KNOW.

> And.....no I am not the only one.

We all know that. Or else there would not be any churches anywhere.

> > > In my own experience, and that of many many others, the only way to
> > > understand it is to have been enlightened by God.
> >
> > Yet you have never been enlightened by God, so that makes no sense.
>
> And you know this because.....

What a predictable reply. Since we BOTH know you have never been. You need to be honest with yourself and ADMIT it. If you can't even be honest with your own self and mind, you will never figure anything out.

> > > I am sorry that you do not hear God.
> >
> > So then you believe that it is a true fact. Good. Now why not pray
> real hard
> > to your God to speak to me, and then I can come back here and verify that
> he
> > really does exist and have the power to speak to humans.
> > I'll be waiting to hear from him.
>
> I have no doubt that you do not hear Him.

Aha! Then just like any priest, you know he does not exist.

> You turned Him off long ago.

I have the power to turn off god? See how ridiculous that is. If there was a god, there is no way I could turn him off and not hear him if he WANTED to make himself known. And in the bible he is made out to be the type that is conceited and requires everyone to worship him, not the type that hides himself from everyone.

Before Christians traveled to this side of the planet, none of the Native Americans were told about Jesus and the Christian god either. So they had to live and die without hearing him as well. They must all be in hell now because they were not told about, and therefore unable to, ask Jesus to be saved.

> I
> WILL pray for you. I will also pray that when He starts pouring His wrath upon
> you and all

> of the other unbelievers, that you will then see that He is God and repent.
> AND you WILL hear from him....

Since you seem to know exactly what you god will do, by YOUR command, and all, perhaps you can give me an approximate time frame of when I should expect this to happen?

> Every knee will bow (including yours) and
> every tounge confess that Jesus is Lord to the glory of the Father. Either
> willingly or by fear and trembling.

You describe god the same way Bush describes Saddam. Think about it.

> > > I know of no one who hears an audible
> > > voice. I do not hear one either.
> >
> > There you go. Yet all the fictional characters in the Bible could.
> Doesn't
> > that seem strange?
>
> No, if God wants to communicate to His creation one way at one time in
> history and another way at another....who are we to question it?

We are us, and we are questioning it. If he has spoken to other humans in the past, and gives them some EVIDENCE that he exists so they know there is something to worship, and does not give us that same benefit, then he can not expect us to know about him or what he wants, especially with dozens of books and offshoot religions with contradicting rules and laws. I have read them all, and don't know which ones to follow. I surely am not going to follow ones that YOU tell me too. Why would YOU know any better than the thousands of Christians that contradict YOUR ideas of how he is supposed to be?

If there is a god, and he wants me to know what I am supposed to be doing (or else be punished by him for all of eternity) then perhaps he should take the time to TELL me.

When I take a job, the boss doesn't hide from all his employees and the employees all make up sets of work rules and projects that they should be doing all on their own. The boss makes himself known, and makes the rules very clear to EACH employee. You are not going to start doing things a certain way because some other employee told you that is what you should do, you are going to do what the BOSS told you.

The Big Boss has yet to introduce himself to any of us (including yourself) and tell us what he would like us to do.

Another thing, if the purpose of our whole existence is only to worship and please this god, then that doesn't sound like such a good deal. Our whole lives are only so that we can worship and serve this guy? If that is not SLAVERY, then what is?

Again, the question you NEVER seem to answer...

WITHOUT MAN, WHAT WOULD GOD'S PURPOSE BE?????

Seems like a sick demented sadistic entity that made us just so that he has someone to worship and praise him to boost his ego. (a sin)

> > How could Noah get the exact dimensions to build the Ark with an intuitive
> > thought or feeling? These were exact dimensions and specifications that
> God
> > spoke to him directly. Can you explain how that occurred, yet he has
> no
> > desire to speak to a good dedicated follower of him as you are? I mean,
> we

> do. So

> > why is it he never spoke to YOU? Hmmmmmm?
>
> Uh.....he does. In my heart. I thought I said that already.

That's bullshit. Your heart pumps blood, it does not hear like your EARS do. How come he spoke to Noah and was able to give him EXACT DIMENSIONS to build an ARK with (which did not come through his Heart!) and who come YOU can not hear anything from him too??????

Just admit you don't know or something, don't be an idiot and say stupid shit like he talks to your heart or something even a 5 years old reading would know is bullshit and a cop out from answering the question!

> > > of hard knocks. I once read a thought by some random philosopher that

> in amazement.

Nothing in this statement argues my statement. Next time, it would make you more of a man to admit that it makes sense, rather than the childish statement you came back with.

> If there is no God, what good is right and wrong?

Read the above again, as you obviously did not comprehend it. Do all atheists run around killing and raping and stealing? No? But if they don't believe in or fear god, then why do they know what is right and what is wrong, and why do they behave?

You learn after a while, that if you do certain things, they get positive results, and if you do other things, you get negative results. Punch someone in the face, the results will be very unpleasant to you. Do something nice to someone, and you get pleasant results. After a while, you LEARN that in order to get the pleasant results, you need to do the actions that best get them.

If a priest can lie to people and get rewarded with a collection plate full of money for it, then that is what he will most likely continue to do.

Again, why do you think animals know what is right and what is wrong?

The sad part is, you said: "If there is no God, what good is right and wrong?"

So you are only going to be good just because you think there is a god? If not for God, you would start acting evil?? That is very sad. And scary.
And why would something be right or wrong just because god decides that is the way it is going to be? Not very democratic. The God of your religion is a DICTATOR. People don't like dictators.

> Live it up baby! You
> have nothing to prove to anyone or anything. Nor are you responsible to
> anyone or anything.

I am responsible for myself and those that depend on me. I can't just live it up, I have to do, like every animal, what is required to make life as pleasant and enjoyable as possible. Gorillas don't need a god to make them love and take care of their offspring. They don't need a god to know that stealing a banana from another gorilla is a bad thing and will result in unpleasant results.

> You have no legacy or "life of goodness" to leave to
> anyone, cause they will just be dead anyway. And, after 200 years of
> history, no one will ever really know what happened anyway, whether it did
> or not.

Exactly. One day this planet and our solar system will die just as we OBSERVE others dying and others being born.

> I think you should kill anyone you want, sleep with anyone you want,
> take everyones money you want.....just party it up.

That is some sick and twisted way of "partying it up"!

But what about those Christians that kill in the name of God? Bush is killing thousands of people and even little children and praying to God to guide his troops so they can be successful in their bombing and killing, targeting all those homes with those "laser guided" missiles.

In fact, the countries and rulers that do the most killing, are always the most religious. This must be why you find killing a way to "party it up". I find it very disgusting and couldn't stomach the act of killing someone like that. I don't believe in any gods, or don't need any commandments to know or feel that way either.

> Might as well. There is
> no controling moral authority anyway. Your values are good for you, and mine
> are good for me.

You kill, the results are you get killed, or at least spend the rest of your life in jail. The controlling moral authority will see to it.

> So you wont mind when that prison escapee steps into your
> house and blows you away. Who are you to impose your morality on him?

How ridiculous! What about YOU? You are a god believer, so what if someone escapes from prison and comes to your house and kills you? What does that have to do with anything? Perhaps if there was a good god, there would be no death and no one could come and kill either of us. Perhaps no parents would ever DIE and leave their poor young children crying and arm less like those in Iraq.
http://www.robert-fisk.com/iraqwarvictims_mar2003.htm (see photos)

> If he
> wants to blow you away thats his perogative. We cant send him to jail
> either, after all he thinks its ok to kill people.

Bush is not going to jail for all his killing, is he? Since he knows he can never be punished, as the US does not recognize the world court and can not be held on war crimes, he is not afraid to kill and murder. He apparently does not believe in God either, or he would be very afraid of that God right now, wouldn't he be?

The fear of God did not stop Bush from murdering, and there are no laws or police to punish him for murders, and we see what that results in..... Him going on a murder spree.

> So your goodness then gets you what? A longer wait to be fertilizer?

All your goodness does, is makes life a bit more pleasant to go through. If you treat everyone like shit, then your life is not going to be very pleasant. If you think about it, most people are only being good out of the selfish desire to live through a more pleasant life. Then there are those that are only good so that they will have a more pleasant afterlife that they will never get.

> Oh
> boy, where do I sign up. Thats what I want, who can delay the fertilization
> of the planet the longest. That would be a life not worth living......what a
> horible way to live....thinking that when you die there will be eternal
> nothingness.....

That is a fact. A fact you can see when your parents get Alzheimer's and completely lost their minds and sole to the point they don't even know who you are. When the brain rots away or gets damaged, it is no different that when your computer processors gets bad. If your computer is left outside to rot and rust away, the programs that were in it do not float into heaven and operate outside of the computer. Your program can not operate outside of your brain either. When it gets damage or rots away, so does your "sole"

You can see this fact just by knowing someone when their brain gets injured or starts deteriorating. A good church going person suddenly kicks and pulls the hair out of the nurse trying to bathe that person! The person never would have done this before. They don't even know who you or god is anymore. Yet you want us to believe that when they finally die, their brain grows back together and they are their normal selves again and exist in heaven. If anything, they

are in heaven as the walking hair pulling zombies they were during their last few years on earth. Or perhaps god sent them to hell for this behavior due to brain damage.

If the soul could exist outside the body, then it could exist in the body during Alzheimer's too!

> .I really feel sorry for you.

Why, for knowing more than you do?

> > When you first try to feed a bird or squirrel some food, it feels very
> guilty to
> > take the food from you because of learned conditions. Once you finally

> > me, then went over and started to eat the food. It felt guilty to eat
> the
> > food without my approval because it though it would have been stealing the
> food
> > behind my back.
>
> Boy, you are giving that squirrel alot of credit.

You need to observe things more and do more research. Man has communicated with gorillas via learned sign language and discussed all sorts of things like feelings of guilt, love and sorrow. Humans are not the exclusive animal with knowledge and feelings. This is proven fact. How come I have to debate only using things I know are proven facts, and you get to debate using the bible and fantasy that you can change and make up as you go along?

> > I have seen and experienced many situations of guilt in many types of
> animals as
> > well as just about every other type of feeling we have. Gorillas that

> out,
> > that find out that certain things they have been told do not make any
> sense with
> > observed reality and don't fit the big puzzle.
>
> Your mind is no more open than mine is.

If it wasn't, I would still be believing in god too. I was brought up and brainwashed into the same teachings you were. But when I grew up and started to seek answers to questions that didn't ever make any sense, I was able to find the answers. You have not even begun to look. You are happy with believing what you have been told by others.

Did you ever stop to think that if for some reason, you were stolen from the hospital and brought up by parents in China, you might not believe in Jesus at all, but would be worshiping Buddha? Perhaps some god in India?

Why do black people in the USA worship Jesus when their ancestors from Africa did not? Because of the society they live in now, they worship the white man's gods and religion because that is all they have been taught.

I find it stupid to believe in a Christian religion just because of what geographical location I am born in. I looked at all the religions to find the best one, then found all of them to be bullshit and contradict observed reality.

> I am really exited about figuring
> out that the big puzzle is completely meaningless.

Animals don't seem to have to even worry about this, yet are able to live their lives just fine. A fly can exist and live without having to worry about an afterlife too.

> I am particularly looking
> forward to teaching my son that other than the good stuff he does for people
> that no one will remember, his life will be over and thats it.

That is a fact that we can observe, and something you can not disprove.

> And we wonder
> why kids want to kill themselves so often these days? WOW.

Usually the ones that do, were brought up by strict religious teachings. Look into it. I did that research a few decades ago.

> > > I write for the benefit of
> > > others. All I can tell you is 10 years ago I was searching for answers.
> It
> > > was very obvious to me that the world was not here by mistake.
> >
> > But somehow God was just here by mistake? Why is it you are able to
> accept
> > that?
>
> Because I am not arrogant enough to think that I must understand every
> concept in order for it to be so.

Until you understand a concept, you are only going by what you have been told and taking it on blind faith. That will lead you into problems if you do that enough.

The problem here is this. I bothered to figure out these concepts and confirm them with observed reality. You choose not to bother yourself with logic or reasoning behind things, you will just think as you have been told. THEN, you have the ARROGANCE to argue and debate things that you admit you don't understand.

This last statement, to everyone reading this, shows you are not qualified to continue in this debate. At least if you were coming back with intelligent questions, but you state you don't know the answers and have the arrogance to argue my facts.

> > > That who or
> > > whatever was responsible is so much wiser and more powerful than I am.
> >
> > So then too, wouldn't there have to be someone so much wiser and powerful
> than
> > God to have created God?
> >
> > Don't you see the problem with your reasoning?
>
> No, I can see the distinct possibility that I only understand a small
> fraction of what I see touch and feel.

Then the debate is over. You are not qualified to debate something you only understand a small fraction of.
How people like you can enter into a debate without knowing what you are talking about never ceases to amaze me.

> Does an ant have any idea of the big picture and what is really happening
> when the Car rolls over him in the driveway? In the vast universe you live

> in, do you really think you understand much more than the ant does?

Look, just comparing me with two HUMANS will give different results. I may know more than one person, and not as much as another on something. I don't know what ant you are referring to. Compare an average ant to a retarded human. The ant would have more intelligence.

> I suggest to you that God is higher above you than you are above the ant.

Arrogance. Many animals have higher intelligence than a lot of humans. I have witness English conversations between people and BIRDS. Yet there are thousands of humans that do nothing but bang their heads against the wall and are unable to communicate with anyone.

Just as many children end up being more intelligent and much smarter than their parents, why can't you even entertain the idea that if there was a god, perhaps one of his children (humans) could become more intelligent that he is? Having the power (physical force) or supernatural abilities has nothing to do with intelligence either. He chose not to give us those powers, so we are handicapped in that aspect, but not in ability to think and reason.

> If that is the case, do you really think you can understand anything fully
> without God's help?

Look, there is no God, yet we are able to understand things. So are animals, and they don't go to church every week to burn candles and incense in some dark lit cult with a dead man hanging on a cross with nails through his wrists either. (not appropriate for little children to be brought to see, by the way. Because of the graphic content, one should be at least 18 before being allowed to go to a church and see that.)

> > > Even

> may
> > occur.
>
> The Bible is not about santa, nor are all of the thousands of manuscripts
> of evidence suporting it.

Everything contradicts it, no support. Even the shroud of Turin is fake, and proven so. We find the tomb and body of Egyptian kings that lived well before

your Jesus character, yet someone as important as him has no burial site that we can find. Nor does one single character in the bible. Nor does Santa.

> Santa was and is a pagan secular substitute for
> true worship of God, as is Easter. The two are not even slightly similar.

They are almost exact clones. Santa and God/Jesus were made up to keep children good and to make them "obey thy mother and father" Punishments are put in the stories for bad behavior, and rewards are promised for good behavior. Both can see you when you are sleeping or awake and both know if you have been bad or good. Both are connected with December 25th. Both have hard to believe wacky magic like making reindeer fly, or walking on water. Again, both were stories created for CHILDREN.

> > > I understand that you find the whole concept of God nonsense. It is
> not

>
> It is not that I dont want to accept it, its that something inside tells me
> that death wont be the end. I have no trouble at all with death. I am
> actually kind of looking forward to it.

So am I.

> How will you feel about it as you
> draw your last breath knowing that you are done forever?

I will be sooo happy that I don't have to work anymore, ever feel pain ever again, never have to see anymore of the horrors and tragedies on this planet, don't have to fill out my taxes every year, never have to go to the dentist or doctor anymore, have any laws take away anymore of my freedoms, etc., etc., etc. Why do you think most old people lying on their death bed say they have done everything, seen everything and have lived on this world enough. They just want to go to sleep and die. They say this with a smile on their face. I never understood it as a child, but the older I get, the more and more I understand it. Soon I will be ready to lie down and just go myself. I am very close.

> You can rest easy
> though. You are eternal, and you still have time to make that eternity
> pleasant.

Having to live for eternity would be a PUNISHMENT!

> > Think about the Alzheimer's patient that doesn't know or remember one

> again?
>
> Lets see, it should make sense to you that if God can create someone from
> dirt.....he can make your old body new again.

Not only does that not make sense that someone can be created from dirt (especially when we know for fact how people are created, and can prove it) but it doesn't make any sense that God would destroy their minds and make them as raving lunatics that go around pulling the hair our of nurses when they were quite peaceful people before the brain got old and sick, and then fix it again later after they are dead and don't need the brain anymore.

> > Try reading this carefully and see if you can understand how the human

> > machine which never came into
> > being and will never end.
>
> Wow, that makes alot of sense now doesnt it?

It sure does, why not read it again until you get it? Every single though that goes through your mind is a direct result of what? Even TRY to prove otherwise.

> Science has not proven anything.

False statement.

> They cant even follow their own rules with
> regard to anything of importance. You have faith in nothing, and I have
> faith in God.

I have faith in observed reality, and things that do not contradict observed reality. Ghosts and tooth fairies contradict observed reality, so does the theory of any gods.

I don't have faith in something just because someone tells me something, no matter how many scientific degrees he or she may have. If it doesn't make sense in my own mind and fit with observed reality, then it is bullshit.

Any theory in the world can just be thought about, and can be proven true or false just by testing the theory against observed reality. God contradicts observed reality, Flying reindeer do, and so does the Big Bang Theory. All bullshit fantasy.

> Since you have nothing to look forward to anyway....why not try to believe
> God? You have absolutely nothing to loose.

For the same reason you don't believe in Santa Clause. You would have nothing to lose either, but you can't really believe in something you know is not real, can you? You are asking me to lie to my own mind just to satisfy YOUR religious beliefs.

> > > I think most people believe

> > evil of life will be gone as soon as you die? That is not so horrible.
> It
> > is scary if you have dependents and you worry for them, but for yourself
> there
> > is nothing to fear. Eternal sleep with no work, no pain, no grief, no
> > nothing.
>
> Again.....why live then?

Because your parents made that choice for you, that's why. If I were given the choice, I would have chosen NOT to live and NOT to exist at all. If you mean why continue living, I have people that are dependent on me and require my financial assistance, which requires me to stay alive and work. I am living for their sake. If it was just me, I would have no reason to keep working everyday so that Bush could send a big chunk of my earnings to 140 foreign countries every year and to make his palaces more elegant. (all three or four of them)

> And how will it impede you to believe in God? If I
> am right you will be all set.....If I am wrong you have lost
> nothing.....because you bet nothing.

EIther way I don't lose as it is. If I am right, no life after death. If you are right, God exists, knows every thought in my head, and is able to read my mind and know that there is no way for me to believe in him from the intelligence I have gained, and it is not a matter of disbelieving out of just not wanting to acknowledge his existence. Now. Either after he realizes my thoughts, the following occurs....

If he is a good and fair god, he will be embarrassed that he did not make his existence more obvious to me, and most certainly will not punish me or send me to hell for his mistake.

If he is a bad god, he would punish me either way, if I believed in him or not, and will punish you too.

So, no matter if I believe in god or not, the results will be the same and out of my control. This is a FACT.

> and smell the coffee.

No, he is angry and says so. He has such a violent temper, that some times
after he murders people, like in the great flood, he admits it was WRONG and BAD
and promises not to ever do it again. Then from observed reality during just
our lifetimes, we see he does do it again and murders more people via floods.

> They worship Him as God for a while...everything is
> fine....then they drift away to do their own thing again, He smacks them
> around and they come back.

So you admit he did not give us free will and the freedom to do as we want, we
must only serve and worship him our entire existence, or be brutally
punished. Slavery has NOT been abolished, has it?

> He is still doing that today. God is good way
> beyond measure, merciful beyond measure and has forgiven me way more than I
> deserve.

Punishing those that do not worship and serve him like some conceited dictator
is NOT the same as being "merciful" or "forgiving".

> If that makes me sadistic in your eyes....so be it.

In the eyes of anyone who thinks about it.

> This has all been very entertaining, and for some im sure very irritating.

Irritating that at the end you ALWAYS ignore the best question of them all.

WITHOUT MAN, WHAT WOULD GOD'S PURPOSE BE?????

If your god existed, he would need us a hell of a lot more than we would need him.

This realization alone, shows why religion or gods are in societies and why they are not reality.

Before you fall to sleep tonight, ask yourself this question and THINK about an answer to it...

WITHOUT MAN, WHAT WOULD GOD'S PURPOSE BE????

Oh i get it - this newsgroup is supposed to be about scanners, just like the war was supposed to be about WMD, then it became ousting Sadaam, then it became "liberating the people of iraq", then it became about "stabilizing the region".

Don't ya hate that !!!!!!!!

I have some GE Delta 110W VHF High band radios - $20 each... but they are untested.
You can get crystals from West Crystal roughly $22 for the pair of TX and RX crystals (they are in Canada and the exchange rate works in our benifit) - there are no chanel elements to tune - the crystals plug right into the radio. If you dont want to run 110W, you can trun down the power and reduce the heat produced.

I just received the crystals from West so I can use one of these for APRS also....

Let me know if interested and I'll calculate shipping.

I see a whole lotta ad hominem here, and precious little refutation -- a tactic which is usually diversionary. It is also, in point of fact, a classic Rush-ism: if you don't have an answer start slagging the author, the publication, the source, blah blah blah. Anyone who needs a refresher can find any or all of these suffused throughout this thread or try conversing with a Dittohead.

So fine, if Hersh's credibility is a stumbling block for you, let's take it off the table by sticking to only those facts that are a matter of record and that don't rely on Hersh's unnamed sources:

September 24th:
Tony Blair's government made public a dossier containing much of the information that the Senate committee was being given in secretï¿½that Iraq had sought to buy "significant quantities of uranium" from an unnamed African country, "despite having no active civil nuclear power programme that could require it."

Sept 26th:
Colin Powell... cited Iraq's attempt to obtain uranium from Niger as evidence of its persistent nuclear ambitions.

December 19th:
Washington... publicly identified Niger as the alleged seller of the nuclear materials, in a State Department position paper that rhetorically asked, "Why is the Iraqi regime hiding their uranium procurement?"

January 28th:
President Bush cited the uranium deal, along with the aluminum tubes, in his State of the Union Message, while crediting Britain as the source of the information: "The British government has learned that Saddam Hussein recently sought significant quantities of uranium from Africa." He commented, "Saddam Hussein has not credibly explained these activities. He clearly has much to hide."

March 7th:
Mohamed ElBaradei... told the U.N. Security Council that the documents involving the Niger-Iraq uranium sale were fakes. "The I.A.E.A. has concluded, with the concurrence of outside experts, that these documents . . . are in fact not authentic," ElBaradei said.

ElBaradei's disclosure has not been disputed by any government or intelligence official in Washington or London.

The I.A.E.A. had first sought the documents last fall, shortly after the British government released its dossier. After months of pleading by the I.A.E.A., the United States turned them over to Jacques Baute, who is the director of the agency's Iraq Nuclear Verification Office.

It took Baute's team only a few hours to determine that the documents were fake. The agency had been given about a half-dozen letters and other communications between officials in Niger and Iraq, many of them written on letterheads of the Niger government. The problems were glaring. One letter, dated October 10, 2000, was signed with the name of Allele Habibou, a Niger Minister of Foreign Affairs and Coï¿½peration, who had been out of office since 1989.

March 9th:
Colin Powell, asked about the forgery during a television interview two days after ElBaradei's report, dismissed the subject by saying, "If that issue is resolved, that issue is resolved."

Asked to respond, [C.I.A. spokesman William] Harlow, said that the agency had not obtained the actual documents until early this year, after the President's State of the Union speech and after the congressional briefings, and therefore had been unable to evaluate them in a timely manner.

---end quote

Short version: the British, Powell and President Bush drew on faked documents when making certain public statements about one of Iraq's WMD programs. In Powell's case the faked material was cited during an appearance before congress; the president appears to have relied on this faked material in making an allegation about an Iraqi WMD program during the State of the Union address.

Moreover, the documents don't appear to have been very good fakes, as it took the IAEA only a short time to conclude they weren't authentic. It also appears to have taken an inordinately long time to get the documents from the US.

After the forgery had been discovered, Secretary Powell blew off a question about it, which, quite apart from the cavalier attitude about questions of truth or falsity it seems to demonstrate, we can take as tantamount to conceding the docs were drek. Also, it appears, if the CIA is to be believed [smile], that the secretary of state and the president go about citing evidence without soliciting the CIA's opinion as to its value and authenticity, and don't even give the evidence to the CIA until some time after they've quoted it in public. It's hard not to scratch your head about this one, since it suggests either major interbranch dysfunctionality or Keystone Koppery at levels too high to contemplate if you plan to go on sleeping soundly.

Now, if only this much is true, and I haven't heard the bare facts disputed, I have a problem with anyone who tries to minimize its importance. Since this thread has made such a big deal about credibility, it's fair to question the credibility of the other

evidence the administration has used to buttress its case for going to war: if it was this easy for junk intelligence to make its way, whether from incompetence or mischief, so far up the ladder that the president and the secretary of state end up citing it as fact, it's hard to know how much credence to give the rest of their claims. If Hersh's state department source is correct and Powell is indeed apoplectic, at least he realizes the Iraq/Niger forgery fiasco places his credibility in question even if others don't.

And frankly I don't see how any of this is answered by claiming Hersh is a fraud, Hersh is a liar, Hersh is unprincipled, blah blah blah. The publicly-acknowledged facts in the case don't rest on Hersh's credibility, and not answering them is a cheap evasion.

OK, this one has merit and I will play along.

While they seem to not be in denial over the authenticity (or lack thereof) of these documents, do they know *who* faked them? This is more important than the forgery itself. Let's start with the key players.

1. If the US faked them, then this is clearly a vendetta against Saddam Hussein by the Bush administration. While tantalizing to imagine, it's thin. A bit too thin (at least I hope) for the US Government. Simply put we can - and have - done better. I don't think it was us.

2. If Britain faked them, then this is clearly an attempt to discredit the United States in the eyes of the world community while gaining *something* in return. What does Britain stand to gain from this action? Not enough to send the military in on and deal with daily protests in the streets. Some cheap oil, but then the US gains more than they do - if Britain wanted to screw us, they could do better. I don't think it was them.

3. If Saddam faked them, he may have done so to discredit the US and Britain (see theory 2) but why put that kind of heat on himself? It might have been a red herring to buy time, but again, it's wrong for the situation. It would have been a smarter play to point the finger at someone else - not himself. I don't think it was him.

4. Would Niger do it? What do they gain from war in Iraq? Don't they have their own oil fields that we buy oil from? Why add competition to the market? It's easy to rule them out - they didn't do it either.

That rules out the key players. Who else is involved?

Israel, Syria, Russia and France.

Israel hates Saddam with a passion - everyone knows it. But war in Iraq means increased threats of terrorism for them at home. While I bet they love the fact that Saddam is getting his ass handed to him, the risk of more terrorism further eroding their already unstable economy is just too great. They could have, but didn't, do it.

Syria hates us, likes Saddam, etc. The typical sidekick for the bad guy. So since Syria and Iraq are such pals, why would Syria want us in Iraq? They don't want us there any more than Saddam does. Wasn't them.

Now here's where it gets interesting. Russia has been supplying Iraq with weapons for decades and both they and France had numerous back door deals in the works for oil once sanctions were lifted.

Here's what I think. I think they passed an obvious phoney over on Blair and Bush knowing full well they'd be so excited to see it they wouldn't bother to verify it. I think they figured we'd take it to the UN (which we did) they'd determine it was a fake (which happened) and we'd look like idiots. We'd then get pissed off, draft a UN resolution, which they'd soundly veto and then the door is open for France and Russia to say "look at poor Iraq - we've been so bad to them... c'mon guys the sanctions don't work - lets lift them." In fact, both Russia and France have been trying to lift the sanctions for years. Can you guess who vetoed that decision every time?

We screwed up their plan by saying "hell with it" and going in anyhow. That's why the frenchies have their panties in a twist and the Russians are shaking their nuclear finger at us. We screwed up their oil deal.

That's what I think anyway. It could be totally wrong, I'll admit that. But it does seem to fit pretty well.....

-me

Those old rusty open oil drums? First off, they sure didn't hide them very well since they
are in
an open ditch. Second, if they were dangerous chemicals in those open containers, the
troops and
camera man should now be dead.

Interesting that Iraq did not USE these on our troops if they had them and they were
chemical
weapons, and interesting that qualified weapons inspectors find nothing after months of
searching,
but teenagers who aren't smart enough to find a job, so they join the military, are able to
find
these "hidden" chemical weapons right out in the open like that. They should be working for
the UN
weapons inspecting teams.

Iraq has NO chemical weapons left. If they did, they would have used them on American
troops. No
point in saving them for us to find after the war and say "Aha, we knew you had them!" If
we are
going to find them afterwards anyway, might as well use them on us when they had the
chance.

You people need to think.

Hmmmm, who was the only one who wanted to show that Iraq had WMD so they could attack it??

Perhaps it was France, Germany, Russia, China, or one of the other countries in the world who faked the documents!

When someone is caught with a fake ID, who is usually responsible for having the fake ID produced?

This is not rocket science here.

> 1. If the US faked them, then this is clearly a vendetta against Saddam
> Hussein by the Bush administration.

No shit. Especially since there are no WMD in Iraq, or they would have used them by now.
If they were in Iraq, the US would find them after the war anyway, so might as well USE them on the US now.
But you can't use what you were forced to destroy 12 years ago.

> Now here's where it gets interesting. Russia has been supplying Iraq with
> weapons for decades

It was the USA that gave them the weapons, and CALIBRATED them for Iraq to use on Iran. Do a search and look for that picture of Rumsfeld shaking hands with Saddam in 1883.

Awesome! Which brings to me to a question I always wanted to ask:
How many sound cards can a PC support? And is there a difference
between Windows XP and 98 or 2000 in this regard?

This kind of defeats the purpose of positing a god in the
first place, since being the product of an "interesting
science experiment" leaves us on about the same footing as
being the product of a cosmic accident.

Right...that apparently didn't occur to him, but it occurred to him to
write a vulgar farewell. It's like a 5 year old at a gathering that
isn't getting enough attention, throws a fit and says their leaving.
Who cares? What response was he soliciting when he said good-bye?
It's not like he's family going off to Iraq and we are deeply moved
and concerned about his leaving.

The "gentleman" can come and go as he likes, we don't need him to
announce his intentions. We don't care.

> Yes, but where are the WMD that Bush already knew about.

The chemical weapons that Bush knew about, because he has the receipts from the 80s when the US sold them to Iraq, were destroyed per UN resolutions requiring Iraq to disarm. After Bush used the UN inspectors to make sure there were no weapons left, he attacked them knowing they could not fight back, and as we have seen, they didn't even have any scuds to shoot back at us, let alone any chemical weapons.

> Otherwise it's a crapshoot. Chances are that any given country has any of
> this stuff.!!!!!!!!!

Any country that has not been harassed by the UN for the past 12 years to disarm and make sure that they don't make or get any more weapons, that is.

Israel has nuclear weapons of mass destruction and is still occupying Palestine since 1948. The UN tried to pass resolutions against them, but the USA keeps vetoing those resolutions. The same thing they got mad at France for WANTING to do this time with a resolution that was not about disarming Iraq, but was for attacking them and overthrowing their government. No country was for that except for the US, Britain and Israel.

January 31, 2003
A War Crime or an Act of War?
By STEPHEN C. PELLETIERE

MECHANICSBURG, Pa. - It was no surprise that President Bush, lacking smoking-gun evidence of
Iraq's weapons programs, used his State of the Union address to re-emphasize the moral case for
an invasion: "The dictator who is assembling the world's most dangerous weapons has already
used them on whole villages, leaving thousands of his own citizens dead, blind or disfigured."
The accusation that Iraq has used chemical weapons against its citizens is a familiar part of
the debate. The piece of hard evidence most frequently brought up concerns the gassing of Iraqi
Kurds at the town of Halabja in March 1988, near the end of the eight-year Iran-Iraq war.
President Bush himself has cited Iraq's "gassing its own people," specifically at Halabja, as a
reason to topple Saddam Hussein.
But the truth is, all we know for certain is that Kurds were bombarded with poison gas that day
at Halabja. We cannot say with any certainty that Iraqi chemical weapons killed the Kurds. This
is not the only distortion in the Halabja story.
I am in a position to know because, as the Central Intelligence Agency's senior political
analyst on Iraq during the Iran-Iraq war, and as a professor at the Army War College from 1988
to 2000, I was privy to much of the classified material that flowed through Washington having

to do with the Persian Gulf. In addition, I headed a 1991 Army investigation into how the
Iraqis would fight a war against the United States; the classified version of the report went
into great detail on the Halabja affair.
This much about the gassing at Halabja we undoubtedly know: it came about in the course of a
battle between Iraqis and Iranians. Iraq used chemical weapons to try to kill Iranians who had
seized the town, which is in northern Iraq not far from the Iranian border. The Kurdish
civilians who died had the misfortune to be caught up in that exchange. But they were not
Iraq's main target.
And the story gets murkier: immediately after the battle the United States Defense Intelligence
Agency investigated and produced a classified report, which it circulated within the
intelligence community on a need-to-know basis. That study asserted that it was Iranian gas
that killed the Kurds, not Iraqi gas.
The agency did find that each side used gas against the other in the battle around Halabja. The
condition of the dead Kurds' bodies, however, indicated they had been killed with a blood
agent - that is, a cyanide-based gas - which Iran was known to use. The Iraqis, who are thought
to have used mustard gas in the battle, are not known to have possessed blood agents at the
time.
These facts have long been in the public domain but, extraordinarily, as often as the Halabja
affair is cited, they are rarely mentioned. A much-discussed article in The New Yorker last
March did not make reference to the Defense Intelligence Agency report or consider that Iranian
gas might have killed the Kurds. On the rare occasions the report is brought up, there is
usually speculation, with no proof, that it was skewed out of American political favoritism
toward Iraq in its war against Iran.
I am not trying to rehabilitate the character of Saddam Hussein. He has much to answer for in
the area of human rights abuses. But accusing him of gassing his own people at Halabja as an
act of genocide is not correct, because as far as the information we have goes, all of the
cases where gas was used involved battles. These were tragedies of war. There may be
justifications for invading Iraq, but Halabja is not one of them.

In fact, those who really feel that the disaster at Halabja has bearing on today might want to consider a different question: Why was Iran so keen on taking the town? A closer look may shed light on America's impetus to invade Iraq.

We are constantly reminded that Iraq has perhaps the world's largest reserves of oil. But in a regional and perhaps even geopolitical sense, it may be more important that Iraq has the most extensive river system in the Middle East. In addition to the Tigris and Euphrates, there are the Greater Zab and Lesser Zab rivers in the north of the country. Iraq was covered with irrigation works by the sixth century A.D., and was a granary for the region.

Before the Persian Gulf war, Iraq had built an impressive system of dams and river control projects, the largest being the Darbandikhan dam in the Kurdish area. And it was this dam the Iranians were aiming to take control of when they seized Halabja. In the 1990's there was much discussion over the construction of a so-called Peace Pipeline that would bring the waters of the Tigris and Euphrates south to the parched Gulf states and, by extension, Israel. No progress has been made on this, largely because of Iraqi intransigence. With Iraq in American hands, of course, all that could change.

Thus America could alter the destiny of the Middle East in a way that probably could not be challenged for decades - not solely by controlling Iraq's oil, but by controlling its water.

Even if America didn't occupy the country, once Mr. Hussein's Baath Party is driven from power, many lucrative opportunities would open up for American companies.

All that is needed to get us into war is one clear reason for acting, one that would be generally persuasive. But efforts to link the Iraqis directly to Osama bin Laden have proved inconclusive. Assertions that Iraq threatens its neighbors have also failed to create much resolve; in its present debilitated condition - thanks to United Nations sanctions - Iraq's conventional forces threaten no one.

Perhaps the strongest argument left for taking us to war quickly is that Saddam Hussein has committed human rights atrocities against his people. And the most dramatic case are the accusations about Halabja.

Before we go to war over Halabja, the administration owes the American people the full facts.

And if it has other examples of Saddam Hussein gassing Kurds, it must show that they were not
pro-Iranian Kurdish guerrillas who died fighting alongside Iranian Revolutionary Guards. Until
Washington gives us proof of Saddam Hussein's supposed atrocities, why are we picking on Iraq
on human rights grounds, particularly when there are so many other repressive regimes
Washington supports?
Stephen C. Pelletiere is author of "Iraq and the International Oil System: Why America Went to
War in the Persian Gulf."

Responding to Bush's speech line by line, lie by lie

An Annotated Critique of President George W. Bush's March 17 Address Preparing the Nation for War

FPIF Middle Eastern Editor, Stephen Zunes, provides an annotated critique of the president's address to the nation about imminent war against Iraq. Given that the Democratic Party leadership in Congress declined to take their traditional opportuntity to offer a formal response, FPIF provides a response to all the president's arguments for
war. Line by line, argument by argument, falsehood by falsehood, Zunes responds to the president.

Stephen Zunes is an associate professor of politics and chair of the Peace & Justice Studies Program at the University of San Francisco.

(Editors' Note: Below is a transcript of President George W. Bush's address to the nation on Monday, March 17, announcing his readiness to order a U.S. invasion of Iraq followed by an analysis highlighting some
of the lies and misleading statements in the speech. Such an overview is
necessary since the Democratic Party leadership in Congress, which has pledged to support the president in the event of war, declined to take their traditional opportunity to offer a formal response. The Green Party, which opposes the war, was not given the opportunity by the networks to respond.)

"My fellow citizens, events in Iraq have now reached the final days of decision. For more than a decade, the United States and other nations have pursued patient and honorable efforts to disarm the Iraqi regime without war."
This is patently false. In 1998, President Bill Clinton successfully pressured UNSCOM director Richard Butler to withdraw inspectors without
authorization from the Secretary General or the Security Council--before
their mission was complete--in order to engage in a four-day heavy

bombing campaign against Iraq. As predicted at the time, this illegal use of military force--combined with revelations that the United States had abused the inspections process for espionage purposes--resulted in the Iraqi government barring the inspectors' return until a reorganized inspections commission known as UNMOVIC commenced inspections last year. UNMOVIC chairman Hans Blix and UN Secretary General Kofi Annan explicitly called upon the United States and the international community to give the inspectors more time to do their job, noting that it would take a number of months before their mission could be completed.

"That regime pledged to reveal and destroy all its weapons of mass destruction as a condition for ending the Persian Gulf War in 1991." Iraq was presented with this demand as part of UN Security Council resolution 687, which mandated Iraqi disarmament of its weapons of mass destruction and related delivery systems. This was a unilateral decree from the Security Council which--while nominally part of the ceasefire agreement--was void of any explicit threat to continue prosecuting the war if Iraq did not agree to the disarmament provisions. It is noteworthy that the demand for Iraqi disarmament in the resolution was put forward within the context of a call for regional disarmament. The United States has refused to encourage any regional disarmament initiative, however, and remains a strong supporter of the Israeli and Pakistani governments, which have advanced nuclear arsenals among other weapons of mass destruction.

"Since then, the world has engaged in 12 years of diplomacy. We have passed more than a dozen resolutions in the United Nations Security Council. We have sent hundreds of weapons inspectors to oversee the disarmament of Iraq. Our good faith has not been returned. The Iraqi regime has used diplomacy as a ploy to gain time and advantage. It has uniformly defied Security Council resolutions demanding full disarmament." Iraq's cooperation has indeed been less than total, but most independent reports--even during UNSCOM's inspections regime between 1991 and 1998--conclude that cooperation was close to 90%. According to UNMOVIC, Iraq's cooperation since inspections resumed last year has been far better.

"Over the years, UN weapon inspectors have been threatened by Iraqi officials, electronically bugged, and systematically deceived." This was not an uncommon practice during the UNSCOM era, but there have been no reports from UNMOVIC of such harassment subsequently.

"Peaceful efforts to disarm the Iraqi regime have failed again and again--because we are not dealing with peaceful men."
Peaceful efforts at disarming Iraq have succeeded in eliminating somewhere between 95% and 100% of Iraq's weapons of mass destruction and
related materiel and delivery systems as a result of UN Security Council
resolution 687 and subsequent resolutions. The determination to go to war despite such success raises serious questions as to whether the United States is governed by peaceful men.

"Intelligence gathered by this and other governments leaves no doubt that the Iraq regime continues to possess and conceal some of the most lethal weapons ever devised."
If the United States really has evidence that the Iraqi government continues to possess and conceal weapons of mass destruction, why has the Bush administration refused to make such evidence public or pass such intelligence on to United Nations inspectors, who have the authority to destroy them?

"This regime has already used weapons of mass destruction against Iraq's
neighbors and against Iraq's people."
Iraq did use chemical weapons against Iranian troops and Kurdish civilians back in the 1980s when Saddam Hussein's regime was being supported by the United States. The Reagan administration covered up for
the Halabja massacre and similar attacks against Kurdish civilians by falsely claiming that it was the Iranians--then the preferred enemy--who
were responsible. In addition, the U.S. Defense Intelligence Agency provided Iraq with U.S. satellite data to help Saddam Hussein's forces locate Iranian troop concentrations in the full knowledge that they were
using chemical weapons. Many of the key components of Iraq's chemical weapons program came from the United States, ostensibly for pesticides as part of taxpayer-funded agricultural subsidies, despite evidence that
these U.S.-manufactured chemicals were probably being diverted for use in illegal chemical weapons.

"The regime has a history of reckless aggression in the Middle East."
This is true, though Iraq's invasion of Iran in 1980 was quietly supported by the U.S. government and ambivalent signals by the U.S. ambassador to Iraq immediately prior to the Iraqi invasion of Kuwait may
have emboldened Saddam Hussein to conquer the sheikdom in 1990. Now, with Iraq's offensive military capability just a fraction of what is was
during that period and an unambiguous resolve by the international community to thwart such future aggression, there is little chance of Iraq invading another country again.

"It has a deep hatred of America and our friends."
Iraq willingly accepted U.S. support during the 1980s. The more belligerent posture of recent years is largely a result of the U.S. destruction of much of the country's military and civilian infrastructure in the 1991 Gulf War, which was supported by a number of other Middle Eastern states with which Iraq had also once collaborated and been on friendly terms. Subsequent U.S.-led sanctions, periodic bombing raids, and invasion threats have resulted in widespread suffering of the population that has intensified anti-American sentiment. Had the United States adopted a more enlightened policy, such deep hatred would likely have not developed.

"And it has aided, trained, and harbored terrorists, including operatives of al Qaeda."
Every independent investigation of every Bush administration claim of a connection between the secular Iraqi government and the Islamist al Qaeda network has found no evidence of any Iraqi aid, training, or harboring of al Qaeda terrorists. According to both published U.S. government reports and independent analyses, Iraq's support for international terrorism--which has always been restricted to secular nationalists like the radical Palestinian Abu Nidal faction--peaked in the 1980s.

"The danger is clear: using chemical, biological or, one day, nuclear weapons, obtained with the help of Iraq, the terrorists could fulfill their stated ambitions and kill thousands or hundreds of thousands of innocent people in our country, or any other. The United States and other nations did nothing to deserve or invite this threat. But we will do everything to defeat it. Instead of drifting along toward tragedy, we will set a course toward safety. Before the day of horror can come, before it is too late to act, this danger will be removed."
The Bush administration has failed to present any evidence that Iraq has the intention to pass on weapons of mass destruction to terrorists, an act that would inevitably lead to a U.S.-led invasion, only in this case with the support of the international community. This is the essence of deterrence, which protected the United States and its allies from Josef Stalin, Mao Zedung, and other leaders as tyrannical and far more powerful militarily than Saddam Hussein. And no country has the right to invade another on some far-fetched scenario that they might do something someday. Ironically, as the CIA has noted in a report released this past

October, Saddam Hussein would not likely use WMDs as a first strike, but
in the case of a U.S. invasion--with nothing to lose and the logic of
deterrence no longer in effect--would be far more likely to use whatever
WMDs he may possess. In other words, a U.S. invasion, rather than
preventing the use of weapons of mass destruction, would be the most
likely--and the only realistic--scenario that such horrible weapons
would be utilized.

"The United States of America has the sovereign authority to use force
in assuring its own national security. That duty falls to me, as
Commander-in-Chief, by the oath I have sworn, by the oath I will keep."
The oath of office also demands that the president uphold and defend the
Constitution of the United States, which forbids such an illegal use of
force. Virtually no international legal authority recognizes such an
invasion as an act of assuring legitimate national security interests.

"Recognizing the threat to our country, the United States Congress voted
overwhelmingly last year to support the use of force against Iraq."
The U.S. Congress--with the support of both the Republican and
Democratic leadership--did authorize the use of force against Iraq.
However, the resolution violates Article I, Section 8 of the U.S.
Constitution which does not allow Congress to grant such open-ended
warmaking authority to the president for an offensive military action.
Only a formal declaration of war in such a situation can be considered
legitimate. Furthermore, Article VI of the Constitution declares that
international treaties to which the United States is a party are to be
treated as supreme law, thereby proscribing Congress from passing any
resolution that violates the UN Charter, such as supporting an invasion
of a sovereign nation. As a result, this resolution is unconstitutional
and thereby invalid.

"America tried to work with the United Nations to address this threat
because we wanted to resolve the issue peacefully. We believe in the
mission of the United Nations."
Then why is the United States violating the UN Charter, which forbids
the use of military force unless a country finds itself under armed
attack or it is explicitly authorized by the UN Security Council? The
mission of the United Nations is to preserve international peace and
security, not to approve the invasion of one country by another.

"One reason the UN was founded after the Second World War was to
confront aggressive dictators, actively and early, before they can
attack the innocent and destroy the peace."

The United States refused to confront Saddam Hussein active and early when he was committing acts of aggression against Iranians and Kurds and opposed decisive action by the United Nations. Iraq's ability to attack the innocent and destroy the peace has already been reduced dramatically through a series of actions by the United Nations, including authorizing the use of force to remove Iraqi occupation forces from Kuwait, placing strict military sanctions against the dictatorship, and overseeing the most aggressive unilateral disarmament effort and inspections regime in history.

"In the case of Iraq, the Security Council did act, in the early 1990s. Under Resolutions 678 and 687--both still in effect--the United States and our allies are authorized to use force in ridding Iraq of weapons of mass destruction. This is not a question of authority, it is a question of will."

The assertion that resolutions 678 and 687 give the United States the right to invade Iraq is patently false. Resolution 678 authorized the use of force to enforce prior UN Security Council resolutions demanding that Iraq remove its occupation forces from Kuwait. Once that was accomplished in late February 1991, the resolution became moot. Resolution 687 called for Iraqi disarmament of weapons of mass destruction and related delivery systems, but--even though it was the most detailed resolution in the history of the United Nations--no enforcement mechanism was specified. According to United Nations Charter, such resolutions can be enforced militarily only if the Security Council as a whole recognizes that a country is in material breach, determines that all non-military means have been exhausted, and specifically authorizes the use of force. The Security Council has not done so subsequent to the passage of resolution 678 in late November 1990.

"Last September, I went to the UN General Assembly and urged the nations of the world to unite and bring an end to this danger. On November 8th, the Security Council unanimously passed Resolution 1441, finding Iraq in material breach of its obligations, and vowing serious consequences if Iraq did not fully and immediately disarm."

True, but it did not authorize the use of force. Article 14 of that

resolution specifically noted that the Security Council would "remain seized of the matter," reiterating that only the Security Council as a whole--not any one member state--has the power to determine whether military force can be legitimately utilized to enforce its resolution.

"Today, no nation can possibly claim that Iraq has disarmed."
There actually are some nations that believe that Iraq has disarmed under the resolutions. Though this is not likely the case, the Bush administration has been unable to present clear evidence to the contrary.

"And it will not disarm so long as Saddam Hussein holds power."
This is sheer speculation. As a dictator who has proven his desire to ruthlessly hold on to power at all costs, he very well could disarm to save his regime. However, the Bush administration has made clear its intention to invade anyway, thereby providing little incentive for Saddam Hussein to do so.

"For the last four-and-a-half months, the United States and our allies have worked within the Security Council to enforce that Council's long-
standing demands. Yet, some permanent members of the Security Council have publicly announced they will veto any resolution that compels the disarmament of Iraq. These governments share our assessment of the danger, but not our resolve to meet it."
Actually, most Security Council members do not believe that Iraq is the
imminent threat that the United States claims it to be, though, if convincing evidence were presented that Iraq indeed posed a threat to international peace and security, a clear majority of the Security Council--including France--have indicated their willingness to authorize
the use of force. A veto of the proposed U.S.-sponsored resolution by France, Russia, and China would probably not have been necessary since the United States was unable--despite enormous pressure, including promises of increased foreign aid, trade preferences, and other incentives--to convince a simple majority of nations on the Council that
it was necessary to take the unprecedented step of authorizing the United States to invade Iraq, overthrow the government, and replace it with one more to its liking.

"Many nations, however, do have the resolve and fortitude to act against
this threat to peace, and a broad coalition is now gathering to enforce
the just demands of the world."
There is nothing close to the broad coalition such as that which joined
the United States in ridding Iraqi occupation forces from Kuwait in 1991, when Iraq clearly did constitute a threat to peace. As of this

writing, only one major power (Great Britain) and two minor powers (Spain and Australia) have offered to send troops. All three of these governments are doing so contrary to the sentiments of the vast majority
of their population and their combined participation still leaves the United States contributing at least 85% of combat forces. As columnist Maureen Dowd noted, since the Bush administration has driven virtually everyone from the schoolyard, it now has to rely on imaginary friends.

"The United Nations Security Council has not lived up to its responsibilities, so we will rise to ours."
In reality, the United Nations Security Council has gone to extraordinary efforts to minimize any threat to peace from Iraq, including authorizing the use of force in 1990 to enforce resolutions requiring an Iraqi withdrawal from occupied Kuwait, the imposition of strict sanctions against Iraq, and the creation of an inspections regime
that has been largely--if not 100%--effective. By contrast, it is not the responsibility of the United States or any country to invade a sovereign nation when it feels like it.

"In recent days, some governments in the Middle East have been doing their part. They have delivered public and private messages urging the dictator to leave Iraq, so that disarmament can proceed peacefully. He has thus far refused. All the decades of deceit and cruelty have now reached an end. Saddam Hussein and his sons must leave Iraq within 48 hours. Their refusal to do so will result in military conflict, commenced at a time of our choosing. For their own safety, all foreign nationals--including journalists and inspectors--should leave Iraq immediately."
President Bush has no authorization to demand that United Nations inspectors or foreign nationals leave Iraq. Nor does he have the right to demand that Saddam Hussein and his sons leave their country. No Security Council resolutions require that Saddam Hussein resign or that
he and any other member of his family go into exile. And neither the United States nor any other country has the right to commence an invasion of another country at the time of its choosing.

"Many Iraqis can hear me tonight in a translated radio broadcast, and I
have a message for them. If we must begin a military campaign, it will be directed against the lawless men who rule your country and not against you."
It is highly likely that a major U.S. military campaign--particularly one with such a heavy reliance on air power and the determination to seize by force a capital city of over five million people--will result in the deaths of thousands of innocent Iraqi civilians.

"As our coalition takes away their power, we will deliver the food and medicine you need."

In large part as a result of the U.S.-led sanctions, there are already severe shortages of food and medicines in Iraq. Strict and mostly equitable rationing have left few Iraqi families with more than a couple
of days' worth of food in storage. It is unlikely that the United States
will be able to supply most Iraqis with the food and medicine they need
in any timely manner.

"We will tear down the apparatus of terror and we will help you to build
a new Iraq that is prosperous and free. In a free Iraq, there will be no
more wars of aggression against your neighbors, no more poison factories, no more executions of dissidents, no more torture chambers and rape rooms."
The fact that the United States has supported scores of regimes--including a number in the Middle East--that have tortured, raped, and murdered dissidents raises serious questions as to whether the Bush administration really supports a free Iraq. The Bush administration's ongoing support of Moroccan occupation forces in Western Sahara, Turkish
occupation forces in northern Cyprus, and Israeli occupation forces in the West Bank, the Gaza Strip, and the Golan Heights raises serious questions as to whether the United States is actually bothered by countries that commit acts of aggression against neighbors. The United States also supports a number of Middle Eastern countries that are believed to have developed chemical weapons, similarly raising questions
as to whether the Bush administration is really worried about "poison factories."

"The tyrant will soon be gone. The day of your liberation is near."
Most Iraqis would certainly welcome the end of Saddam Hussein's regime.
But it is highly questionable whether a Western nation that has already
wrought enormous suffering for the Iraqi people, invades the country, and installs one of its own generals as a provisional military governor
will be seen as an act of liberation or a foreign occupation.

"It is too late for Saddam Hussein to remain in power. It is not too late for the Iraqi military to act with honor and protect your country by permitting the peaceful entry of coalition forces to eliminate weapons of mass destruction."
First, it is hard to imagine any national army--even under the most ruthless of dictators--that would not resist a foreign invasion. Second,
if the United States knows where these alleged weapons of mass

destruction are located, why haven't U.S. government officials informed
UNMOVIC inspectors, who have the authority to destroy them?

"Our forces will give Iraqi military units clear instructions on actions
they can take to avoid being attacked and destroyed. I urge every member
of the Iraqi military and intelligence services, if war comes, do not
fight for a dying regime that is not worth your own life. And all Iraqi
military and civilian personnel should listen carefully to this warning.
In any conflict, your fate will depend on your action. Do not destroy
oil wells, a source of wealth that belongs to the Iraqi people. Do not
obey any command to use weapons of mass destruction against anyone,
including the Iraqi people. War crimes will be prosecuted. War criminals
will be punished. And it will be no defense to say, "I was just
following orders"."
The United States has actively undermined and refused to participate in
the International Criminal Court, which was designed to try and punish
war criminals like Saddam Hussein. As a result, any such trials will
likely be under the tutelage of an occupying American army, which will
be seen by the vast majority of the international community as
illegitimate. For a foreign occupation army to try and punish leaders of
an internationally recognized government--however reprehensible they may
be--is in itself a war crime and would make these thugs martyrs in the
eyes of much of the world.

"Should Saddam Hussein choose confrontation, the American people can
know that every measure has been taken to avoid war, and every measure
will be taken to win it."
Refusing an illegitimate order by a foreign government to surrender
power is not choosing confrontation. And, clearly, the Bush
administration has not taken "every measure to avoid war."

"Americans understand the costs of conflict because we have paid them in
the past. War has no certainty, except the certainty of sacrifice. Yet,
the only way to reduce the harm and duration of war is to apply the full
force and might of our military, and we are prepared to do so. If Saddam
Hussein attempts to cling to power, he will remain a deadly foe until
the end. In desperation, he and terrorists groups might try to conduct
terrorist operations against the American people and our friends.

These
attacks are not inevitable. They are, however, possible."
Then why prosecute and unnecessary and illegal war?

"And this very fact underscores the reason we cannot live under the
threat of blackmail. The terrorist threat to America and the world
will
be diminished the moment that Saddam Hussein is disarmed."
According to the CIA and other estimates, Iraq has not engaged in any anti-American terrorism since the alleged 1993 assassination attempt against former President George Bush and has already dramatically reduced his support for international terrorism since the 1980s, when the United States was supporting his government. By contrast, most intelligence analyses predict an increase in the terrorist threat to America and its allies should the United States invade Iraq.

"Our government is on heightened watch against these dangers. Just as
we
are preparing to ensure victory in Iraq, we are taking further actions to protect our homeland. In recent days, American authorities have expelled from the country certain individuals with ties to Iraqi intelligence services. Among other measures, I have directed
additional
security of our airports, and increased Coast Guard patrols of major seaports. The Department of Homeland Security is working closely with the nation's governors to increase armed security at critical
facilities
across America. Should enemies strike our country, they would be attempting to shift our attention with panic and weaken our morale
with
fear. In this, they would fail. No act of theirs can alter the course
or
shake the resolve of this country. We are a peaceful people--yet we're not a fragile people, and we will not be intimidated by thugs and killers. If our enemies dare to strike us, they and all who have aided them, will face fearful consequences."
The chances of the United States being attacked will be greatly increased if the U.S. attacks first. Indeed, if there was any logic behind the madness of 9/11, it was Osama bin Laden's hope that the United States would react in such a way that would only increase the popularity of anti-American extremists. History has shown that the
more
the United States has militarized the Middle East, the less secure we have become.
